General Supervision System:

The systems that are in place to ensure that IDEA Part B requirements are met, e.g., monitoring, dispute resolution, etc.

South Dakota has a variety of ways to ensure that IDEA Part B requirements are met.

South Dakota’s general supervision encompasses a review of local education agency (LEA) special education programs on a four year cycle. The review incorporates an analysis of compliance through State Performance Plan (SPP) indicators, state assessment accommodation verification, dispute resolution follow-up, and fiscal reviews.

South Dakota’s review cycle distributes LEAs and educational agencies over a four year period. Each LEA review includes a review of LEA child count data in comparison to state level reporting, Indicator 13 data collection, one-on-one teacher file reviews, verification of certification and highly qualified status of special education staff, and a representative file review across disability categories and age levels. If relevant to the LEA, a review may also include a review of private school eligibility and service plans, program purchases, extraordinary cost fund program file reviews, and other relevant areas.

LEAs may receive an on-site or off-site focused review. Focused reviews are generally related to a corrective action received from a complaint or due process. Monitoring team leaders review specific areas which were related to the issue in the complaint or due process hearing to verify continued correction. If the LEA’s performance on a SPP compliance indicator(s) did not meet target, then a focused review will occur to determine if there is a systemic issue.

If noncompliance has been identified, a finding in the form of a corrective action plan (CAP) including the specific noncompliance, the citation of the statute or regulation and/or the data supporting the conclusion is issued by Special Education Programs (SEP). The LEA will correct all areas of noncompliance as soon as possible, but no later than one year of the written notification by submitting supporting documentation for the correction of each individual case identified (Prong 1) as well as documentation of correction of the regulatory requirements (Prong 2) as required by the OSEP 09-02 Memorandum. Part of the corrective action may include targeted technical assistance overseen by SEP. Correction and compliance in conformance with the OSEP 09-02 Memorandum is verified by SEP.

Fiscal monitoring includes the review and approval of the application LEAs submit to the Department of Education (DOE) to apply for IDEA 611 and 619 funds. SEP reviews the application to ensure it meets program requirements. Once approved by the SEP program representative and assistant director, the Grants Management Office reviews the application to ensure the budget and program costs are aligned and allowable. Grants Management also verifies that the LEA has met Maintenance of Effort (MOE) requirements. Grants Management conducts a final review before sign off from the Grants Management and SEP Director.

When the DOE conducts a fiscal review of the IDEA 611 and 619 funds, the LEA submits their accounting records. Grants Management compares accounting records with reimbursement requests and the grant application for the IDEA Part B 611, IDEA Part B 619, coordinated early intervening services (CEIS), and private schools proportionate share. The following are reviewed:

- The DOE ensures, if the LEA utilized CEIS funds up to 15%, the funds are provided to non-identified students (not on an IEP) through fiscal review and special education monitoring review. The LEA separately tracks and accounts for IDEA funds used for CEIS in the accounting software.
- MOE is reviewed and a determination is made as to whether the LEA is in compliance or if MOE needs to be addressed.
- If the LEA has a private school, the DOE verifies the public LEA expended the required proportionate share indicated on the federal IDEA budget. If the LEA purchased equipment, the DOE verifies if it was an appropriate expenditure and the LEA maintained control over all IDEA funds, property, equipment, and supplies at the private school. Also, the DOE determines if the LEA used private school personnel to provide equitable services, services were performed outside of the regular duty hours and under the supervision of the public agency. Lastly, the DOE determines how the LEA identifies the private school expenses in their financial software.

The DOE does a fiscal cross-cutting and ensures the LEA is supplementing not supplanting their federal funds. DOE will check if the LEA generated any program income and checks time and effort documentation against the general ledger. If the LEA purchased equipment with federal funds, the DOE requests the property records and ensures that the equipment is reasonable and necessary to implement the IEP. During onsite monitoring, SEP confirms the item purchased has been appropriately labeled and inventoried according to the program requirements. The DOE identifies if there are adequate controls in place to ensure safeguarding and maintaining equipment (including a physical inventory reconciled at least every other year). The DOE verifies procurements are in place and if necessary collects documentation supporting vendor selection. If there are third party contractors, the DOE checks to see they are approved and monitored by the LEA.

Technical Assistance System:

The mechanisms that the State has in place to ensure the timely delivery of high quality, evidenced based technical assistance and support to LEAs.

SEP provides technical assistance to LEAs utilizing different methods to reach as many constituents as possible in the manner that best meets their needs.

Technical Assistance documents are developed to help clarify policies and procedures to ensure LEAs are able to implement the IDEA and state requirements. The documents are posted on the SEP webpage, shared with constituents at conferences and webinars and notices of availability are sent on the special education listserv. Monthly Special Education Director Webinars are held and recorded and posted for later reference to discuss upcoming data collections, provide TA on areas that have been identified through monitoring or complaints, and to provide updates on policies. SEP keeps open lines of communication with the LEAs through topical listservs and by assigning region representatives to ensure all constituents are able to access prompt, high quality technical support.

In order to provide topical and in-depth assistance, SEP utilizes contracted specialists, including but not limited to:

- Education Specialists are contracted through educational cooperatives to conduct on-site monitoring reviews. They also conduct regional trainings around Individual Education Plans and High School Transition for teachers, present at teacher preparation programs, and conduct trainings related to corrective action plans. Education Specialists are involved in the results driven accountability pilot project that began in 2017-2018 school year.
- The Transition Services Liaison Project (TSLP) focuses on high school transition. TSLP is a collaborative partnership between the DOE and Department of Human Services, Division of Rehabilitation Services. TSLP staff are regionally located. They make one-on-one connections with high school special education teachers and personnel. They assist by providing technical assistance in writing compliant Individual Education Plans (IEP), assist in locating resources for evidence based practices, and link adult agencies with LEA personnel, students and families.
- Multi-Tiered System of Supports (MTSS) Coordinators work directly with LEAs to implement a continuous-improvement framework in which data-based problem solving and decision making are practiced across all levels of the educational system for supporting students. The coordinators are trained in Response to Intervention (RtI) and Positive Behavioral Interventions and Supports (PBIS) processes.
- Educational cooperatives and the Center for Disabilities provide specialized training and technical assistance in regional areas and on areas of statewide need identified through monitoring and LEA input.
- The Navigator Program is contracted through South Dakota Parent Connection. The Navigator Program staff serves as an objective and neutral party which assists parents and school personnel to locate and utilize information, improve communication, build or re-build partnerships and make progress towards agreement.

Professional Development System:

The mechanisms the State has in place to ensure that service providers have the skills to effectively provide services that improve results for students with disabilities.

Professional development is provided in a variety of ways due to South Dakota's large area and rural nature. South Dakota has 77,121 square miles and of the 150 LEAs, 33 have enrollment of less than 200, 77 LEAs have enrollment between 201 and 600, and 40 LEAs have enrollment of 600 plus. State, regional and webinar trainings allow LEA staff to have access to appropriate professional development. Contractors are hired to provide direct technical assistance in the LEA. SEP professional development revolves around data collection, IEP process, behavior, response to intervention, instructional coaching and other pertinent areas identified through monitoring, LEA input, and input from the stakeholder groups including the South Dakota Advisory Panel for Children with Disabilities and South Dakota Parent Connection.

IEP process workshops are held every fall across South Dakota. The format of the workshops were revamped in the fall of 2017 to better meet district needs. This year SEP offered 8 sets of IEP workshops with the option to attend 1 or more sessions. The day one option targeted new special education staff and covered the IEP process from referral, evaluation, eligibility to IEP development. Day two covered focused topics related to issues that the SEP identified as areas of concern statewide based on accountability review data. Day three focused on the high school transition and IEP processes.

A Special Education newsletter is distributed each month on the listserv and posted to the web. The newsletter includes SEP highlights, federal updates, the agenda for the monthly Special Education Director Webinar, and features on a general and special education program area. The newsletter includes professional development opportunities available for teachers and administrators. A Special Education Director Webinar is held every third Tuesday of the month and is recorded for viewing later at <http://www.doe.sd.gov/oess/speddirectors.aspx>. The webinars inform special education directors and other interested parties about information and changes at the federal and state level, initiatives, data collection, and other DOE information.

SEP partners with The Center for Technical Assistance for Excellence in Special Education (TAESE) to offer webinar trainings on specialized topics and the recordings are placed on the web. Examples of topics include challenges in evaluating, classifying and programming for English learners, individual health plans, prior written notice, transportation, surrogate parents, Who is the Parent?, accommodations, legal updates and discipline. A new special education director webinar series is conducted each year targeting five areas of general supervision including the state performance plan, budget and fiscal, dispute resolution, accountability, and child count. All webinar recordings are posted at <http://www.doe.sd.gov/oess/SPED-webinars.aspx>.

Face to face trainings occur regionally around the state. Trainings span a variety of topics, including but not limited to discipline, early childhood, writing effective behavior plans, writing standards based IEPs, facilitation of IEP meetings, transition training, parental engagement and connecting with youth, and instructional strategies.

SEP sponsors speakers at conferences of partnering organizations, focusing on meeting the needs of students with disabilities including the Youth Leadership Forum, Early Childhood conference, and SD Speech and Language Pathologist Association conference. SEP hosts two major conferences each year, one 7/12/2018

FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

targets special education professionals and one targets all educators with a focus on making learning accessible for all students.

Entities, such as the Center for Disabilities and the Augmentative and Alternative Communication Workgroup, conduct technical assistance through Skype, Facetime, and other avenues in order to provide more frequent and timely feedback to individuals after face to face trainings or for targeted technical assistance.

By utilizing a diverse range of technical assistance delivery methods and platforms, SEP ensures access to timely and high quality professional development for all stakeholders statewide.

Stakeholder Involvement: apply this to all Part B results indicators

The mechanism for soliciting broad stakeholder input on targets in the SPP, including revisions to targets.

SEP selects broad stakeholder representation across South Dakota. Stakeholder groups include cross department representation as well as representation from special education administrators, superintendents and building principals. Teachers, both general and special education are included in stakeholder groups. South Dakota Parent Connection staff, professors, parents, educational cooperative staff, advisory panel members and contractors are also included on stakeholder teams. SEP ensures a representative sample across the state including different geographic areas and LEA enrollment size in order to adequately represent the diversity in South Dakota.

SEP staff collaborates across departments throughout the DOE. All nine staff are integrated and assist other offices in the implementation of regulations and strategies to improve results. DOE participates in cross stakeholder meetings, DOE strategic planning, and other projects.

Once the stakeholder group has made recommendations, the proposed decisions are shared with the South Dakota Advisory Panel for Children with Disabilities and on Special Education Director Webinars for additional input. The Special Education Director Webinars have approximately 60 live participants and many listen to the recording located on the SEP website.

Stakeholder groups met related to the SPP/APR and SSIP on March 8 and October 24, 2017. Input was sought from the South Dakota Advisory Panel for Children with Disabilities at the January 16, 2018 meeting.

