

## Core Content Connectors (CCCs) linked to the 2015 South Dakota Science Standards – Elementary School (Grades K-5)

### How to Read the Grade Level Core Content Connectors

The South Dakota Science Core Content Connectors (CCCs) are intended to promote access to grade-level content standards by pinpointing the big ideas and concepts of the *2015 South Dakota Science Standards*. The CCCs reflect rigorous science expectations and opportunities for students to learn essential science concepts and procedures with deep understanding given guidance from peers and adults, so that all students can engage in sophisticated science and engineering practices.

As shown in the illustration below, each set of CCCs has a title. The title reveals the organization of the CCCs, which is based on the disciplinary core ideas (DCIs) from the *Framework for K-12 Science Education*. Below the title is the corresponding South Dakota Science Standard. Below the standard are the specific CCCs (listed left to right) to address the science and engineering practices (SEPs), disciplinary core ideas, and crosscutting concepts that, when combined, address the “big idea” of the South Dakota science standard above.

**Science and Engineering Practices.** The blue shaded text on the left includes the CCC for the science and engineering practices used to address the South Dakota science standard listed above. The bold headings are derived from the eight categories detailed in the *Framework for K-12 Science Education*.

**Disciplinary Core Ideas.** The orange shaded text in the middle includes the CCCs to address the South Dakota science standard listed above. The CCCs are arranged by bold headings representing how the core ideas in the *Framework for K-12 Science Education* are divided into a total of 39 sub-ideas representing the 11 core ideas: four in Life Science, four in Physical Science, and three in Earth and Space Science. The CCCs represent what students should understand about that sub-idea at the end of the grade. The CCCs are bulleted to be certain that each statement is distinct.

**Crosscutting Concepts.** The green shaded text on the right includes the CCCs to address the South Dakota science standard listed above. The CCCs are arranged by bold headings which are derived from the seven categories detailed in the *Framework for K-12 Science Education*.

Core Content Connectors (CCCs) linked to the  
2015 South Dakota Science Standards – Kindergarten

**Kindergarten Physical Science Conceptual Understanding\*:**

Pushes and pulls can have different strengths and directions, and can change the speed or direction of motion or start or stop. Bigger pushes and pulls cause bigger changes in an object’s motion or shape. Sunlight warms the Earth’s surface.

\* As stated in the 2015 South Dakota Science Standards.

<b>K-PS2 Motion and Stability: Forces and Interactions</b>		
<b>K-PS2-1.</b> Plan and carry out an investigation to compare the effects of different strengths or different directions of pushes and pulls on the motion of an object.		
Science and Engineering Practices Core Content Connectors	Disciplinary Core Ideas Core Content Connectors	Crosscutting Concepts Core Content Connectors
<p><b>Planning and Carrying Out Investigations</b></p> <p>With guidance and support from peers and adults, investigate and describe the effect caused by different strengths and directions of pushes and pulls on the motion of an object.</p>	<p><b>PS2.A: Forces and Motion</b></p> <ul style="list-style-type: none"> <li>Recognize that pushes and pulls can have different strengths and directions.</li> </ul> <p><b>PS2.B: Types of Interactions</b></p> <ul style="list-style-type: none"> <li>Recognize the effect caused by different strengths or directions of pushes and pulls on the motion of an object.</li> </ul>	<p><b>Cause and Effect</b></p> <p>With guidance and support from peers and adults, compare the effect on the motion of an object caused by changes in the strength or direction of the pushes and pulls.</p>

Core Content Connectors (CCCs) linked to the  
2015 South Dakota Science Standards – Kindergarten

<b>K-PS2 Motion and Stability: Forces and Interactions</b>		
<b>K-PS2-2.</b> Analyze data to determine if a design solution works as intended to change the speed or direction of an object with a push or a pull.		
Science and Engineering Practices Core Content Connectors	Disciplinary Core Ideas Core Content Connectors	Crosscutting Concepts Core Content Connectors
<p><b>Analyzing and Interpreting Data</b></p> <p>With guidance and support from peers and adults, use graphical or visual displays (e.g., pictures, pictographs, drawings, written observations, tables, charts) to determine if a design solution causes the intended change in speed or direction of motion of an object.</p>	<p><b>PS2.A: Forces and Motion</b></p> <ul style="list-style-type: none"> <li>Recognize that pushing or pulling on an object can change the speed or direction of its motion.</li> </ul>	<p><b>Cause and Effect</b></p> <p>With guidance and support from peers and adults, describe whether the push or pull from the design solution causes the intended change in speed or direction of motion of an object.</p>

