

Health Education Standards Public Comments

EXHIBIT #1

September 28, 2017

Mariah Nachreiner
Brandon Valley Middle School
Family and Consumer Science Teacher

I think there are some topics that have been changing and we need to make sure we are addressing. For example: Nutrition, food allergies, and sexuality. I am happy to see these topics will easily fall into some of the standards that are being proposed.

I do not see any issues with the proposed standards. I looked specifically at the 6-8th grade standards and they seem to be similar to the previous standards.

I am happy to be able to view/review the proposed standards as they are being revised. I think it is very important to continue to revise the standards as the topics I teach are constantly changing. In fact, some of the topics practically change each month. We need standards that support the direction society is moving.