Reporting to the Public:

How and where the State reported to the public on the FFY 2015 performance of each LEA located in the State on the targets in the SPP/APR as soon as practicable, but no later than 120 days following the State's submission of its FFY 2015 APR, as required by 34 CFR §300.602(b)(1)(i)(A); and a description of where, on its Web site, a complete copy of the State's SPP, including any revision if the State has revised the SPP that it submitted with its FFY 2015 APR in 2017, is available.

Following the submission of the SPP and APR to the U.S. Department of Education, SEP disseminated the FFY 2015 SPP and APR, and LEA information in the following ways:

- Posted the final version and SPP, APR, LEA information and 618 tables on the agency website at <http://doe.sd.gov/sped/SPP.aspx>
- Public Notices were published in the five (5) major South Dakota newspapers notifying the public of the website <http://doe.sd.gov/sped/SPP.aspx> where the SPP and APR can be accessed. Hard copies of the reports were available upon request.

The SEA disseminated the information by:

- Alerting constituency groups via existing listservs, email and workshops.
- SEP program staff presented FFY 2015 APR to the South Dakota Advisory Panel for Children with Disabilities in January 2017 and on the monthly Special Education Director webinar in February 2017.
- South Dakota Parent Connection announced publication of the FFY 2015 SPP and APR on the SEP website in their newsletter and weekly update so parents know how to access it.
- Electronic copies were available to all South Dakota Advisory Panel for Children with Disabilities members.
- Individuals with disabilities may obtain this document in an alternative format (e.g., Braille, large print, hard copy, or digital) on request to the South Dakota Department of Education, Special Education Programs at:

South Dakota Department of Education
 Attn: Special Education Programs
 800 Governor's Drive
 Pierre, SD 57501-2294

SEP publicly reports at the LEA level on the required indicators as soon as practicable, but no later than 120 days following the State's submission of its APR each year. Public reporting information on the State 618 data tables are available for those federal data tables that have been released. Access of this information can be found on the SEP website at the following link: <http://doe.sd.gov/oess/sped-SPP.aspx>.

Actions required in FFY 2015 response

OSEP Response

States were instructed to submit Phase III Year Two of the State Systemic Improvement Plan (SSIP) by April 2, 2018. The State provided the required information.

In the FFY 2017 APR, the State must report FFY data for the State-identified Measurable Result (SIMR). Additionally, the State must, consistent with its evaluation plan described in Phase II, assess and report on its progress implementing the SSIP. Specifically, the State must provide: (1) a narrative or graphic representation of the principal activities; (2) measures and outcomes that were implemented since the State's last SSIP submission (i.e., April 2, 2018); and (3) a summary of the infrastructure improvement strategies and evidence-based practices that were implemented and progress toward short- and long-term outcomes that are intended to impact the SIMR.

Required Actions

Graduation Conditions

Choose the length of Adjusted Cohort Graduation Rate your state is using: 4-year ACGR

Provide a narrative that describes the conditions youth must meet in order to graduate with a regular high school diploma and, if different, the conditions that youth with IEPs must meet in order to graduate with a regular high school diploma. If there is a difference, explain.

South Dakota has one diploma. The minimum requirements for receiving a diploma are established by SDCL 13-33-19.

A Personal Learning Plan is required for every student in grades 9 through 12 and each student's plan must document a minimum of 22 credits that include the following:

FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

1) Four units of Language Arts – must include:

- a. Writing – 1.5 units
- b. Literature – 1.5 units (must include .5 unit of American Literature)
- c. Speech or Debate – .5 unit
- d. Language Arts elective – .5 unit

2) Three units of Mathematics – must include:

- a. Algebra I – 1 unit
- b. *Algebra II – 1 unit
- c. *Geometry – 1 unit

3) Three units of Lab Science – must include:

- a. Biology – 1 unit
- b. Any Physical Science – 1 unit
- c. *Chemistry or Physics – 1 unit

4) Three units of Social Studies – must include:

- a. U.S. History – 1 unit
- b. U.S. Government – .5 unit
- c. World History – .5 unit
- d. Geography – .5 unit

5) One unit of the following-any combination:

- a. Approved Career & Technical Education
- b. Capstone Experience or Service Learning
- c. World Language

6) One unit of Fine Arts

7) One-half unit of Personal Finance or Economics

8) One-half unit of Physical Education

9) One-half unit of Health or Health Integration

Academic core content credit may be earned by completing an approved career and technical education course. Approval to offer credit must be obtained through an application process with the Department of Education. The application must include: course syllabus; standards based curriculum; teacher certification; and assessment of standards by methods including end-of-course exams, authentic assessment, project-based learning or rubrics.

*With school and parent/guardian approval, a student may be excused from this course in favor of a more appropriate course. A student may be excused from Algebra II or Geometry, but not both. A student is still required to take three units of Math. If a student is excused from Chemistry or Physics, the student must still take three units of Lab Science.

With regards to the health requirement: Beginning with students who are freshmen in the fall of 2013, students will be required to take .5 unit of health at any time grades 6-12. A LEA may choose to integrate health across the curriculum at the middle or high school level in lieu of a stand-alone course.

Local decision: A LEA may decide to offer credit for extracurricular Fine Arts activities. Students may be granted up to one credit in Fine Arts for participation in extracurricular activities. A maximum of ¼ credit may be granted for each activity in each school year.

The IEP team has the authority to modify the specific credits required for graduation. The IEP team must take into consideration the student's postsecondary goals along with the nature of the student's disability, which prevents the student from accessing the same curriculum with accommodations and supports.

Are the conditions that youth with IEPs must meet to graduate with a regular high school diploma different from the conditions noted above? No

Provide additional information about this indicator (optional)

DOE has specific special education exit codes to differentiate students on an IEP that have graduated with a diploma and met the same requirements as all students and for those that have had their course requirements modified by the IEP team.

Targets: Description of Stakeholder Input

No changes to targets were made for FFY 2016.

Please indicate whether you are reporting using Option 1 or Option 2.

- Option 1
- Option 2

Has your State made or proposes to make changes to the data source under Option 2 when compared to the information reported in its FFY 2010 SPP/APR submitted on February 1, 2012? No

FFY 2016 SPP/APR Data

Number of youth with IEPs who exited special education due to dropping out	Number of youth ages 14-21 on December 1 child count	FFY 2015 Data*	FFY 2016 Target*	FFY 2016 Data
154	4,991	3.03%	2.80%	3.09%

Use a different calculation methodology

- Change numerator description in data table
- Change denominator description in data table

Please explain the methodology used to calculate the numbers entered above.

South Dakota calculates dropout percentage based upon the number of students on IEPs ages 14-21 who dropped out divided by the number of students with disabilities on child count age 14-21. The calculation represents the percentage of students on IEPs who dropped on a yearly basis.

Provide a narrative that describes what counts as dropping out for all youth.

A dropout is defined as a student that:

- 1) Was enrolled in school at some time during the school year;

FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

- 2) Was not enrolled on the last day of school;
- 3) Has not graduated from high school or completed a state approved program;
- 4) Does not meet any of the following exclusionary conditions:
 - o Transfer to another accredited education program,
 - o Temporary absence due to suspension or illness,
 - o Excused from public school attendance (SDCL 13-27-3),
 - o Death
- 5) A student who has moved and is not known to continue in another district.

Is there a difference in what counts as dropping out for youth with IEPs? No

Actions required in FFY 2015 response

none

FFY 2016 SPP/APR Data: Reading Assessment

Group Name	Children with IEPs who received a valid score and a proficiency was assigned	Number of Children with IEPs Proficient	FFY 2015 Data*	FFY 2016 Target*	FFY 2016 Data
A Overall	10,284	1,917	20.45%	32.59%	18.64%

Reasons for Group A Slippage

South Dakota reviewed the last three years of data. All student data showed a decrease in the 2016-2017 English Language Arts (ELA) proficiency rates but rates were higher than the baseline year three years ago. When data was broken down by school level, high school students with disabilities are steadily increasing each year.

Indicator 4A: Suspension/Expulsion**

Monitoring Priority: FAPE in the LRE

Results indicator: Rates of suspension and expulsion:

- A. Percent of districts that have a significant discrepancy in the rate of suspensions and expulsions of greater than 10 days in a school year for children with IEPs; and
- B. Percent of districts that have: (a) a significant discrepancy, by race or ethnicity, in the rate of suspensions and expulsions of greater than 10 days in a school year for children with IEPs; and (b) policies, procedures or practices that contribute to the significant discrepancy and do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards.

Explanation of Changes

Due to modifications in reporting that have changed the way SD calculates significant disproportionately for suspension and expulsion, SD's suspension and expulsion stakeholders group looked at the current formula for figuring the state target and reconfigured the percentage based on the change to the current denominator. SD's previous denominator for this indicator was the total number of districts in the state. That has been changed to include only districts that meet the minimum N of 10.

Targets: Description of Stakeholder Input

A stakeholders group was brought together on April 27, 2018 to discuss changing the targets for 4A. In past years, South Dakota has used the total number of districts in the state as the denominator when determining the percentage of districts in the state that have suspended 5% or greater of their special education students for greater than ten days. A change has been made that will change the denominator to only the districts that meet the minimum N size of 10. In SD, this changes the size of the denominator from approximately 150 districts each year to approximately 3, depending on the amount of districts meet the minimum N of 10. The stakeholder group worked to reset the targets to accommodate this change. The previous target allowed for up to one district to not meet the target and the stakeholder group chose to reset the target with the new baseline to continue to allow up to one district to not meet the target.

FFY 2016 SPP/APR Data

Has the State Established a minimum n-size requirement? Yes No

The State may only include, in both the numerator and the denominator, districts that met the State-established n size. Report the number of districts excluded from the calculation as a result of the requirement. 147

Number of districts that have a significant discrepancy	Number of districts that met the State's minimum n-size	FFY 2015 Data*	FFY 2016 Target*	FFY 2016 Data
0	3	0.67%	33.33%	0%

Choose one of the following comparison methodologies to determine whether significant discrepancies are occurring (34 CFR §300.170(a)):

- Compare the rates of suspensions and expulsions of greater than 10 days in a school year for children with IEPs among LEAs in the State
- The rates of suspensions and expulsions of greater than 10 days in a school year for children with IEPs in each LEA compared to the rates for nondisabled children in the same LEA

State's definition of "significant discrepancy" and methodology

FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

South Dakota's definition of significant discrepancy for Part A means more than 5% of the unduplicated students with disabilities at the LEA level with 10 or more students included in the numerator and the LEA child count included in the denominator. South Dakota chose this option for analyzing suspension data because the South Dakota Department of Education does not collect data on suspensions of students who are not on IEPs in a format that allows a comparison between the two groups.

$$\frac{\text{IEP students suspended or expelled at the LEA >than 10 days in a school year}}{\text{Child Count at the LEA}} \times 100 = \%$$

Significant Discrepancy: If greater than 5% of the LEA child count population have been suspended for >10 days.

For Indicator 4A, 20 LEAs had students suspended for >10 days. Of those 20 LEAs, 3 met the minimum N size of 10 students suspended. Of those three LEA's, 0 had a significant discrepancy for students suspended for >10 days.