<b>K-PS3 Energy</b>		
<b>K-PS3-1.</b> Make observations to determine the effect of sunlight on Earth’s surface.		
Science and Engineering Practices Core Content Connectors	Disciplinary Core Ideas Core Content Connectors	Crosscutting Concepts Core Content Connectors
<p><b>Planning and Carrying Out Investigations</b></p> <p>With guidance and support from peers and adults, record observations of the relative warmth of materials in the presence and absence of sunlight (i.e., qualitative measures of temperature; e.g., hotter, warmer, colder).</p>	<p><b>PS3.B: Conservation of Energy and Energy Transfer</b></p> <ul style="list-style-type: none"> <li>Compare the warmth of Earth materials placed in sunlight and the same Earth materials placed in shade.</li> </ul>	<p><b>Cause and Effect</b></p> <p>With guidance and support from peers and adults, determine the relative warmth of materials in sunlight and in shade (i.e., qualitative measures of temperature).</p>

Core Content Connectors (CCCs) linked to the  
2015 South Dakota Science Standards – Kindergarten

<b>K-PS3 Energy</b>		
<b>K-PS3-2.</b> Design and build a structure that will reduce the warming effect of sunlight on an area.		
Science and Engineering Practices Core Content Connectors	Disciplinary Core Ideas Core Content Connectors	Crosscutting Concepts Core Content Connectors
<p><b>Constructing Explanations and Designing Solutions</b></p> <p>With guidance and support from peers and adults, design and build a structure that reduces warming on an area caused by the sun.</p>	<p><b>PS3.B: Conservation of Energy and Energy Transfer</b></p> <ul style="list-style-type: none"> <li>Recognize that the design of a structure (e.g., umbrella, canopy, tent) will reduce the warming caused by the sun.</li> </ul>	<p><b>Cause and Effect</b></p> <p>With guidance and support from peers and adults, determine whether a structure meets expectations in terms of cause (a structure blocks sunlight) and effect (less warming of the surface).</p>

Core Content Connectors (CCCs) linked to the  
2015 South Dakota Science Standards – Kindergarten

**Kindergarten Life Science Conceptual Understanding\*:**

Plants and animals (including humans) need food and water in order to grow.

\* As stated in the 2015 South Dakota Science Standards.

<b>K-LS1 From Molecules to Organisms: Structures and Processes</b>		
<b>K-LS1-1. Describe patterns of what plants and animals (including humans) need to survive.</b>		
<b>Science and Engineering Practices Core Content Connectors</b>	<b>Disciplinary Core Ideas Core Content Connectors</b>	<b>Crosscutting Concepts Core Content Connectors</b>
<p><b>Analyzing and Interpreting Data</b> With guidance and support from peers and adults, collect data about plants' need for water and light (e.g., observations of plants being grown in a classroom).</p>	<p><b>LS1.C: Organization for Matter and Energy Flow in Organisms</b></p> <ul style="list-style-type: none"> <li>• Identify that animals need water and food to live and grow.</li> <li>• Identify that plants need water and light to live and grow.</li> </ul>	<p><b>Patterns</b> With guidance and support from peers and adults, describe patterns in provided data that show plants need light and water to live and grow and animals need food and water to live and grow.</p>

Core Content Connectors (CCCs) linked to the  
2015 South Dakota Science Standards – Kindergarten

**Kindergarten Earth and Space Science Conceptual Understanding\*:**

There are patterns and variations in local weather. Plants and animals can change their local environment. Plants and animals (including humans) need to survive and there is a relationship between their needs and where they live. The purpose of weather forecasting is to prepare for and to respond to severe weather. Things people do can affect the environment, but they can make choices to reduce their impact.

\* As stated in the 2015 South Dakota Science Standards.

<b>K-ESS2 Earth's Systems</b>		
<b>K-ESS2-1.</b> Use and share observations of local weather conditions to describe patterns over time.		
Science and Engineering Practices Core Content Connectors	Disciplinary Core Ideas Core Content Connectors	Crosscutting Concepts Core Content Connectors
<b>Analyzing and Interpreting Data</b> With guidance and support from peers and adults, use and share graphical displays (e.g., pictures, charts, tables) to organize data from observations (i.e., firsthand or from media) about local weather conditions.	<b>ESS2.D: Weather and Climate</b> <ul style="list-style-type: none"> <li>Observe and identify patterns in weather conditions using observations of local weather.</li> </ul>	<b>Patterns</b> With guidance and support from peers and adults, recognize weather patterns across months (e.g., some months have more hot days, some have more rainy days).

