Science, Technology, Engineering & Mathematics (STEM) Standards

STEM Exhibit 1

Date Submitted: November 23, 2015

Leah Brink, Industry Representative

It's great to see educators incorporating industry needs into the curriculum. I applaud the efforts of the workforce group in effectively revising the standards for both Robotics and Engineering pathways within the STEM cluster. E 6.1, E 6.2, RBT 5.1 and RBT 5.2 are especially valid for my industry.
