* Graduation rate data for school year 2010-2011 is based on the four-year adjusted cohort graduation rate calculations.

Note: A gap for a particular year is the difference between the percentage of students proficient in the particular subject or graduating in the “all students” group and the percentage of students proficient in the subject or graduating in the indicated subgroup. A negative gap indicates that the subgroup is performing below the “all students” group; a positive gap indicates that the subgroup is performing above the all students group.