Core Content Connectors (CCCs) linked to the  
2015 South Dakota Science Standards – Kindergarten

<b>K-ESS2 Earth's Systems</b>		
<b>K-ESS2-2.</b> Engage in argument from evidence for how plants and animals (including humans) can change the environment to meet their needs.		
Science and Engineering Practices Core Content Connectors	Disciplinary Core Ideas Core Content Connectors	Crosscutting Concepts Core Content Connectors
<p><b>Engaging in Argument from Evidence</b></p> <p>With guidance and support from peers and adults, identify examples of plants changing their environments (e.g., plant roots lifting sidewalks) and examples of animals (including humans) changing their environments (e.g., ants building an ant hill) to meet their needs as evidence to support an argument.</p>	<p><b>ESS2.E: Biogeology</b></p> <ul style="list-style-type: none"> <li>Identify examples of how animals change their environments to meet their needs.</li> <li>Identify examples of how plants change their environments to meet their needs.</li> </ul> <p><b>ESS3.C: Human Impacts on Earth Systems</b></p> <ul style="list-style-type: none"> <li>Recognize that the way humans can affect the environment in which they live.</li> </ul>	<p><b>Systems and System Models</b></p> <p>With guidance and support from peers and adults, describe how plants affect other parts of their systems by changing their environments to meet their needs (e.g., roots push soil aside as they grow to better absorb water) and how animals (including humans) affect other parts of their systems by changing their environments to meet their needs (e.g., some animals store food for winter).</p>

Core Content Connectors (CCCs) linked to the  
2015 South Dakota Science Standards – Kindergarten

<b>K-ESS3 Earth and Human Activity</b>		
<b>K-ESS3-1.</b> Use a model to represent the relationship between the needs of different plants or animals (including humans) and the places they live.		
Science and Engineering Practices Core Content Connectors	Disciplinary Core Ideas Core Content Connectors	Crosscutting Concepts Core Content Connectors
<b>Developing and Using Models</b> With guidance and support from peers and adults, identify and describe the components of a model (e.g., representation, diagram, drawing, physical replica, diorama, dramatization, storyboard) to show the relationship between the needs of different plants and animals (including humans) and the places they live.	<b>ESS3.A: Natural Resources</b> <ul style="list-style-type: none"> <li>Given a model (e.g., representation, diagram, drawing), describe the relationship between the needs of different animals and the places they live (e.g., deer eat buds and leaves and live in forests).</li> </ul>	<b>Systems and System Models</b> With guidance and support from peers and adults, use a model to describe relationships between specific plants and animals and where they live (e.g., fish live in water environments, deer live in forests).

<b>K-ESS3 Earth and Human Activity</b>		
<b>K-ESS3-2.</b> Ask questions to obtain information about the purpose of weather forecasting to prepare for, and respond to, severe weather.		
Science and Engineering Practices Core Content Connectors	Disciplinary Core Ideas Core Content Connectors	Crosscutting Concepts Core Content Connectors
<b>Asking Questions and Defining Problems</b> With guidance and support from peers and adults, identify how weather patterns (e.g., some events are more likely in certain regions) help scientists predict severe weather before it happens.	<b>ESS3.B: Natural Hazards</b> <ul style="list-style-type: none"> <li>Identify how weather forecasting can help people avoid the most serious impacts of severe weather events.</li> </ul>	<b>Cause and Effect</b> With guidance and support from peers and adults, describe how weather forecasting can help people prepare for and respond to specific types of local weather (e.g., stay indoors during severe weather).

Core Content Connectors (CCCs) linked to the  
2015 South Dakota Science Standards – Kindergarten

<b>K-ESS3 Earth and Human Activity</b>		
<b>K-ESS3-3.</b> Communicate solutions that will reduce the impact of humans on the land, water, air, and/or other living things in the local environment.		
Science and Engineering Practices Core Content Connectors	Disciplinary Core Ideas Core Content Connectors	Crosscutting Concepts Core Content Connectors
<p><b>Obtaining, Evaluating, and Communicating Information</b></p> <p>With guidance and support from peers and adults, make observations of how people affect the land, water, air, and/or other living things in the local environment in positive and negative ways.</p>	<p><b>ESS3.C: Human Impacts on Earth Systems</b></p> <ul style="list-style-type: none"> <li>Identify different solutions that people can apply to the way they live to reduce the impact on the land, water, air, and other living things.</li> </ul>	<p><b>Cause and Effect</b></p> <p>With guidance and support from peers and adults, identify examples of choices that people can make to reduce negative impacts on the local environment.</p>

Core Content Connectors (CCCs) linked to the  
2015 South Dakota Science Standards – First Grade

**First Grade Physical Science Conceptual Understanding\*:**

Sound can make matter vibrate, and vibrating matter can make sound. Objects can be seen only when light is available to illuminate them. People use devices to send and receive information.

