

Mathematics Table Lead Meeting

April 12, 2017

SDEA Conference Room /Pierre

Table Leads Only 10:30-4:00 p.m.

Table leads met to review the eight Standards for Mathematical Practice. During the June 2016 meetings, mathematics workgroup members wanted to do more reflection and research about the eight standards for mathematical practice before making final decisions about any revisions.

The meeting started with an exploration of how well the eight Standards for Mathematical Practice could be understood with revisions of the text of the standards. After exploring the standards and discussing the implications of any revisions, it was determined unanimously that the Standards for Mathematical Practice would not need any revision and were essential to the successful achievement in mathematics for the students of South Dakota.