Actions required in FFY 2015 response

none

Note: Any actions required in last year's response table that are related to correction of findings should be responded to on the "Correction of Previous Findings of Noncompliance" page of this indicator. If your State's only actions required in last year's response are related to findings of noncompliance, a text field will not be displayed on this page.

FFY 2015 Identification of Noncompliance

Review of Policies, Procedures, and Practices (completed in FFY 2016 using 2015-2016 data)

Provide a description of the review of policies, procedures, and practices relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards.

20 LEAs reported suspending one or more students for greater than ten days. Of these LEAs three met the minimum n-size for removals and of those three, none had suspended over 5% of their special education students for greater than 10 days and therefore were not required to have a review of policies, procedures, and practices.

- The State DID NOT identify noncompliance with Part B requirements as a result of the review required by 34 CFR §300.170(b)
- The State DID identify noncompliance with Part B requirements as a result of the review required by 34 CFR §300.170(b). If YES, select one of the following:

Correction of Findings of Noncompliance Identified in FFY 2015

Findings of Noncompliance Identified	Findings of Noncompliance Verified as Corrected Within One Year	Findings of Noncompliance Subsequently Corrected	Findings Not Yet Verified as Corrected
0	0	0	0

OSEP Response

The State has revised the baseline for this indicator, using data from FFY 2016, and OSEP accepts that revision.

Required Actions

Targets: Description of Stakeholder Input

There were no changes to the targets FFY 2016.

FFY 2016 SPP/APR Data

Number of preschool children aged 3 through 5 with IEPs assessed	820.00
--	--------

Outcome A: Positive social-emotional skills (including social relationships)

FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

	Number of Children	Percentage of Children
a. Preschool children who did not improve functioning	0.00	
b. Preschool children who improved functioning but not sufficient to move nearer to functioning comparable to same-aged peers	74.00	9.02%
c. Preschool children who improved functioning to a level nearer to same-aged peers but did not reach it	74.00	9.02%
d. Preschool children who improved functioning to reach a level comparable to same-aged peers	113.00	13.78%
e. Preschool children who maintained functioning at a level comparable to same-aged peers	559.00	68.17%

	Numerator	Denominator	FFY 2015 Data*	FFY 2016 Target*	FFY 2016 Data
A1. Of those preschool children who entered or exited the preschool program below age expectations in Outcome A, the percent who substantially increased their rate of growth by the time they turned 6 years of age or exited the program. (c+d)/(a+b+c+d)	187.00	261.00	75.86%	79.15%	71.65%
A2. The percent of preschool children who were functioning within age expectations in Outcome A by the time they turned 6 years of age or exited the program. (d+e)/(a+b+c+d+e)	672.00	820.00	84.62%	84.15%	81.95%

Reasons for A1 Slippage

In FFY 2015-2016, the percentage of students showing growth was at 75.86%. In FFY 2016-2017 it was 71.65%. This difference has a p-value of .06 (which is not statistically significant). If 10 of the students who scored "b" would have scored "c" the percentage showing growth would have been 75.48% which would make it comparable to FFY 2015-2016. When looking at districts whose score's decreased from FFY 2015-2016 to FFY 2016-2017, there are only 11 districts that needed to have had one or more students show growth, within summary statement 1, comparable to FFY 2015-2016. Of the 11 districts, one needed to have four additional students show growth, two needed to have two additional students show growth, and the remaining eight districts needed one additional student show growth.

Reasons for A2 Slippage

The difference in the percentage of children who exited at age level in FFY 2016-2017 is not significantly different from the percentage who exited at age level in FFY 2015-2016. If 20 students would have moved from categories "b" or "c" to "d" in FFY 2016-2017, the percent would have been the same as in FFY 2015-2016. When looking at districts whose score's decreased from FFY 2015-2016 to FFY 2016-2017, there are only nine districts that needed to have had two or more students demonstrating skills at age level, within summary statement 2, comparable to FFY 2015-2016. Of the nine districts, four needed to have had three or more students demonstrating skills at age level.

Outcome B: Acquisition and use of knowledge and skills (including early language/communication)

	Number of Children	Percentage of Children
a. Preschool children who did not improve functioning	0.00	
b. Preschool children who improved functioning but not sufficient to move nearer to functioning comparable to same-aged peers	172.00	20.98%
c. Preschool children who improved functioning to a level nearer to same-aged peers but did not reach it	161.00	19.63%
d. Preschool children who improved functioning to reach a level comparable to same-aged peers	204.00	24.88%
e. Preschool children who maintained functioning at a level comparable to same-aged peers	283.00	34.51%

	Numerator	Denominator	FFY 2015 Data*	FFY 2016 Target*	FFY 2016 Data
B1. Of those preschool children who entered or exited the preschool program below age expectations in Outcome B, the percent who substantially increased their rate of growth by the time they turned 6 years of age or exited the program. (c+d)/(a+b+c+d)	365.00	537.00	66.85%	67.50%	67.97%
B2. The percent of preschool children who were functioning within age expectations in Outcome B by the time they turned 6 years of age or exited the program. (d+e)/(a+b+c+d+e)	487.00	820.00	56.28%	55.96%	59.39%

Outcome C: Use of appropriate behaviors to meet their needs

	Number of Children	Percentage of Children
a. Preschool children who did not improve functioning	0.00	
b. Preschool children who improved functioning but not sufficient to move nearer to functioning comparable to same-aged peers	117.00	14.27%
c. Preschool children who improved functioning to a level nearer to same-aged peers but did not reach it	106.00	12.93%
d. Preschool children who improved functioning to reach a level comparable to same-aged peers	154.00	18.78%
e. Preschool children who maintained functioning at a level comparable to same-aged peers	443.00	54.02%

	Numerator	Denominator	FFY 2015 Data*	FFY 2016 Target*	FFY 2016 Data
C1. Of those preschool children who entered or exited the preschool program below age expectations in Outcome C, the percent who substantially increased their rate of growth by the time they turned 6	260.00	377.00	69.83%	70.10%	68.97%

FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

	Numerator	Denominator	FFY 2015 Data*	FFY 2016 Target*	FFY 2016 Data
years of age or exited the program. (c+d)/(a+b+c+d)					
C2. The percent of preschool children who were functioning within age expectations in Outcome C by the time they turned 6 years of age or exited the program. (d+e)/(a+b+c+d+e)	597.00	820.00	73.46%	72.10%	72.80%

Does the State include in the numerator and denominator only children who received special education and related services for at least six months during the age span of three through five years? Yes

Was sampling used? No

Did you use the Early Childhood Outcomes Center (ECO) Child Outcomes Summary (COS) process? No
Provide the criteria for defining "comparable to same-aged peers."

South Dakota defined "comparable to same-age peers" as any child who received a standard score of -1.27 or above the norm on the Battelle Developmental Inventory II (BDI-2) scoring chart. This corresponds to the 10th percentile rank on the BDI-2 for a given outcome area.

List the instruments and procedures used to gather data for this indicator.

The BDI-2 is used to gather data for this indicator. When a child exits the Part C program and transitions to Part B (619) and exit BDI-2 is administered in the areas of cognitive, physical, communication, social-emotional, and adaptive development. The exit data for Part C becomes the baseline data for children who become eligible for Part B (619). Children who enter the Part B (619) system after the age 3 will be tested using the BDI-2 in the areas of development listed previously to establish a baseline. Upon exiting the 619 program the BDI-2 will be administered in the same 5 areas of development. The baseline entry scores will be compared to the exit scores in the 5 areas of development evaluated to determine progress in the three indicator outcome areas.

Targets: Description of Stakeholder Input

No changes to targets were made for FFY 2016.

FFY 2016 SPP/APR Data

Number of respondent parents who report schools facilitated parent involvement as a means of improving services and results for children with disabilities	Total number of respondent parents of children with disabilities	FFY 2015 Data*	FFY 2016 Target*	FFY 2016 Data
5821.00	6869.00	84.35%	78.00%	84.74%

The number of parents to whom the surveys were distributed.	37.34%	18398.00
---	--------	----------

The percentage shown is the number of respondent parents divided by the number of parents to whom the survey was distributed.

Since the State did not report preschool children separately, discuss the procedures used to combine data from school age and preschool surveys in a manner that is valid and reliable.

Parents of all students with disabilities ages 3-21 are given an opportunity to complete the survey. As in previous years, in FFY 2016, the survey was given to parents at the annual IEP meeting, parent-teacher conferences, and community dinners; it could also be sent via mail or completed online. This personalized distribution method ensured all parents received the survey; furthermore, school staff members personally encourage the parents to complete the survey.

The demographics of the parents responding are representative of the demographics of children receiving special education services. Yes

Describe the strategies the State will use to ensure that in the future the response data are representative of those demographics.

Include the State's analyses of the extent to which the demographics of the parents responding are representative of the demographics of children receiving special education services.

The representativeness of the surveys was assessed by examining the demographic characteristics of the children reported on the parent survey and the demographic characteristics of all special education students. This comparison indicates the results are representative (1) by geographic region where the child

FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

attends school; (2) by the race/ethnicity of the child; (3) by the grade level of the child; and (4) by the primary disability of the child. For example, 15% of the parents who returned a survey indicated that their children are Native American, and 15% of students with disabilities in the population are Native American. Another example: 31% of the parents who returned a survey are a parent of a child with a specific learning disability, and 34% of students with disabilities in the population have a specific learning disability. However, results indicated that parents of students with disabilities at the larger districts are less likely to respond than parents of students with disabilities at smaller districts. 68% of the parents who returned a survey are from a large district whereas 78% of students with disabilities are from large districts. (Large districts are defined as an enrollment of more than 600 students.) DOE will reach out to large districts and encourage them to examine their survey distribution processes so that their parents are encouraged to complete the survey to the fullest extent possible. SEP reviews the data to identify districts with 0 response rates and requires the district to submit procedures on how they will increase their return response rates.

Was sampling used? No

Describe the sampling methodology outlining how the design will yield valid and reliable estimates.

Was a survey used? Yes

Is it a new or revised survey? No

FFY 2016 SPP/APR Data

Has the State Established a minimum n-size requirement? Yes No

The State may only include, in both the numerator and the denominator, districts that met the State-established n and/or cell size. Report the number of districts totally excluded from the calculation as a result of the requirement because the district did not meet the minimum n and/or cell size. 119

Number of districts with disproportionate representation of racial and ethnic groups in special education and related services	Number of districts with disproportionate representation of racial and ethnic groups in special education and related services that is the result of inappropriate identification	Number of districts that met the State's minimum n-size	FFY 2015 Data*	FFY 2016 Target*	FFY 2016 Data
0	0	31	0%	0%	0%

Were all races and ethnicities included in the review? Yes No

Define “disproportionate representation.” Please specify in your definition: 1) the calculation method(s) being used (i.e., risk ratio, weighted risk ratio, e-formula, etc.); and 2) the threshold at which disproportionate representation is identified. Also include, as appropriate, 3) the number of years of data used in the calculation; and 4) any minimum cell and/or n-sizes (i.e., risk numerator and/or risk denominator).