\* As stated in the 2015 South Dakota Science Standards.

<b>1-PS4 Waves and their Applications in Technologies for Information Transfer</b>		
<b>1-PS4-1.</b> Plan and carry out an investigation to provide evidence that vibrating materials can make sound and that sound can make materials vibrate.		
Science and Engineering Practices Core Content Connectors	Disciplinary Core Ideas Core Content Connectors	Crosscutting Concepts Core Content Connectors
<b>Planning and Carrying Out Investigations</b> With guidance and support from peers and adults, investigate and describe that sounds can cause materials to vibrate and vibrating materials can cause sounds.	<b>PS4.A: Wave Properties</b> <ul style="list-style-type: none"> <li>Recognize that sounds can cause materials to vibrate.</li> <li>Recognize that vibrating materials can make sound.</li> </ul>	<b>Cause and Effect</b> With guidance and support from peers and adults, identify a cause and effect relationship between sound and vibrating materials (i.e., vibrating materials can make sound and that sound can make materials vibrate).

<b>1-PS4 Waves and their Applications in Technologies for Information Transfer</b>		
<b>1-PS4-2.</b> Construct an evidence-based account for how objects can be seen only when illuminated.		
Science and Engineering Practices Core Content Connectors	Disciplinary Core Ideas Core Content Connectors	Crosscutting Concepts Core Content Connectors
<b>Constructing Explanations and Designing Solutions</b> With guidance and support from peers and adults, demonstrate and describe that if an object in the dark is lit (e.g., turning on a light in the dark space or from light the object itself gives off), it can be seen.	<b>PS4.B: Electromagnetic Radiation</b> <ul style="list-style-type: none"> <li>Recognize that objects can be seen only when illuminated by an external light source or when they give off their own light.</li> </ul>	<b>Cause and Effect</b> With guidance and support from peers and adults, connect the evidence to support the phenomenon that objects cannot be seen if there is no light to illuminate them, but the same object in the same space can be seen if a light source is introduced.

Core Content Connectors (CCCs) linked to the  
2015 South Dakota Science Standards – First Grade

<b>1-PS4 Waves and their Applications in Technologies for Information Transfer</b>		
<b>1-PS4-3.</b> Plan and carry out an investigation to determine the effect of placing objects made with different materials in the path of a beam of light.		
Science and Engineering Practices Core Content Connectors	Disciplinary Core Ideas Core Content Connectors	Crosscutting Concepts Core Content Connectors
<b>Constructing Explanations and Designing Solutions</b> With guidance and support from peers and adults, design and build a structure that reduces warming caused by the sun.	<b>PS4.B: Electromagnetic Radiation</b> <ul style="list-style-type: none"> <li>Recognize that some materials allow light to pass through them, others allow only some light through, and others block all the light.</li> </ul>	<b>Cause and Effect</b> With guidance and support from peers and adults, answer questions about what happens when objects made of different materials (e.g., clear plastic, clouded plastic, cardboard, or a mirror) are placed in the path of a beam of light.

<b>1-PS4 Waves and their Applications in Technologies for Information Transfer</b>		
<b>1-PS4-4.</b> Design and build a device that uses light or sound to solve the problem of communicating over a distance.		
Science and Engineering Practices Core Content Connectors	Disciplinary Core Ideas Core Content Connectors	Crosscutting Concepts Core Content Connectors
<b>Constructing Explanations and Designing Solutions</b> With guidance and support from peers and adults, describe, design, and build a device (e.g., light source to send signals, cups and string [telephone], or pattern of drum beats) that is able to send or receive information over a long distance.	<b>PS4.C: Information Technologies and Instrumentation</b> <ul style="list-style-type: none"> <li>Recognize features of devices that people use to send and receive information over long distances.</li> </ul>	<b>Influence of Engineering, Technology, and Science, on Society and the Natural World</b> With guidance and support from peers and adults, describe how communicating over long distances helps people.

Core Content Connectors (CCCs) linked to the  
*2015 South Dakota Science Standards – First Grade*

**First Grade Life Science Conceptual Understanding\*:**

Plants and animals use their external parts to help them survive, grow, and meet their needs. Behaviors of parents and offspring help the offspring survive. Animals sense and communicate information and respond to inputs with behaviors that help them grow and survive. Young plants and animals are similar to their parents.

\* As stated in the *2015 South Dakota Science Standards*.

