

What if...

Updated 7/20/2020

What will happen if ...

A student or staff member is named as a close contact? (A close contact is defined as any individual who was within 6 feet of an infected person for at least 15 minutes starting from 2 days before illness onset.)

A DOH representative will contact all persons identified as close contacts (or the guardian if the contact is a minor.)

The close contact will be asked to quarantine for 14 days. This means to stay home, avoid contact with others, and not to share household items. Contacts will also be asked to monitor symptoms and temperature daily.

A student or staff member tests positive for COVID-19.

A DOH representative will contact the positive patient (or the patient's guardian if the patient is a minor.)

The positive COVID patient:

- Will be asked to self-isolate for 10 days
- When possible the patient will be asked to use a separate bedroom, bathroom from others in the household
- Must be fever free without fever-reducing medication for 24 hours prior to release from isolation