South Dakota collects data for Indicator 9 through the state December 1 child count and Fall Enrollment collected on the last Friday in September. A Weighted Risk Ratio based on the identification rate for each racial/ethnic group at each LEA is calculated yearly; thus, all data for all racial/ethnic groups in the State are examined. A **Weighted Risk Ratio** is determined only if there are 20 or more students in the (**cell size**) of interest (based on child count data) and if there are also 20 or more students in the (**n-size**) comparison group. South Dakota uses **one year data** in the calculation.

Disproportionate representation is defined as a Weighted Risk Ratio of 3.00 and above (over-representation). Once a ratio is flagged for numerical disproportionate representation, the policies and procedures of that LEA are reviewed to determine if the disproportionate representation is due to inappropriate identification.

For Indicator 9, all of South Dakota’s 150 LEAs are included in the analysis. Of these 150 LEAs, 31 met the minimum n-size requirements at least one time for a Final Risk Ratio to be calculated (for each LEA, in theory, seven risk ratios could be calculated—one for each racial/ethnic group). Please note that many LEAs in South Dakota have fewer than five students with a disability of a particular race/ethnicity. Thus, very small numbers prevent SEP from calculating reliable and meaningful risk ratios for every racial/ethnic group in every LEA.

Describe how the State made its annual determination as to whether the disproportionate representation it identified of racial and ethnic groups in special education and related services was the result of inappropriate identification.

When a district meets the methodology for disproportionality, Special Education Programs conducts an on-site review. The district will provide special education files across disability categories based on race/ethnicity. On-site team reviews the policy and procedures in the identification. They compare it to the

FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

policy and procedures followed by race/ethnicity identified as disproportionate and other race/ethnicity in same disability categories.

If the district followed appropriate policy and procedures for disability categories and race/ethnicity groups, the district is identified as having appropriate identification procedures. If policy and procedures were not appropriately followed, then the district would receive a CAP.

Has the State Established a minimum n-size requirement? Yes No

The State may only include, in both the numerator and the denominator, districts that met the State-established n and/or cell size. Report the number of districts totally excluded from the calculation as a result of the requirement because the district did not meet the minimum n and/or cell size. 135

Number of districts with disproportionate representation of racial and ethnic groups in specific disability categories	Number of districts with disproportionate representation of racial and ethnic groups in specific disability categories that is the result of inappropriate identification	Number of districts that met the State's minimum n-size	FFY 2015 Data*	FFY 2016 Target*	FFY 2016 Data
0	0	15	0%	0%	0%

Were all races and ethnicities included in the review? Yes No

Please specify in your definition: 1) the calculation method(s) being used (i.e., risk ratio, weighted risk ratio, e-formula, etc.); and 2) the threshold at which disproportionate representation is identified. Also include, as appropriate, 3) the number of years of data used in the calculation; and 4) any minimum cell and/or n-sizes (i.e., risk numerator and/or risk denominator).

South Dakota collects data for Indicator 10 through the state December 1 child count and Fall Enrollment collected on the last Friday in September. A Weighted Risk Ratio based on the identification rate for each racial/ethnic group at each LEA is calculated; thus, all data for all racial/ethnic groups in the State are examined. A **Weighted Risk Ratio** is determined only if there are **20** or more students in the (**cell size**) area of interest (based on child count data) and if there are also 20 or more students in the (**n-size**) comparison group. South Dakota uses **one year data** in the calculation.

Disproportionate representation is defined as a Weighted Risk Ratio of 3.00 and above (over-representation) **threshold**. Once a ratio is flagged for numerical disproportionate representation, the policies and procedures of that LEA are reviewed to determine if the disproportionate representation is due to inappropriate identification.

For Indicator 10, all of South Dakota's 150 LEAs are included in the analysis. Of these 150 LEAs, 15 met the minimum n-size requirements at least one time for a Final Risk Ratio to be calculated (for each LEA, in theory, 42 risk ratios could be calculated– one for each racial/ethnic group times the six primary disability categories). Please note that many LEAs in South Dakota have fewer than five students with a disability of a particular race/ethnicity; when this is disaggregated further by type of primary disability, the numbers get extremely small. Thus, very small numbers prevent SEP from calculating reliable and meaningful risk ratios for every racial/ethnic group in every LEA.

Describe how the State made its annual determination as to whether the disproportionate overrepresentation it identified of racial and ethnic groups in specific disability categories was the result of inappropriate identification.

When a district meets the methodology for disproportionality, Special Education Programs conducts an on-site review. The district will provide special

FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

education files across disability categories based on race/ethnicity. On-site team reviews the policy and procedures in the identification. They compare it to the policy and procedures followed by race/ethnicity identified as disproportionate and other race/ethnicity in same disability categories.

If the district followed appropriate policy and procedures for disability categories and race/ethnicity groups, the district is identified as having appropriate identification procedures. If policy and procedures were not appropriately followed, then the district would receive a CAP.

FFY 2016 SPP/APR Data

(a) Number of children for whom parental consent to evaluate was received	(b) Number of children whose evaluations were completed within 60 days (or State-established timeline)	FFY 2015 Data*	FFY 2016 Target*	FFY 2016 Data
5,419	5,402	99.85%	100%	99.69%

Number of children included in (a), but not included in (b) [a-b]	17
---	----

Account for children included in (a) but not included in (b). Indicate the range of days beyond the timeline when the evaluation was completed and any reasons for the delays.

Although South Dakota did not meet 100% compliance the state showed substantial compliance with 99.69% of children who were evaluated within the state's established 25 school day timeline. Twelve incidents of non-compliance do not indicate a statewide systematic issue. Substantial training efforts have been made to inform LEAs of the policies and procedures necessary to meet the evaluation timeline. Eleven of the twelve LEAs were in compliance during FFY 2015. Additional training and correction procedures have been put in place for the one LEA found non-compliant for a second year.

There are twelve out of 150 LEAs who did not meet the 100% target. Twelve LEAs did not meet the target for seventeen students due to staff calculation errors, evaluators unavailable, scheduling issues and failure to obtain permission to extend timeline.

Range of days beyond the timeline:

9 students exceeded the timeline by 1 day

2 students exceeded the timeline by 2 days

1 student exceeded the timeline by 4 days

1 student exceeded the timeline by 5 days

2 students exceeded the timeline by 6 days

2 students exceeded the timeline by 7 days

Indicate the evaluation timeline used

FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

- State monitoring
- State database that includes data for the entire reporting year

Describe the method used to collect these data, and if data are from the State’s monitoring, describe the procedures used to collect these data.

SEP created an electronic system that all LEAs are required to utilize to track and annually report initial evaluations conducted in the LEA. LEAs may utilize a state developed spreadsheet located at <http://doe.sd.gov/oess/sped-SPP.aspx> to track students throughout the school year and upload into the secured electronic system or they may enter the students directly into the secured electronic system. An upload option will no longer be available for districts after the 16-17 reporting period and they will be required to enter directly into the data collection secured site.

The data collection includes student ID, date permission received, date of last evaluation, the number of school days from permission received to evaluation completed, date eligibility is determined, and if needed the reason the timeline was exceed. The data is submitted and signed off by the LEA by August 1 of each fiscal year and it is reviewed by SEP for accuracy.

Actions required in FFY 2015 response

none

Note: Any actions required in last year’s response table that are related to correction of findings should be responded to on the "Correction of Previous Findings of Noncompliance" page of this indicator. If your State's only actions required in last year's response are related to findings of noncompliance, a text field will not be displayed on this page.

FFY 2015 Findings of Noncompliance Verified as Corrected

Describe how the State verified that the source of noncompliance is correctly implementing the regulatory requirements

South Dakota has verified that each child specific incidence of non-compliance was corrected (prong 1) and each of the late evaluations was completed properly. In addition to verifying the child specific non-compliance, SEP reviewed subsequent data and verified that five of the six LEAs properly implemented the specific regulatory requirements (prong 2) as required in the OSEP 09-02 memo.

Describe how the State verified that each individual case of noncompliance was corrected

In FFY 2015, six LEAs did not achieve 100% compliance for completing initial evaluations in the state designated 25 school day timeline. Each LEA had one or more students for which the timeline was not met which resulted in findings of non-compliance per LEA. SEP verified that each child specific incidence, of non-compliance, was corrected (prong 1) by verifying the completion of all evaluations. Additionally, the state reviewed the following year’s initial evaluation data for each LEA held out of compliance. SEP verified that five of the six LEAs were correctly implementing the specific regulatory requirements based upon a review of updated data (prong 2) for FFY 2016 as required in the OSEP 09-02 memo.

FFY 2015 Findings Not Yet Verified as Corrected

Actions taken if noncompliance not corrected

One LEA did not achieve 100% compliance on initial evaluation timelines in order to meet requirements in FFY 2016. The LEA was required to submit a 2016-17 report with 100% of initial evaluations completed within the 25 day timeline, however the LEA did not meet the requirement. The LEA has been placed on a new corrective action plan that includes training, quarterly data submission, desk audit for all student files not meeting compliance, and must achieve 100% compliance for 2017-18 to assure the LEA is in compliance with prong 2 for FFY 2017 as required by OSEP 09-02 memo.

FFY 2014 Findings of Noncompliance Verified as Corrected

Describe how the State verified that the source of noncompliance is correctly implementing the regulatory requirements

South Dakota has verified that each child specific incidence of non-compliance was corrected (prong 1) and each of the late evaluations was completed properly. In addition to verifying the child specific non-compliance, SEP reviewed subsequent data and verified that the one remaining LEA was properly implementing the specific regulatory requirements (prong 2) as required in the OSEP 09-02 memo.

Describe how the State verified that each individual case of noncompliance was corrected

South Dakota has verified that the 1 LEA with remaining non-compliance identified in FFY 2015 has achieved 100% compliance on initial evaluation timelines in order to meet requirements in FFY 2016. SEP confirmed this through the completion of a desk audit of the initial evaluations exceeding the

FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

timeline from FFY 2015, a review of subsequent quarterly data submissions collected through our State data system; a submission of training conducted with all evaluators on the policies and procedures addressing proper implementation of the 25 day evaluation timeline procedures specific with prong 2 for FFY 2016 as required by OSEP 09-02 memo.

OSEP Response

Because the State reported less than 100% compliance for FFY 2016, the State must report on the status of correction of noncompliance identified in FFY 2016 for this indicator. In addition, the State must demonstrate, in the FFY 2017 SPP/APR, that the remaining uncorrected finding of noncompliance identified in FFY 2015 was corrected. When reporting on the correction of noncompliance, the State must report, in the FFY 2017 SPP/APR, that it has verified that each LEA with findings of noncompliance identified in FFY 2016 and each LEA with remaining noncompliance identified in FFY 2015: (1) is correctly implementing the specific regulatory requirements (i.e., achieved 100% compliance) based on a review of updated data such as data subsequently collected through on-site monitoring or a State data system; and (2) has corrected each individual case of noncompliance, unless the child is no longer within the jurisdiction of the LEA, consistent with OSEP Memo 09-02. In the FFY 2017 SPP/APR, the State must describe the specific actions that were taken to verify the correction. If the State did not identify any findings of noncompliance in FFY 2016, although its FFY 2016 data reflect less than 100% compliance, provide an explanation of why the State did not identify any findings of noncompliance in FFY 2016.