<b>1-LS1 From Molecules to Organisms: Structures and Processes</b>		
<b>1-LS1-1.</b> Design a solution to a human problem by mimicking how plants and/or animals use their external parts to help them survive, grow, and meet their needs.		
Science and Engineering Practices Core Content Connectors	Disciplinary Core Ideas Core Content Connectors	Crosscutting Concepts Core Content Connectors
<b>Constructing Explanations and Designing Solutions</b> With guidance and support from peers and adults, identify and design a solution for human problems that can be solved by mimicking plant or animal solutions (e.g., a helmet to protect a bicyclist that mimics a turtle’s shell).	<b>LS1.A: Structure and Function</b> <ul style="list-style-type: none"> <li>Identify how animals use their external parts to help them survive, grow, and meet their needs.</li> <li>Identify how plants use their external parts to help them survive, grow, and meet their needs.</li> </ul>	<b>Structure and Function</b> With guidance and support from peers and adults, recognize that eyes and ears are related to their function of protecting animals by detecting danger.

Core Content Connectors (CCCs) linked to the  
2015 South Dakota Science Standards – First Grade

<b>1-LS1 From Molecules to Organisms: Structures and Processes</b>		
<b>1-LS1-2.</b> Read texts and use media to determine patterns in behavior of parents and offspring that help offspring survive.		
Science and Engineering Practices Core Content Connectors	Disciplinary Core Ideas Core Content Connectors	Crosscutting Concepts Core Content Connectors
<p><b>Obtaining, Evaluating, and Communicating Information</b></p> <p>With guidance and support from peers and adults, obtain information about behaviors of animal offspring that help the offspring survive (e.g., crying, chirping).</p>	<p><b>LS1.B: Growth and Development of Organisms</b></p> <ul style="list-style-type: none"> <li>Identify behaviors of offspring that help them survive.</li> <li>Identify behaviors between parents and offspring that help the offspring survive.</li> </ul>	<p><b>Patterns</b></p> <p>With guidance and support from peers and adults, describe the patterns of what animal parents and offspring do to help offspring survive (e.g., parents protect offspring when danger is present).</p>

<b>1-LS3 Heredity: Inheritance and Variation of Traits</b>		
<b>1-LS3-1.</b> Construct an evidence-based account that young plants and animals are like, but not exactly like, their parents.		
Science and Engineering Practices Core Content Connectors	Disciplinary Core Ideas Core Content Connectors	Crosscutting Concepts Core Content Connectors
<p><b>Constructing Explanations and Designing Solutions</b></p> <p>With guidance and support from peers and adults, make observations (i.e., evidence) of features of adult plants or animals (i.e., parents) and features of the offspring that have similar, but not identical features (e.g., size and shape of body parts, color and/or type of any hair, leaf shape, stem rigidity).</p>	<p><b>LS3.A: Inheritance of Traits</b></p> <ul style="list-style-type: none"> <li>Identify a similarity or a difference in an external feature (e.g., shape of leaves on plants or shape of ears on animals) between young plants and animals and their parents.</li> </ul>	<p><b>Patterns</b></p> <p>With guidance and support from peers and adults, identify patterns of similarities and differences in features between parents and offspring.</p>

Core Content Connectors (CCCs) linked to the  
2015 South Dakota Science Standards – First Grade

**First Grade Earth and Space Science Conceptual Understanding\*:**

Patterns of movements of the sun, moon, and stars, as seen from Earth, can be observed, described, and predicted.

\* As stated in the 2015 South Dakota Science Standards.

<b>1-ESS1 Earth’s Place in the Universe</b>		
<b>1-ESS1-1.</b> Use observations of the sun, moon, and stars to describe patterns that can be predicted.		
Science and Engineering Practices Core Content Connectors	Disciplinary Core Ideas Core Content Connectors	Crosscutting Concepts Core Content Connectors
<p><b>Analyzing and Interpreting Data</b></p> <p>With guidance and support from peers and adults, organize data from given observations (firsthand or from media), including objects visible in the sky during the day and night, the position of the sun in the sky at various times during the day, and the position of the moon in the sky at various times during the day or night.</p>	<p><b>ESS1.A: The Universe and its Stars</b></p> <ul style="list-style-type: none"> <li>• Describe patterns of movement of the sun, moon, and stars as seen from Earth.</li> <li>• Use patterns of movement to predict appearances of the sun or moon.</li> </ul>	<p><b>Patterns</b></p> <p>With guidance and support from peers and adults, use data from given observations (firsthand or from media), including objects visible in the sky during the day and night, the position of the sun in the sky at various times during the day, and the position of the moon in the sky at various times during the day or night, to describe patterns of objects visible in the sky during the day and night.</p>

Core Content Connectors (CCCs) linked to the  
2015 South Dakota Science Standards – First Grade

