Dear Mark,

Please allow this letter to serve as our request to change the name of LATI's current Drafting Program to Surveying and Mechanical CAD. The name change better explains the curriculum content of this program. The program's Advisory Board has approved the name change.

The request involves changing the name only. Curriculum objectives and content remain the same. Employment opportunities are expanding rapidly in the Mechanical Drafting and Surveying technical fields. We need to make the change to better attract students to these vital occupations.

Please let me know if there are any questions.

Thank you!

Deb Shephard