Required Actions

Number of children who have been served in Part C and referred to Part B for eligibility determination that are not included in b, c, d, e, or f	1
--	---

Account for children included in (a), but not included in b, c, d, e, or f. Indicate the range of days beyond the third birthday when eligibility was determined and the IEP developed, and the reasons for the delays.

Although South Dakota did not meet the 100% compliance: the state showed substantial compliance with 99.77% of children referred to Part C prior to age 3 who are found eligible for Part B and who have an IEP developed and implemented by their 3rd birthday. One incident of non-compliance does not indicate a statewide systematic issue. Substantial training efforts have been made to inform LEAs of the policies and procedures necessary to meet the eligibility determination timeline for students turning age 3. The LEA was in 100% compliance during FFY 2015.

There is 1 out of 150 LEAs who did not meet the 100% target. The one LEAs did not meet the target for one student due to evaluator unavailability to complete evaluations.

Range of days beyond the timeline:
1 student over by 9 days

What is the source of the data provided for this indicator?

FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

State monitoring

State database that includes data for the entire reporting year

Describe the method used to collect these data, and if data are from the State's monitoring, describe the procedures used to collect these data.

Part C Service Coordinators submit Part C exit data to the State Part C office. All exit code data are entered into the Part C data system by the Part C Data Manager. LEA's are required to submit transition data into the secured website by September 1st of each year. Part B 619 Coordinator then analyzes the data submitted, verifies all students are accounted for per Part C records, addresses any data quality issues, verifies noncompliance issues, and provides districts with technical assistance on correct procedures. LEAs that do not meet the required timeline are contacted and justification is required for students not having an IEP in place by their third birthday to verify non-compliance.

In addition, SEP verifies the data collected from Part C during onsite accountability monitoring visits. The team reviews early childhood files and monitors all students referred from Part C to Part B that were determined eligible and had an IEP in place by their 3rd birthday.

Actions required in FFY 2015 response

none

Note: Any actions required in last year's response table that are related to correction of findings should be responded to on the "Correction of Previous Findings of Noncompliance" page of this indicator. If your State's only actions required in last year's response are related to findings of noncompliance, a text field will not be displayed on this page.

Correction of Findings of Noncompliance Identified in FFY 2015

Findings of Noncompliance Identified	Findings of Noncompliance Verified as Corrected Within One Year	Findings of Noncompliance Subsequently Corrected	Findings Not Yet Verified as Corrected
3	3	0	0

FFY 2015 Findings of Noncompliance Verified as Corrected

Describe how the State verified that the source of noncompliance is correctly implementing the regulatory requirements

South Dakota has verified that each child specific incidence of non-compliance was corrected (prong 1) and that the late evaluation was completed properly. In addition to verifying the child specific non-compliance, SEP reviewed subsequent data and verified that the LEA properly implemented the specific regulatory requirements (prong 2) as required in the OSEP 09-02 memo.

Describe how the State verified that each individual case of noncompliance was corrected

In FFY 2015, three LEAs did not achieve 100% compliance ensuring all students referred to Part B had an IEP developed and implemented by the student's 3rd birthday. Each LEA had one student for which the requirement was not met, which resulted in findings of non-compliance for that LEA. SEP verified that the child specific incidence of non-compliance was corrected (prong 1) through the development and implementation of the current year's transition IEPs and that the late evaluation was completed properly. In addition to verifying the child specific non-compliance, SEP reviewed subsequent data and verified that the LEA properly implemented the specific regulatory requirements (prong 2) as required in the OSEP 09-02 memo.

OSEP Response

Because the State reported less than 100% compliance for FFY 2016, the State must report on the status of correction of noncompliance identified in FFY 2016 for this indicator. When reporting on the correction of noncompliance, the State must report, in the FFY 2017 SPP/APR, that it has verified that each LEA with noncompliance identified in FFY 2016 for this indicator: (1) is correctly implementing the specific regulatory requirements (i.e., achieved 100% compliance) based on a review of updated data such as data subsequently collected through on-site monitoring or a State data system; and (2) has corrected each individual case of noncompliance, unless the child is no longer within the jurisdiction of the LEA, consistent with OSEP Memo 09-02. In the FFY 2017 SPP/APR, the State must describe the specific actions that were taken to verify the correction. If the State did not identify any findings of noncompliance in FFY 2016, although its FFY 2016 data reflect less than 100% compliance, provide an explanation of why the State did not identify any findings of noncompliance in FFY 2016.

Required Actions

**FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR)
Indicator 13: Secondary Transition**

Monitoring Priority: Effective General Supervision Part B / Effective Transition

Compliance indicator: Percent of youth with IEPs aged 16 and above with an IEP that includes appropriate measurable postsecondary goals that are annually updated and based upon an age appropriate transition assessment, transition services, including courses of study, that will reasonably enable the student to meet those postsecondary goals, and annual IEP goals related to the student's transition services needs. There also must be evidence that the student was invited to the IEP Team meeting where transition services are to be discussed and evidence that, if appropriate, a representative of any participating agency was invited to the IEP Team meeting with the prior consent of the parent or student who has reached the age of majority.

What is the source of the data provided for this indicator?

- State monitoring
- State database that includes data for the entire reporting year

Describe the method used to collect these data, and if data are from the State's monitoring, describe the procedures used to collect these data.

Indicator 13 is collected during on-site reviews utilizing the Indicator 13 checklist with the eight areas of review. LEAs must have all disability categories represented and two files per case manager available for the reviewers collecting Indicator 13 data.

Do the State's policies and procedures provide that public agencies must meet these requirements at an age younger than 16?

- Yes
- No

Actions required in FFY 2015 response

none

Note: Any actions required in last year's response table that are related to correction of findings should be responded to on the "Correction of Previous Findings of Noncompliance" page of this indicator. If your State's only actions required in last year's response are related to findings of noncompliance, a text field will not be displayed on this page.

Findings of Noncompliance Identified	Findings of Noncompliance Verified as Corrected Within One Year	Findings of Noncompliance Subsequently Corrected	Findings Not Yet Verified as Corrected
32	32	0	0

FFY 2015 Findings of Noncompliance Verified as Corrected

Describe how the State verified that the source of noncompliance is correctly implementing the regulatory requirements

In FFY 2015, there were 32 specific individual cases of non-compliance in 11 LEAs. All 11 LEAs received a Corrective Action Plan. In the Corrective Action Plan, LEAs corrected the individual files of non-compliance (Prong 1). The LEAs were required to be trained and update policies and procedures around the area of non-compliance. One individual file was corrected and policies and procedures were updated, the LEA submitted additional files to ensure verified correction and correct implementation of regulatory requirements (Prong 2) as indicated in OSEP Memo 09-02.

All 11 LEAs were verified to implement the regulatory requirements.

Indicator 13 is collected during on-site reviews. LEAs must have all disability categories represented and two files per case manager available for the reviewers collecting Indicator 13 data. When an issue of non-compliance is identified in a file, the LEA is required, through a CAP, to correct the individual file issue within one year of the date of the report. The correction is verified upon submission of the documentation either through transition report, consent to invite outside agency, updated transition IEP, meeting notice or student invite, or parental prior written notice.

Describe how the State verified that each individual case of noncompliance was corrected

In FFY 2015, there were 32 specific individual cases of non-compliance in 11 LEAs. All 32 individual cases of non-compliance were verified as corrected through the process identified above.

OSEP Response

Because the State reported less than 100% compliance for FFY 2016, the State must report on the status of correction of noncompliance identified in FFY 2016 for this indicator. When reporting on the correction of noncompliance, the State must report, in the FFY 2017 SPP/APR, that it has verified that each LEA with noncompliance identified in FFY 2016 for this indicator: (1) is correctly implementing the specific regulatory requirements (i.e., achieved 100% compliance) based on a review of updated data such as data subsequently collected through on-site monitoring or a State data system; and (2) has corrected each individual case of noncompliance, unless the child is no longer within the jurisdiction of the LEA, consistent with OSEP Memo 09-02. In the FFY 2017 SPP/APR, the State must describe the specific actions that were taken to verify the correction. If the State did not identify any findings of noncompliance in FFY 2016, although its FFY 2016 data reflect less than 100% compliance, provide an explanation of why the State did not identify any findings of noncompliance in FFY 2016.

Please select the reporting option your State is using:

Option 1: Use the same definition as used to report in the FFY 2015 SPP/APR, i.e., competitive employment means that youth have worked for pay at or above the minimum wage in a setting with others who are nondisabled for a period of 20 hours a week for at least 90 days at any time in the year since leaving high school. This includes military employment.

Option 2: Report in alignment with the term "competitive integrated employment" and its definition, in section 7(5) of the Rehabilitation Act, as amended by Workforce Innovation and Opportunity Act (WIOA), and 34 CFR §361.5(c)(9). For the purpose of defining the rate of compensation for students working on a "part-time basis" under this category, OSEP maintains the standard of 20 hours a week for at least 90 days at any time in the year since leaving high school. This definition applies to military employment.

Was a survey used? No

Was sampling used? No

Are the response data representative of the demographics of youth who are no longer in school and had IEPs in effect at the time they left school? No

Describe the strategies that the State will use to ensure that in the future the response data are representative of those demographics.

For the FFY 2016 report there was a negative representation in the following categories: Learning Disabilities (-3.51), Minority (-3.54), and Dropout (-4.11). This may be due to a new contractor working with the state data.

South Dakota Special Education Programs will work more closely with the contractor to make sure the response rate is representative for all demographic areas reported. Additionally, it is an option for districts to conduct the post-school outcomes survey so SEP will encourage districts to conduct the surveys in order to reach more students.

The State reported fewer than ten mediations held in FFY 2016. The State is not required to provide targets until any fiscal year in which ten or more mediations were held.

**FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR)
Indicator 17: State Systemic Improvement Plan**

Monitoring Priority: General Supervision

Results indicator: The State's SPP/APR includes a State Systemic Improvement Plan (SSIP) that meets the requirements set forth for this indicator.

Reported Data

Baseline Data: 2014

FFY	2013	2014	2015	2016
Target ≥		5.34%	9.84%	14.84%
Data		4.84%	7.25%	6.74%

Key: Gray – Data Prior to Baseline Yellow – Baseline
Blue – Data Update

FFY 2017 - FFY 2018 Targets

FFY	2017	2018
Target ≥	22.84%	36.56%

Key:

Description of Measure

Included in South Dakota's Flexibility Waiver (**attached as flexibility waiver**) is an explanation of how targets are set for reducing the number of students who are not reaching proficiency according to the state assessment.

AMO goals and targets will be set as follows:

STEP 1: In the base year of each six-year cycle, calculate the percentage of students in the school who test at the Basic and Below Basic levels.

STEP 2: Divide this percentage in half. This is the school's goal for reducing, within six years, the percentage of students who are not proficient.

STEP 3: Subtract this amount from 100%. This is the inverse of the above and represents the school's goal for percentage of students testing at the Proficient and Advanced levels in six years.

STEP 4: Divide the amount in Step 2 by six. This is the school's annual target for increasing the percentage of students who are Proficient.

