South Dakota School Age Care Alliance

AFTER SCHOOL DAY AT THE CAPITOL

ABOUT DAC

Each year during the legislative session, OST programs converge on Pierre to participate in the annual SoDakSACA-sponsored "Afterschool Day at the Capitol." Programs have booths highlighting what 'after school programs' are all about, and feature what their program provides the children in their communities.

NOW OPEN FOR REGISTRATION

Join us this year for the fun theme of "Bring Your Best." Have your table highlighted with your student's favorite club or activity.

Not able to attend? Bring a poster highlighting your program to the SoDakSACA conference in Spearfish to be displayed in the Rotunda. Or, email a copy of it to Mark or Dawn Marie.

REGISTER NOW

RISK FACTORS REMINDERS

- Changes in administration or front line staff
- Portion of allocation unspent
- Staff attends DOE training such as Regional Meeting
- Staff documents their other Professional Development
- Reports submitted to SD DOE on time
- Previous findings of last visit
- Daily projected attendance vs. actual
- Family and Community Engagement
- *Discretionary

Activity and Program SMART Goals

Activity SMART Goals

Just like program SMART goals, activity SMART goals provide a road map for each activity you do in your program. In key component 2, we developed our program SMART goal indicating that we want an increase in 4th grade mathematic skills by the end of our program. Our activity goal will dig deeper into a certain skill (fractions) and a certain activity (gardening club).

Sample Activity Goal: 90 percent of students who attend the gardening club activity for the entire afterschool program will demonstrate an increase in understanding of how fractions and measurement apply to real-life activities as measured by rubric.

Once your team has completed your needs assessment, you can use the chart below to record your activity SMART Goals.

Activity	Needs Assessment Statement	Program SMART Goal	Activity SMART Goal
Gardening Club	Our 4 th grade students are falling behind in their mathematics skills based on state assessments. When talking to school-day teachers, the students are particularly having trouble with fractions. From student voice data, we found that the students want to be outside and learn about plants.	80 percent of students who attend the out of school time program regularly will demonstrate an increase in mathematical skills by the end of the Fall semester as measured by pre- and post-state assessments.	90 percent of students who attend the gardening club activity for the entire afterschool program will demonstrate an increase in understanding of how fractions and measurement apply to real-life activities as measured by rubric.