<b>1-ESS1 Earth’s Place in the Universe</b>		
<b>1-ESS1-2.</b> Make observations at different times of the year to relate the amount of daylight to the time of year.		
Science and Engineering Practices Core Content Connectors	Disciplinary Core Ideas Core Content Connectors	Crosscutting Concepts Core Content Connectors
<p><b>Planning and Carrying Out Investigations</b></p> <p>With guidance and support from peers and adults, collect data through observations (firsthand or from media) of relative length of the day (sunrise to sunset) for periods of time in a year.</p>	<p><b>ESS1.B: Earth and the Solar System</b></p> <ul style="list-style-type: none"> <li>• Make relative comparisons between the amount of daylight in the winter to the amount of daylight in the spring or fall.</li> </ul>	<p><b>Patterns</b></p> <p>With guidance and support from peers and adults, identify patterns of human behavior in regards to the relative length of daylight (sunrise to sunset) in relationship to the time of the year (e.g., whether it will be light or dark when waking in the morning, at breakfast, when having dinner, or going to bed at night).</p>

Core Content Connectors (CCCs) linked to the  
2015 South Dakota Science Standards – Second Grade

**Second Grade Physical Science Conceptual Understanding\*:**

Matter exists as different substances that have observably different properties. Different properties are suited to different purposes. Objects can be built up from smaller parts. Heating and cooling substances cause changes that are sometimes reversible and sometimes not.

\* As stated in the 2015 South Dakota Science Standards.

<b>2-PS1 Matter and its Interactions</b>		
<b>2-PS1-1.</b> Plan and carry out an investigation to describe and classify different kinds of materials by their observable properties.		
Science and Engineering Practices Core Content Connectors	Disciplinary Core Ideas Core Content Connectors	Crosscutting Concepts Core Content Connectors
<p><b>Planning and Carrying Out Investigations</b></p> <p>With guidance and support from peers and adults, use graphical displays (e.g., pictures, charts, graphs), to describe and organize materials by their properties (e.g., color, texture, hardness, flexibility, solid, or liquid).</p>	<p><b>PS1.A: Structure and Properties of Matter</b></p> <ul style="list-style-type: none"> <li>Classify different kinds of materials by their observable properties (e.g., color, texture).</li> </ul>	<p><b>Patterns</b></p> <p>With guidance and support from peers and adults, identify observable patterns in the properties of materials to classify the different kinds of materials.</p>

Core Content Connectors (CCCs) linked to the  
2015 South Dakota Science Standards – Second Grade

<b>2-PS1 Matter and its Interactions</b>		
<b>2-PS1-2.</b> Analyze data obtained from testing different materials to determine which materials have the properties that are best suited for an intended purpose.		
Science and Engineering Practices Core Content Connectors	Disciplinary Core Ideas Core Content Connectors	Crosscutting Concepts Core Content Connectors
<p><b>Analyzing and Interpreting Data</b></p> <p>With guidance and support from peers and adults, test materials then describe the relationship between the materials and their properties (e.g., metal is strong, paper is absorbent, rocks are hard, sandpaper is rough).</p>	<p><b>PS1.A: Structure and Properties of Matter</b></p> <ul style="list-style-type: none"> <li>Match a property of a material (e.g., hard, flexible, absorbent) to a potential purpose (e.g., hardness of a wooden shelf results in it being better suited for supporting materials than a soft sponge).</li> </ul>	<p><b>Cause and Effect</b></p> <p>With guidance and support from peers and adults, identify and describe relationships between properties of materials and some potential uses purpose (e.g., hardness is good for breaking objects or supporting objects; flexibility is good to keep a material from breaking).</p>

<b>2-PS1 Matter and its Interactions</b>		
<b>2-PS1-3.</b> Construct an evidence-based account of how an object made of a small set of pieces can be disassembled and made into a new object.		
Science and Engineering Practices Core Content Connectors	Disciplinary Core Ideas Core Content Connectors	Crosscutting Concepts Core Content Connectors
<p><b>Constructing Explanations and Designing Solutions</b></p> <p>With guidance and support from peers and adults, describe evidence from observations that an object made of a small set of pieces can be disassembled and made into a new object.</p>	<p><b>PS1.A: Structure and Properties of Matter</b></p> <ul style="list-style-type: none"> <li>Identify how a variety of objects can be built up from a small set of pieces.</li> </ul>	<p><b>Energy and Matter</b></p> <p>With guidance and support from peers and adults, support an explanation using evidence that different objects can be built from the same set of pieces.</p>

Core Content Connectors (CCCs) linked to the  
2015 South Dakota Science Standards – Second Grade