STEP 5: Calculate the percentage of students in the base year who test at the Proficient and Advanced levels.

STEP 6: To determine the AMO in Year 1, add the base year percentage of students testing at the Proficient and Advanced levels to the annual target for increasing the percentage of students who are proficient.

STEP 7: To determine the AMO in Years 2-6, add the annual target to the previous year's AMO

SD followed a similar process to set targets for the SSIP, but based on stakeholder feedback targets were not set at equal increments, rather they were set with smaller gains in the first two years to allow practices to be in place with larger gains in the proceeding years (attached as SIMR_Targets_2014).

Targets: Description of Stakeholder Input

The Special Education Programs office (SEP) set its targets after the selection of a Coherent Set of Improvement Strategies were identified, taking into consideration stakeholder input and the formula in the flexibility waiver to reduce achievement gaps. The targets are based on data from the six pilot LEAs that closely mirrors the state data. The improvement strategies identified proved to be key to the stakeholder recommendations as to the rate of change that will occur over the life of the SSIP.

Targets were set based on the master waiver gap reduction formula and stakeholder review of data, infrastructure, the SiMR and expected effectiveness of the selected improvement strategies. SEP obtained broad representation of stakeholders throughout the process of Phase I development. These discussions and analyses occurred with stakeholders at the state and local levels. SEP considered stakeholder input and obtained SEA Leadership approval at each point stakeholder recommendations were received. Stakeholders included:

- South Dakota State Board of Education;
- South Dakota SEA staff across departments (e.g., Special Education, Title I, Teaching and Learning, Assessment, and Data);
- South Dakota Special Education Advisory Council;
- Local Education Agency (LEA) Special Education Directors;
- Other LEA staff, as invited by the Special Education Director (e.g., Superintendent, Directors, and Title I Directors);

FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

- South Dakota's Parent Connection;
- United States Department of Education (USDOE) Office of Special Education Programs (OSEP);
- National Center for Systemic Improvement (NCSI) state contact;
- Institutes of Higher Education (IHEs);
- Educators (general education and special education teachers);
- Parents.

These stakeholders were included as they pay for, provide, receive, participate in or collaborate on Individuals with Disabilities Education Improvement Act (IDEA) services and issues, and/or provide expertise. South Dakota's stakeholders are vital to the success of the SSIP and more specifically the outcomes as measured against the SiMR. Stakeholder efforts are valued and integral to the SSIP Phase I, as is their ongoing commitment to continue work towards improving outcomes for students with disabilities during subsequent phases.

Based on stakeholder input and feedback, South Dakota identified reading proficiency among students with learning disabilities entering grade four as the main focus for the SSIP and have set these Baseline and Target numbers for purpose of measuring the overall success of the SSIP.

Overview

Data Analysis

A description of how the State identified and analyzed key data, including data from SPP/APR indicators, 618 data collections, and other available data as applicable, to: (1) select the State-identified Measurable Result(s) for Children with Disabilities, and (2) identify root causes contributing to low performance. The description must include information about how the data were disaggregated by multiple variables (e.g., LEA, region, race/ethnicity, gender, disability category, placement, etc.). As part of its data analysis, the State should also consider compliance data and whether those data present potential barriers to improvement. In addition, if the State identifies any concerns about the quality of the data, the description must include how the State will address these concerns. Finally, if additional data are needed, the description should include the methods and timelines to collect and analyze the additional data.

Starting in April 2014, the Special Education Programs office (SEP) began conducting a broad data analysis review for purposes of Phase I of the SSIP. The SEP reviewed data in a variety of different ways and from various sources, including all 618 data submissions, the State Performance Plan Indicator data along with types of related services students received. The team narrowed the data points of interest to the area of reading proficiency of students with Specific Learning Disabilities.

In conjunction with a broad analysis of data, the team also began a broad review of the Department of Education (DOE) infrastructure, specifically looking at DOE's initiatives and goals aligning with contractor expertise; the consensus of this statewide review was that the focus would be on reading. Because the key considerations of the infrastructure analysis were the years of Reading in Response to Intervention work, Multi-Tiered Systems of Support including Positive Behavior Interventions and Supports, the South Dakota DOE's overall goal of "all students entering 4th grade will be proficient or advance in reading", along with several other initiatives focused on reading, the stakeholder groups and SEP planning team determined that the data point identified (reading proficiency of students with Specific Learning Disabilities) would fit within these existing initiatives and would align with existing infrastructure efforts.

On June 23, 2014, a large stakeholder group was brought together to conduct a more in-depth data analysis. The group conducted data analysis around students with disabilities reading proficiency scores. The group reviewed data disaggregated by:

- Ethnicity/Disability/Educational Service Agency (ESA)
- Female/Male
- Demographics/Native American/Disability Category
- Middle School and High School dropout?
- Why Resource Room and Separate class not doing as well?
- Performance related to Professional Attendance? Highly Qualified Staff?
- Why numbers of students dropping out as get older (exit)? Disability Category / Grade
- Placement agency/General Education Setting/Proficiency
- ESA/Male verse Female
- Female Native American/Male Native American proficiency
- Other Health Impaired/Emotional Disturbance/Specific Learning Disability

FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

Data questions which were noted/identified as possible needs:

- Is there information on reading instruction, teacher effectiveness and summer slide?
- Possible New Data collection?
- Collecting Child Count Data on which area of Specific Learning Disabilities does a student qualify.
- How to measure reading proficiency and benchmark/progress in Preschool to grade 3
- Other data points that could be used and limitation of access (Dibbles/AIMS/etc...)
- Strategies used in Early Intervention
- Prior Response To Intervention pilot LEAs doing better? They are closing the Native American Gap.
- Native American and other ethnicities
- Instruction: general education and resource room – Is there a difference?

After the data analysis by the stakeholder group, the group decided to support one of the Office of Special Education Program recommendations to focus on improving the reading proficiency for students with specific learning disabilities by the 3rd grade statewide assessment.

The following graph was an example of the different data breakdowns reviewed (see file: [summaryproficiencyjune6.pdf](#)).

Note: Special Education is demonstrating Specific Learning Disability Category but same breakdown occurred for a variety of other data.

Data analyzed in October 2nd Stakeholder Meeting and internally in Department of Education:

Special Education Programs provided stakeholders information on proficiency levels of students with IEPs on each reading standard according to the Statewide Assessment. There were no patterns on proficiency levels related to different grade levels or cohort groups. Information also included data on statewide accommodations related to reading; for example, almost 60% of our students with disabilities receive "read aloud" as an accommodation on the statewide assessment.

The Response to Intervention Coordinator provided the group with information on reading issues identified in the pilot LEAs. LEAs had to work through conducting, understanding, and utilizing data to determine appropriate targeted interventions. Once teachers received instruction to analyze data, they learned to group students according skills they needed to develop. Teachers then received professional development in instruction of reading through CORE Foundational Reading. Once they understood the strengths and weakness in their instruction, teachers could better intervene with the students in their classroom. RTI data showed that students then made growth whether a general education student or student with a disability.

Description of Concerns:

Since the assessment data file only includes whether a student is on an IEP and does not include a student's demographic information such as disability category, the child count and assessment file were merged. Due to the assessment file including more students than child count, some of the student's disability categories could not be matched.

A question also came up about how to measure growth prior to the statewide assessment at end of 3rd grade.

South Dakota is developing assessment reports in the longitudinal data system (SD-STARs), which will allow LEAs to disaggregate the all-assessed report by disability category, setting category, and grade. A DIBELS and AIMSweb report is being developed for the 44 LEAs who signed an agreement to upload the data. Both reporting features should be in place by summer of 2015. LEAs implementing state specific interventions will send progress data to the state yearly for reporting purposes.

Compliance Data:

South Dakota's compliance indicators reflect a high level of compliance. The Corrective Action Plans (CAP) from the reviews indicated skill-based assessment is an area several LEAs are not understanding. Unfortunately, data has not been collected specifically in areas where reading was the issue. South Dakota is currently in the process of developing and moving toward a results-driven accountability monitoring system.

Description of Stakeholder Involvement:

The main stakeholder group for the State Systemic Improvement Plan (SSIP) was selected based on several factors. The state Special Education Program office (SEP) ensures that the entire state geographic area is covered along with different LEA sizes in order to adequately represent the diversity in South Dakota. Personnel were selected which represented special education administrators, superintendents, current special education professors from IHEs, parents, educational agencies, educational cooperative staff, reading interventionists, special education teachers, behavior specialists, Birth to Three (Part C) representative, Title office, Division of Learning and Instruction, the State Library, Division of Education Services and Supports director, State Performance Plan coordinators, Parent Connections (PTI Center), contractors specializing in behavior and instruction and Special Education Program staff.

January 2015-Special Education Advisory Panel reviewed the State Systemic Improvement Plan and was given the opportunity to share their ideas.

Based on preliminary feedback from OSEP the baseline and targets have been changed to reflect the six pilot districts information verses the whole state.

Each pilot LEA has been given the opportunity to apply for a grant provided by the Office of Special Education Programs to support their work on the SSIP. The grant application entails how the LEA will support the theory of action and what supports are needed to improve results for the target population.

FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

On March 23 and 24th, 2015, SD Special Education programs staff shared with the Special Education Advisory Panel how the coherent improvement plan was developed with the six pilot LEAs. At this time the advisory panel did not recommend any changes to the plan.

Analysis of State Infrastructure to Support Improvement and Build Capacity

A description of how the State analyzed the capacity of its current infrastructure to support improvement and build capacity in LEAs to implement, scale up, and sustain the use of evidence-based practices to improve results for children with disabilities. State systems that make up its infrastructure include, at a minimum: governance, fiscal, quality standards, professional development, data, technical assistance, and accountability/monitoring. The description must include current strengths of the systems, the extent the systems are coordinated, and areas for improvement of functioning within and across the systems. The State must also identify current State-level improvement plans and initiatives, including special and general education improvement plans and initiatives, and describe the extent that these initiatives are aligned, and how they are, or could be, integrated with the SSIP. Finally, the State should identify representatives (e.g., offices, agencies, positions, individuals, and other stakeholders) that were involved in developing Phase I of the SSIP and that will be involved in developing and implementing Phase II of the SSIP.

South Dakota began planning for the development of the SSIP once the changes to the SPP/APR package were finalized and published by OSEP. The South Dakota Special Education Programs office (SEP) held initial planning meetings with key department leadership and staff to ensure understanding of what was meant by Infrastructure Analysis as part of the Phase I activities under Indicator 17. OSEP TA centers were consulted as well as OSEP state contacts. Early in 2014 a team of SEA staff attended a regional SSIP planning event that included state level data analysis and infrastructure analysis strategies and reviews of planning and analysis tools and processes. From that "kick-off" meeting, SEP began contacting key stakeholders to schedule work groups and planning meetings. SD SEP staff held meetings with the leadership team at DOE to explain the SSIP effort under the revised SPP/APR package and to brainstorm ideas. The resulting ideas were then discussed by staff for relevance to this effort.

