Teacher Certification	Agriculture Food and Natural Resources Cluster Endorsement; Agribusiness Pathway Endorsement; *Agriculture Education
Resources	

### Course Description

Agribusiness Management is a semester-length or year-long high school elective that introduces the business, management, marketing, and financial skills needed to successfully produce food, fiber, and fuel for domestic and global markets. Students will learn about the components of the agribusiness system and how they interact to deliver food to our tables. They will also learn about the key elements of a successful agribusiness enterprise: economics, financial management, marketing and sales, and government policies and regulations. Developing a business plan for an AFNR business as an authentic assessment for the end of the course is recommended. Opportunities for application of clinical and leadership skills are provided by participation in FFA activities, conferences, and skills competitions such as sales related career development events and proficiency awards. Each student will be expected to maintain a Supervised Agricultural Experience Program/Internship.

### Program of Study Application

Agribusiness Management is a second pathway course in the Agriculture, Food and Natural Resources Cluster, Agribusiness Systems Pathway. Agribusiness Management would be preceded by an Agribusiness Sales and Marketing and followed by a Capstone experience.

## Course Standards

### AM 1: Introduce the components of agribusiness management.

<i>Webb Level</i>	<i>Sub-indicator</i>
Three Strategic Thinking	AM 1.1 Explain key business types and management principles and issues for the agribusiness enterprise.