<b>2-PS1 Matter and its Interactions</b>		
<b>2-PS1-4.</b> Construct an argument using reasoning and evidence that some changes caused by heating or cooling can be reversed and some cannot.		
Science and Engineering Practices Core Content Connectors	Disciplinary Core Ideas Core Content Connectors	Crosscutting Concepts Core Content Connectors
<p><b>Engaging in Argument from Evidence</b></p> <p>With guidance and support from peers and adults, identify evidence that shows whether the change in the material after heating is reversible (e.g., water may become ice again, a cooked egg remains a solid, cookie dough that is baked does not return to its uncooked form when cooled) by engaging in argument.</p>	<p><b>PS1.B: Chemical Reactions</b></p> <ul style="list-style-type: none"> <li>• Identify examples of heating substances which cause changes that are sometimes reversible and sometimes not.</li> <li>• Identify examples of cooling substances which cause changes that are sometimes reversible and sometimes not.</li> </ul>	<p><b>Cause and Effect</b></p> <p>With guidance and support from peers and adults, identify and describe the relationship of changes caused by heating or cooling that can be reversed by cooling or heating (e.g., ice that is heated can melt into water, but the water can be cooled and can freeze back into ice [and vice versa]).</p>

Core Content Connectors (CCCs) linked to the  
2015 South Dakota Science Standards – Second Grade

**Second Grade Life Science Conceptual Understanding\*:**

Plants depend on water and light to grow, and also depend on animals for pollination or to move their seeds around. A range of different organisms live in different places.

\* As stated in the 2015 South Dakota Science Standards.

<b>2-LS2 Ecosystems: Interactions, Energy, and Dynamics</b>		
<b>2-LS2-1.</b> Plan and carry out an investigation to determine if plants need sunlight and water to grow.		
Science and Engineering Practices Core Content Connectors	Disciplinary Core Ideas Core Content Connectors	Crosscutting Concepts Core Content Connectors
<p><b>Planning and Carrying Out Investigations</b></p> <p>With guidance and support from peers and adults, collect data during an investigation about whether plants need sunlight and water to grow.</p>	<p><b>LS2.A: Interdependent Relationships in Ecosystems</b></p> <ul style="list-style-type: none"> <li>Recognize that plants need water and light to grow.</li> </ul>	<p><b>Cause and Effect</b></p> <p>With guidance and support from peers and adults, describe the effect on plant growth when withholding light but providing water, withholding water but providing light, or withholding both water and light.</p>

Core Content Connectors (CCCs) linked to the  
2015 South Dakota Science Standards – Second Grade

<b>2-LS2 Ecosystems: Interactions, Energy, and Dynamics</b>		
<b>2-LS2-2.</b> Develop a simple model that mimics the function of an animal in dispersing seeds or pollinating plants.		
Science and Engineering Practices Core Content Connectors	Disciplinary Core Ideas Core Content Connectors	Crosscutting Concepts Core Content Connectors
<p><b>Developing and Using Models</b></p> <p>With guidance and support from peers and adults, develop a simple model that mimics how plant and animal structures interact to move pollen or disperse seeds.</p>	<p><b>LS2.A: Interdependent Relationships in Ecosystems</b></p> <ul style="list-style-type: none"> <li>Recognize that plants need animals to move their seeds around.</li> </ul> <p><b>ETS1.B: Developing Possible Solutions</b></p> <ul style="list-style-type: none"> <li>Identify a simple model that mimics the function of an animal in dispersing seeds or pollinating plants.</li> </ul>	<p><b>Structure and Function</b></p> <p>With guidance and support from peers and adults, describe the relationships between components of a simple model that allows for movement of pollen or seeds.</p>

<b>2-LS4 Biological Evolution: Unity and Diversity</b>		
<b>2-LS4-1.</b> Make observations of plants and animals to compare the diversity of life in different habitats.		
Science and Engineering Practices Core Content Connectors	Disciplinary Core Ideas Core Content Connectors	Crosscutting Concepts Core Content Connectors

Core Content Connectors (CCCs) linked to the  
2015 South Dakota Science Standards – Third Grade

**Third Grade Life Science Conceptual Understanding\*:**

Reproduction is essential to every kind of organism. Organisms have unique and diverse life cycles. When the environment changes, some organisms survive and reproduce, some move to new locations, some move into the transformed environment, and some die. Being part of a group helps animals obtain food, defend themselves, and cope with changes. Different organisms vary in how they look and function because they have different inherited information; the environment also affects the traits that an organism develops. Some living organisms resemble organisms that once lived on Earth. Fossils provide evidence about the types of organisms and environments that existed long ago. Differences in characteristics between individuals of the same species provide advantages in surviving and reproducing. Particular organisms can only survive in particular environments. Populations of organisms live in a variety of habitats. Change in those habitats affects the organisms living there.