Using the SSIP Phase I development framework created by the RRCPC (see attached slide: [PhaseIVisualFramework](#)), the SEP began with a broad look at the state's current infrastructure, considering the various nuances, dynamics, and context specific to our state. Several broad guiding questions were developed to help paint the infrastructure picture. SEP understood the need to identify and consider existing efforts, including state and local initiatives and to identify the priorities within the state from a broad perspective.

Initial Guiding Questions and discussion needs for Broad Analysis:

- Define current conditions for each area of the state systems: governance, fiscal, quality standards, professional development, data, technical assistance, and accountability/monitoring.
- What are the current SEA level initiatives?
- What do we know about what the locals are doing? What are their priorities?
- Where is the money going? Current focus and uses of discretionary grant money.
- Professional Development and Technical Assistance efforts to-date; what impact, if any has it had on student outcome improvement?
- Beginning to consider data as part of infrastructure analysis, what data sources does the state have and how is it being used to assess infrastructure? What data is needed?
- Recognizing the value and need for stakeholder input: Who are our stakeholders? What do stakeholders need to know to be able to help in the analysis and development of a plan? How can stakeholders be meaningfully involved in the Phase I activities and beyond?

These questions were used to further provide the basis for additional planning ahead of the first stakeholder planning meeting related specifically to conducting a more in-depth state-wide analysis of infrastructure.

An in-depth Infrastructure Analysis meeting was conducted with a broad stakeholder group in June 2014. Participants included the SD parent center, representatives from LEAs, IHE's and the SEA. The goal of this meeting was to conduct a thorough review of existing initiatives across the state and determine how these existing initiatives may impact the emerging SiMR statement, as well as to determine alignment with any emerging Improvement Strategies that are currently being implemented by LEAs or that need to be developed and implemented as part of Phase 2 and 3 of the SSIP process. In preparation for this meeting, SEP developed a comprehensive list of SEA level initiatives, activities, events, resources and processes that might be used in consideration of SSIP Phase I activities and RDA work (see attachment: [reading work in doe.docx](#)). Additionally, a SWOT Analysis framework was developed by the planning team for use in the in-depth analysis process (see attachment: [swot notes june 23, 2014 meeting.docx](#)).

Based on input from stakeholders, themes were developed within each of the four SWOT quadrants (Strengths, Weaknesses, Opportunities, and Threats). Key themes were identified as follows:

- Strengths: SEA level collaboration (de-siloing of education department); Early Intervention (RTI, MTSS, EIS coaching and staff development); Literacy Initiatives (statewide emphasis on reading proficiency and use of evidence-based practices).
- Weaknesses: Teacher Qualifications and Availability (preservice and turnover issues); Time (full plates); Funding; Ruralness of state.
- Opportunities: Collaboration between state agencies, partners, and LEAs; Increased reading proficiency leading to lower dropout rates and increased school completion; incorporate reading skills into all subjects; increase parental involvement.
- Threats: Teacher workload issues; lack of buy-in; perceived lack of time; silos not fully deconstructed.

Of particular concern and focus for the SSIP planning team based on the stakeholder input and analysis work were the issues around teacher qualifications, use of evidence-based practices, improved collaboration across state agencies, and increased parental involvement. Further discussions of infrastructure and capacity included the state and local capacity related to data analysis processes, including knowledge and use of data for improvement planning.

Results from the SWOT Analysis (see [SDSWOTforStakeholders_collated](#)) were taken and used in subsequent smaller group, focused infrastructure analysis activities.

In final preparation to fulfill Phase I activities of the SSIP and begin work on Phase II, SEP planned and conducted a "pilot district" improvement strategy work group meeting with key LEAs involved in beginning the implementation of the SSIP. During this meeting participants were provided with a review of the SSIP work completed to-date, including the data analysis process that led to the SiMR, results from the infrastructure analysis activities completed so far, and a review of existing statewide initiatives that have bearing on the SiMR. The goals of this meeting were to finalize a set of Coherent Improvement Strategies and a Theory of Action based on the data and infrastructure analysis work completed so far. Please see the following attachments to review outcomes of this meeting: [pilot_district_survey.pdf](#); [pilot_district_initiatives_in_place.docx](#); [coherentimprovementstrategies.docx](#).

State-identified Measurable Result(s) for Children with Disabilities

A statement of the result(s) the State intends to achieve through the implementation of the SSIP. The State-identified result(s) must be aligned to an SPP/APR indicator or a component of an SPP/APR indicator. The State-identified result(s) must be clearly based on the Data and State Infrastructure Analyses and must be a child-level outcome in contrast to a process outcome. The State may select a single result (e.g., increasing the graduation

FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

rate for children with disabilities) or a cluster of related results (e.g., increasing the graduation rate and decreasing the dropout rate for children with disabilities).

Statement

Students with Specific Learning Disabilities will increase reading proficiency prior to fourth grade from 33.16% to 41.83% by 2018 as measured by the statewide assessment.

Description

South Dakota's SIMR aligns with Indicator 3 (attached as Indicator3a, Indicator3b, Indicator3c). This Indicator measures the participation and performance rate on the state assessment.

During our data analysis the SLD category students in resource room were the 3rd lowest achieving subgroup. Only cognitive disabilities and multiple disabilities scored lower. After reviewing the data in a variety of ways, including; 618 data submissions, State Performance Plan data along with additional child count information, the team returned to SLD category reading proficiency deficits.

The SSIP Stakeholder Group consisted of the following: special education administrators, superintendent, current special education professor, parents, educational agency, educational cooperative staff, reading interventionist, special education teachers, behavior specialist, Birth to Three representative, Title office, Division of Learning and Instruction, State Library, Division of Education Services and Supports director, State Performance Plan coordinators, Parent Connections (PTI Center), contractors specializing in behavior and instruction and Special Education Program staff.

The special education advisory panel has also contributed as stakeholders. This panel includes: parents, higher education personal, vocational school personal, administrator, state juvenile/adult corrections, welfare/foster care, McKinney-Vento, private school, teacher, SEP staff.

Current initiatives in South Dakota Department of Education were compiled to initiate support for the SIMR. All departments at SD-DOE were included in the compilation (attached as Reading Work in DOE).

Addressing this SIMR will impact SLD student achievement in reading. The gap between students with disabilities and specific learning disability students will be reduced by 50% by 2018. The state will begin with six pilot LEAs in the first year of the SSIP. The six LEAs and their student level data are attached (pilot district data2). This LEAs were chosen for LEA size, location in the state, student population, SLD population in K-3rd grade, and other profile information. Based on the first year with these pilot LEAs, improvements will be calculated and strategies adjusted for a state-wide model.

June 23rd, 2014-SSIP Stakeholder meeting-

The SSIP Stakeholder Group consisted of the following: special education administrators, superintendent, current special education professor, parents, educational agency, educational cooperative staff, reading interventionist, special education teachers, behavior specialist, Birth to Three representative, Title office, Division of Learning and Instruction, State Library, Division of Education Services and Supports director, State Performance Plan coordinators, Parent Connections (PTI Center), contractors specializing in behavior and instruction and Special Education Program staff.

Outcomes:

- Gain an understanding of recent hot topics in special education and discuss strategies to improve outcomes for students with disabilities.
- Gain a better understanding of state-wide data to help guide the SSIP and provide input into the development of the SSIP.
- Gain a better understanding of the State Systemic Improvement Plan (SSIP) and receive stakeholder advice on the issue of improving reading proficiency of students with learning disabilities regarding Strengths, Weaknesses, Opportunities and Threats (attached as SWOT notes June 23, 2014).

September 30th, 2014-Special Education Advisory Panel Meeting-

This panel includes: parents, higher education personal, vocational school personal, administrator, state juvenile/adult corrections, welfare/foster care, McKinney-Vento, private school, teacher, SEP staff.

Agenda:

- Comment publicly on any rules or regulations proposed by the state regarding the education of children with disabilities.
- Advise the SEA in developing evaluations and reporting on data to the Secretary under Section 618 of the Act-State Performance Plan Coordinators, State Systemic Improvement Plan
- Advise the SEA of unmet needs within the state in the education of students with disabilities

October 2nd, 2014-SSIP Stakeholder meeting-

The SSIP Stakeholder Group consisted of the following: special education administrators, superintendent, current special education professor, parents, educational agency, educational cooperative staff, reading interventionist, special education teachers, behavior specialist, Birth to Three representative, Title office, Division of Learning and Instruction, State Library, Division of Education Services and Supports director, State Performance Plan coordinators, Parent Connections (PTI Center), contractors specializing in behavior and instruction and Special Education Program staff.

Outcomes:

- Gain an understanding of requirements from OSEP related to the State Systemic Improvement Plan (SSIP, Indicator 17).
- Gain a better understanding of the Strengths, Weaknesses, Opportunities, and Threats (SWOT) information from the previous Stakeholder input meeting, as well as a review of data related to reading proficiency of students with learning disabilities.
- Provide input into the development of the SSIP, specifically related to helping identify root causes, setting a baseline and target for the SSIP, and identifying improvement strategies.

January 14th, 2014-Pilot District Strategy Planning Meeting

The stakeholders at this meeting were the proposed pilot LEAs for the 2015-16 school year. Prior to this meeting there was a survey sent to all staff in the LEAs

FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

who worked with K-3rd grade reading (results attached as pilot district survey). The LEAs compiled a list of the initiatives in their LEAs currently (attached as pilot district initiatives in place). After looking at the state and LEA initiatives there was discussion on the strategies needed to make improvements in SLD students. The list of coherent improvement strategies was compiled.(coherent improvement strategies attached)

Selection of Coherent Improvement Strategies

An explanation of how the improvement strategies were selected, and why they are sound, logical and aligned, and will lead to a measurable improvement in the State-identified result(s). The improvement strategies should include the strategies, identified through the Data and State Infrastructure Analyses, that are needed to improve the State infrastructure and to support LEA implementation of evidence-based practices to improve the State-identified Measurable Result(s) for Children with Disabilities. The State must describe how implementation of the improvement strategies will address identified root causes for low performance and ultimately build LEA capacity to achieve the State-identified Measurable Result(s) for Children with Disabilities.

South Dakota's Set of Coherent Improvement Strategies was determined through a systematic process of data analysis and infrastructure analysis conducted by a series of SEP internal and external stakeholder group meetings. Based on stakeholder input, the specific improvement strategies are framed within four broader areas of improvement that align with state and local initiatives as well as federal guidance related to the focus for results-driven accountability:

Data Analysis

Districts can provide:

- Monthly meetings on progress (data analysis) to monitor and guide instruction.

State support:

- Understanding and applying special education evaluation data to plan instruction (PD).
- Train districts on data workbook use (PD).

Instructional Practices and Strategies

Districts can provide:

- Review schedules at the building level to improve efficiency.
- Review evaluation components and the impact on instructional practices.

State support:

- Foundational reading professional development.
- Design matrix of intervention strategies tied to reading components (research-based strategies and programs).

Collaboration

Districts can provide:

- "De-silo" departments and staff within a district (all students are all teachers' students).
- Train general education staff about students with specific learning disabilities.
- Model how to instruct or support students in the general education classroom.

