BACKGROUND

The South Dakota School Library Standards are based on the best practices from professional research available to date. The American Association of School Librarians (AASL), the International Society for Technology in Education (ISTE), and the Future Ready Librarian model were consulted in addition to the South Dakota Educational Technology Standards and the South Dakota English Language Arts Standards. The workgroup also reviewed relevant content standards from other states as well as various research processes and literacy models. Content standards provide educators a roadmap for what their students should know and be able to do. Standards are not curriculum and are not intended to be taught in isolation. The South Dakota School Library Standards are designed to be age-appropriate guides for successful student learning - learning which is differentiated, collaborative, and integrated across all content areas.

HOW TO READ THE STANDARDS

The South Dakota School Library Standards document is coded to cross-reference the Grade, the Content Area, the Strand, the Standard, and the Objective.

THE STRANDS

Each strand of proficiency broadly articulates the related standards/objectives. The three strands include:

- Textual Literacy (TL): Reading, Engagement, and Understanding
- Information Literacy (IL): Inquiry & Creation
- Civic & Ethical Literacy (CEL): Rights & Responsibilities

THE GRADE SPANS

These standards include student objectives for the following grade spans:

- Grades K through 2
- Grades 3 through 5
- Grades 6 through 8
- Grades 9 through 12

THE ORGANIZATION

These standards are displayed in two ways:

- by grade span progression
- by K-12 vertical progression
