

August 21, 2014

The science standards work group noticed an error on the standards document which was posted on August 12, 2014. The concept is referenced in the Life Science Conceptual Understanding on page 15, but the standard itself was inadvertently not included. Therefore, the following standard has been added to the top of page 16 of the third grade standards.

3-LS3-2 Use evidence and reasoning to support the explanation that traits can be influenced by the environment. (SEP: 6; DCI: LS3.A, LS3.B; CCC: Cause/Effect)
