Next, you will designate whether this FRN includes a Fiber or Wireless Request.

## Fiber Request Key Information

Does this FRN include a request for any of the following eligible broadband options?

- **Special construction.** One-time, upfront costs associated with building out leased lit fiber, leased dark fiber, or a self-provisioned network (i.e. special construction charges), or wireless service; and/or
- **Maintenance and operations.** Costs associated with the maintenance and operations for either a leased dark fiber or self-provisioned network; and/or
- **Network equipment.** Costs associated with the purchase of Network Equipment needed to make leased dark fiber or a self-provisioned network functional (e.g., modulating electronics and other equipment).

If any of the above apply, select “Yes” below.

Select “No” if you are only seeking support for the monthly recurring costs for either a leased lit fiber service or a leased dark fiber service (i.e., recurring payments on a dark fiber lease or IRU), or a wireless service.

### Notes:

- If you are seeking support for both the Special Construction, Maintenance and Operation, and/or Network Equipment as well as support for recurring costs associated with leased lit fiber, a dark fiber lease/IRU, or a wireless service then you create multiple FRNs. In each case, you will select a different answer to the Yes/No question based the specific services that are included in that FRN.
- If you select “Yes” below, you should create separate FRNs for special construction charges, maintenance and operations (M&O) charges, and Network Equipment charges. If charges for M&O and Network Equipment are bundled pursuant to a single contract for those products/services, you may use the Network Equipment/M&O FRN option.

**Monthly Recurring Cost:** This is the monthly amount charged by your service provider for each connection included in the Monthly Quantity field.

**Monthly Recurring Ineligible Costs:** Indicate any portion of the Monthly Recurring Costs that is not eligible for E-rate support.

**Monthly Recurring Eligible Costs:** This amount is calculated by removing the ineligible monthly recurring costs from the monthly cost charged by your service provider.

**Monthly Quantity:** This is the number of connections that have an associated monthly cost.

**Total Monthly Eligible Recurring Costs:** This amount is calculated by multiplying the Monthly Recurring Eligible Costs times the Monthly Quantity.

**Months of Service:** This was calculated based on the dates you entered on the FRN. If this FRN is based on a contract, this is the number of months between the Service Start Date and the Contract Expiration Date. If this FRN is either Tariff or Month-to-Month, this is the number of months between the Service Start Date and the Service End Date. In both cases, the number of months is always rounded up and cannot exceed 12 months.

**Total Monthly Eligible Recurring Costs:** This amount is calculated by multiplying the Total Monthly Eligible Recurring Costs times the Months of Service.

# Fiber Request Key Information

## Fiber Request Key Information

Does this FRN include a request for any of the following eligible broadband options?

- **Special construction.** One-time, upfront costs associated with building out leased lit fiber, leased dark fiber, or a self-provisioned network (i.e. special construction charges), or wireless service; and/or
- **Maintenance and operations.** Costs associated with the maintenance and operations for either a leased dark fiber or self-provisioned network; and/or
- **Network equipment.** Costs associated with the purchase of Network Equipment needed to make leased dark fiber or a self-provisioned network functional (e.g., modulating electronics and other equipment).

If any of the above apply, select "Yes" below.

Select "No" if you are only seeking support for the monthly recurring costs for either a leased lit fiber service or a leased dark fiber service (i.e., recurring payments on a dark fiber lease or IRU), or a wireless service.

Notes:

- If you are seeking support for both the Special Construction, Maintenance and Operation, and/or Network Equipment as well as support for recurring costs associated with leased lit fiber, a dark fiber lease or a wireless service then you create multiple FRNs. In each case, you will select a different answer to the Yes/No question based the specific services that are included in that FRN.
- If you select "Yes" below, you should create separate FRNs for special construction charges, maintenance and operations (M&O) charges, and Network Equipment charges. If charges for M&O and Network Equipment are bundled pursuant to a single contract for those products/services, you may use the Network Equipment/M&O FRN option.

YES  NO

Is this FRN supporting new or existing fiber for leased lit fiber, dark fiber, self-provisioned, or new or existing infrastructure for wireless service?

LIT FIBER  DARK FIBER  SELF-PROVISIONED  WIRELESS

Please remember to create a new FRN for the lit fiber service recurring charges. To access the FRN Line Item screen for lit fiber service recurring charges, select "No" when you receive the question, "Does this FRN include a request for dark fiber, a self-provisioned network, special construction costs to deploy new broadband networks, Network Equipment such as modulating electronics and other equipment necessary to make a broadband service functional, or maintenance and operation costs?"

Reminder to file separate FRN for recurring service charges for the fiber circuit.

Answer "Yes" to the question since this FRN is for special construction. Then select the kind of fiber or wireless that is being constructed.

# Fiber Request Key Information

## Fiber Request Key Information

Does this FRN include a request for any of the following eligible broadband options?

- **Special construction.** One-time, upfront costs associated with building out leased lit fiber, leased dark fiber, or a self-provisioned network (i.e. special construction charges), or wireless service; and/or
- **Maintenance and operations.** Costs associated with the maintenance and operations for either a leased dark fiber or self-provisioned network; and/or
- **Network equipment.** Costs associated with the purchase of Network Equipment needed to make leased dark fiber or a self-provisioned network functional (e.g., modulating electronics and other equipment).

If any of the above apply, select "Yes" below.

Select "No" if you are only seeking support for the monthly recurring costs for either a leased lit fiber service or a leased dark fiber service (i.e., recurring payments on a dark fiber lease or IRU), or a wireless service.

### Notes:

- If you are seeking support for both the Special Construction, Maintenance and Operation, and/or Network Equipment as well as support for recurring costs associated with leased lit fiber, a dark fiber lease/IRU, or a wireless service then you create multiple FRNs. In each case, you will select a different answer to the Yes/No question based the specific services that are included in that FRN.
- If you select "Yes" below, you should create separate FRNs for special construction charges, maintenance and operations (M&O) charges, and Network Equipment charges. If charges for M&O and Network Equipment are bundled pursuant to a single contract for those products/services, you may use the Network Equipment/M&O FRN option.