\* As stated in the 2015 South Dakota Science Standards.

<b>3-LS1 From Molecules to Organisms: Structures and Processes</b>		
<b>3-LS1-1.</b> Develop models to describe that organisms have unique and diverse life cycles but all have in common birth, growth, reproduction, and death.		
Science and Engineering Practices Core Content Connectors	Disciplinary Core Ideas Core Content Connectors	Crosscutting Concepts Core Content Connectors

**Fourth Grade Physical Science Conceptual Understanding\*:**

Moving objects contain energy. The faster the object moves, the more energy it has. Energy can be moved from place to place by moving objects, or through sound, light, heat, or electrical currents. Energy can be converted from one form to another form. When objects collide, energy is transferred through forces so as to change the objects' motions. Waves are regular patterns of motion which can be made in water by disturbing the surface. Waves of the same type can differ in amplitude and wavelength. Waves can make objects move. Objects can be seen when light reflected from their surface enters our eyes. Patterns can encode, send, receive, and decode information.

\* As stated in the 2015 South Dakota Science Standards.

<b>4-PS3 Energy</b>

**Fourth Grade Earth and Space Science Conceptual Understanding\*:**

Certain features on Earth can be used to order events that have occurred in a landscape. Four major Earth systems interact. Rainfall helps to shape the land and affects the types of living things found in a region. Water, ice, wind, organisms, and gravity break rocks, soils, and sediments into smaller pieces and move them around. Earth’s physical features occur in patterns, as do earthquakes and volcanoes. Maps can be used to locate features and determine patterns in those events. Energy and fuels that humans use are derived from natural sources and their use affects the environment. Some resources are renewable over time, others are not. A variety of hazards result from natural processes; humans cannot eliminate hazards but can reduce their impacts.

\* As stated in the 2015 South Dakota Science Standards.

<b>4-ESS1 Earth’s Place in the Universe</b>		
<b>4-ESS1-1.</b> Identify evidence from patterns in rock formations and fossils in rock layers to support an explanation for changes in a landscape over time.

2015 South Dakota Science Standards – Fifth Grade

**Fifth Grade Physical Science Conceptual Understanding\*:**

Because matter exists as particles that are too small to see, matter is always conserved even if it seems to disappear. Measurements of a variety of observable properties can be used to identify particular materials. Chemical reactions that occur when substances are mixed can be identified by the emergence of substances with different properties; the total mass of substances when a reaction occurs remains the same. Energy can be “produced,” “used,” or “released” by converting stored energy. Plants capture energy from sunlight, which can later be used as fuel or food.

\* As stated in the 2015 South Dakota Science Standards.

<b>5-PS1 Matter and Its Interactions</b>		
<b>5-PS1-1.</b> Develop a model to describe that matter is made of particles too small to be seen.

<p><b>Developing and Using Models</b></p> <p>With guidance and support from peers and adults, develop a model of the phenomena that movement of matter within an ecosystem is related to its key components (i.e., matter, plants, animals, decomposers, environment).</p>	<p><b>LS2.B: Cycles of Matter and Energy Transfer in Ecosystems</b></p> <p>Identify a model that shows the movement of matter (e.g., plant growth, eating, composting) through living things.</p>	<p><b>Systems and System Models</b></p> <p>With guidance and support from peers and adults, use the model to describe the relationship between organisms and the exchange of matter from and back into the environment.</p>

Core Content Connectors (CCCs) linked to the  
2015 South Dakota Science Standards – Fifth Grade

**Fifth Grade Earth and Space Science Conceptual Understanding\*:**

Stars range greatly in size and distance from Earth, and this can explain their relative brightness. Earth’s orbit and rotation and the orbit of the moon around Earth cause observable patterns, such as length and direction of shadows, day and night, and the seasonal appearance of some stars in the night sky. Four major Earth systems interact. Rainfall helps to shape the land and affects the types of living things found in a region. Water, ice, wind, organisms, and gravity break rocks, soils, and sediments into smaller pieces and move them around. The geosphere, biosphere, hydrosphere, and/or atmosphere interact. Most of Earth’s water is in the ocean and much of Earth’s fresh water is in glaciers or underground. Societal activities have had major effects on land, ocean, atmosphere, and even outer space. Societal activities can also help protect Earth’s resources and environments.

\* As stated in the 2015 South Dakota Science Standards.

<b>5-ESS1 Earth’s Place in the Universe</b>		
<b>5-ESS1-1.</b> Support an argument that differences in the apparent brightness of the sun compared to other stars is due to distances from the Earth.