State support:

- Guidance on how to de-silo staff within a district (all students are all teacher's students).
- General education and special education collaboration and communication PD (common language, curriculum knowledge).

Family and Community Engagement

Districts can provide:

- Student-led portfolios at conferences.
- Improve parent involvement in Reading as needed (specific to district).
- Create positive experiences for parents (emotionally safe environment).

State support:

- Professional Development or materials for district staff in engaging parents.

Throughout the SSIP process we have gathered information from stakeholders and had DOE internal conversations concerning improvement strategies to decrease the gap between specific learning disability (SLD) students and all students with disabilities (SWD). SEP conducted a survey of what was currently being done in the pilot districts (attached as Pilot District Survey) and what initiatives are in place at the SD-DOE (attached as reading work at DOE). This inquiry created a list of hypothesis which included:

- There is a shift in education that has impacted student outcomes. This shift has required teachers to acquire new skills they may not currently have due to a variety of factors (school climate/culture, lagging teacher prep programs, data drill-down understanding, evidence based practices, alignment of student need and instruction, teacher impact on achievement).
- South Dakota is currently supporting Multi-Systems of Support (MTSS) which includes Positive Behavior Intervention and Support (PBIS) and Response to Intervention (RTI). RTI is an effective program because it is a systems approach, an Every-Ed initiative (It's not a general education initiative and it's not a special education initiative, it's an 'every education' initiative), about prevention, collaborative-team oriented process, and is a process that relies on strong core instruction. RTI coordinators who support schools with trainings and guidance have been an active part in K-3 reading improvement. We have used their knowledge to create a plan to close the reading gap in K-3 students. The coherent improvement strategies were based on pilot district needs.

FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

The RTI model in South Dakota is designed to help teachers select and design student learning targets, increase teacher knowledge and skills, select and/or develop tightly aligned materials, monitor implementation with fidelity. These strategies have been proven in South Dakota ([attached 2007-2012 RTI Data](#)). When looking at the data from the schools involved in RTI during the years 2007-2012, each benchmark period showed improved achievement. Slide one combines all grade levels in which proficiency increased each benchmark period. Slides 3-6 separate the scores by grade level proficiency. Each benchmark period by grade level also showed increased proficiency.

During the October 2nd, 2014 Stakeholder meeting the root cause for reading deficits in SLD students was determined to be:

- Shifts in education, which impact all students, are requiring teachers to have skills that they don't have due to a variety of factors.
- Culture/climate of the school.
- Progression of education.
- Maintaining teacher mentor programs - the effectiveness of the teacher has the greatest impact on students.
- Teacher prep programs.
- Data drill down understanding by teachers.

The coherent improvement strategies will target the root causes and build capacity for South Dakota and support systemic change. A logical team approach will begin the process of collaboration at each district level. Districts will be provided the training they need to support the shift to data driven instruction. That support will include instructional coaches and trainings designed for needs specific to reading.

South Dakota Department of Education Special Education Program has also purchased DirectSTEP reading related courses/modules for paraprofessionals. The courses are:

- Roles and Responsibilities of the Paraeducator
- Assessment, Diagnosis and Evaluation
- Improving Behavior
- Paraeducator Support: Instructional Content and Practice

All of the coherent improvement strategies will encompass general education teachers, special education teachers, and para-professionals. The strategies will also be specific to those employed at a district as instructional coaches and RTI Interventionists. This will ensure an implementation framework which will support systemic change.

Through the State infrastructure analyses, it has been determined that LEAs are in need of support that will create a shift in the educational structure to data driven instruction. The strategies are determined to improve results when used with fidelity.

The above strategies will target all district staff who work with K-3rd grade students. The SIMR is specific to K-3rd grade SLD students but the stakeholders feel it is vital to strengthen all CORE teachers to create a preventative model for South Dakota.

During stakeholder meetings and internal conversations, high staff turnover across the state was discussed. This training could target district staff with job assignments of curriculum specialists, reading coaches, RTI coaches, and reading interventionists. They will not only participate in the coherent improvement strategies provided above, but will have additional trainings as needed to continue to support new staff. This will assure continuity and sustainability of the increased reading outcomes for all students and specifically SLD students.

To scale up support to school districts and strengthen the reading structure a team approach will be built with school districts. The first year of the SIMR will include pilot districts and then support will be expanded state-wide. The pilot districts encompass 1/3 of the SLD population. This will offer a good indicator of the adjustments needed as the project continues. Also, during the pilot year, the state will build trainer capacity and support.

- Input from stakeholders included the following evidence – based strategies based on <http://www.readingrockets.org/> and
- National Reading Panel report <http://www.nichd.nih.gov/publications/pubs/nrp/documents/report.pdf>

Oct. 2, 2014 SSIP Stakeholder meeting hypothesis

- Increase foundational reading skills thru professional development would improve reading skills.
- SLO (Student Learning Objectives) to support progress monitoring.
- Formative assessment strategies (on-going and not one end of year assessment).
- Data driven instructional strategies.
- Train the trainer models.
- Research based instruction (direct and explicit instruction).
- Teacher training and support for higher education and practicing teachers.

January 14th, 2015 SSIP Pilot District meeting

Districts were surveyed prior to the meeting to determine what they had in place to improve reading instruction. All staff who worked on K-3rd grade reading in the pilot districts was included. ([Pilot district survey results attached](#)).

Current district initiatives discussed ([attached as pilot district initiatives in place](#)).

Coherent improvement strategies were suggested by pilot districts. ([attached as coherent improvement strategies](#)).

Theory of Action

A graphic illustration that shows the rationale of how implementing the coherent set of improvement strategies selected will increase the State's capacity to lead meaningful change in LEAs, and achieve improvement in the State-identified Measurable Result(s) for Children with Disabilities.

[Theory of Action](#) Theory of Action

Infrastructure Development

- (a) Specify improvements that will be made to the State infrastructure to better support EIS programs and providers to implement and scale up EBPs to improve results for infants and toddlers with disabilities and their families.
- (b) Identify the steps the State will take to further align and leverage current improvement plans and other early learning initiatives and programs in the State, including Race to the Top-Early Learning Challenge, Home Visiting Program, Early Head Start and others which impact infants and toddlers with disabilities and their families.
- (c) Identify who will be in charge of implementing the changes to infrastructure, resources needed, expected outcomes, and timelines for completing improvement efforts.
- (d) Specify how the State will involve multiple offices within the State Lead Agency, as well as other State agencies and stakeholders in the improvement of its infrastructure.

The South Dakota Special Education Programs office (SEP) continued its collaborative approach to improving the state infrastructure by engaging the broad stakeholder groups that were involved in Phase I of the SSIP (State Systemic Improvement Plan). While SEP engaged stakeholders at various levels throughout the year, the department intentionally brought stakeholder workgroups together on two centralized occasions to conduct Phase II planning meetings and gather stakeholder input. As described below, the stakeholders represented both special and general education perspectives in order to help provide a complete understanding of state infrastructure across all systems.

The first meeting was held in July 2015 and focused on the development of the evaluation component of the SSIP Phase II (see [ssipilotmtgagenda20150715.pdf](#)). Participants included parents, the local education agency (LEA) leadership from the "Pilot LEAs" (a subset of LEAs currently participating in the SSIP), IHE representatives, representatives from other state and federal programs at the South Dakota State Department of Education (SEA) level, representatives from Early Childhood Section 619 as well as Part C, and teacher leader representatives. Generally, stakeholders received an update and overview of the Phase II components, including the need to ensure the SEA continues to improve its infrastructure in order to support LEAs and their implementation of the SSIP. The pilot LEAs came to this meeting with data regarding current initiatives in place at the LEA level—an exhaustive list of student level and systems level efforts being implemented (see [DistrictInitiativesInventory.doc](#)). The SEP developed a District Initiatives Inventory tool for LEAs to use to help districts further identify the relationship between existing efforts and the potential impact on the SiMR. Based on three of the four broad "standards of action" contained in the "Theory of Action," guiding questions were developed to provide direction for identifying existing initiatives:

1. **Data Analysis:** What data analysis processes surrounding students with specific learning disabilities do you use/will you use among staff members at the K-3 level?
2. **Instructional Practices and Strategies:** What instructional practices and strategies targeted toward students with specific learning disabilities do you currently use/will you use with K-3 staff?
3. **Collaboration:** What type of collaborative processes do you have/will you have between general education and special education teachers at the K-3 level that relate to students with specific learning disabilities?

Using this tool, LEAs further rated their current success at implementing each initiative and identified the expected outcome of the initiative, what evidence exists to support the outcome, and any evidence that the initiative was implemented with fidelity.

Data from this tool was summarized and put into a template that could be used by the state SSIP core team for further analysis and planning (see [activitylistbygroup.pdf](#)). Data from this meeting was used to continue developing the Evaluation Plan under Phase II. For example, specific initiatives identified by the pilot LEAs and discussed as a group through this process were chosen to further develop and implement Evidence-Based Practices (EBPs), against which data would be gathered, measured, and reported on for purposes of the Evaluation Plan. An example of an LEA-specific initiative being implemented, which became a broad category of an EBP, is the Data Workbook developed by the state to help LEAs understand data and use it to inform instructional practices.

Another stakeholder meeting was held in December 2015 with a broader scope of work, including a review of recent information obtained from the South Dakota team participating in the NCSI Cross-State Collaborative focusing on language and literacy technical assistance meetings. The workgroup continued to develop the evaluation plan but also engaged in activities that helped participants understand the SSIP implementation factors related to infrastructure. For example, the group engaged in pre-work at the LEA level, identifying existing structures that support improving outcomes for students. They were then able to come to this meeting prepared to review individual LEA data with the larger SEA group, and they held focused conversations to identify additional supports that may be needed, including what the SEA should consider changing or improving with regard to the infrastructure components of professional development, fiscal resources, and technical assistance.

Through this process of stakeholder engagement, the state was able to identify the current initiatives—including general and special education—that potentially impact the SIMR (see [activitylistbygroup.pdf](#)). Input from stakeholders and the state SSIP core team suggests that efforts need to be considered to further align pilot LEA utilization of fiscal support and SEA-provided professional development related to focusing efforts on the implementation of EBPs in order to impact the SIMR. Due to the local control climate in the state of South Dakota, LEAs have flexibility in their use of resources and must implement EBPs within the context of existing local curricula and instructional priorities. There has been excellent participation and cooperation on behalf of the pilot LEA leadership. The expectation is that stakeholder groups, the state SSIP core team, and pilot LEAs will continue to develop and implement SSIP activities, efforts, and initiatives—including EBPs. By completing these activities, efforts, and initiative a positive impact should be shown through the SIMRAs South Dakota moves into Phase III of the SSIP, the state will take steps to ensure pilot LEAs and additional LEAs beginning to implement identified EBPs will have the data, research, and professional development necessary to build capacity in order to facilitate removal of potential barriers and help align and leverage current improvement plans and initiatives.

The state SSIP core team has been extremely focused on developing and implementing the SSIP. The state SSIP core team includes the SEP director, a state SSIP core team lead designated by the SEP director, and other SEP staff as assigned. The SEP has also accessed the support of consultants in order to facilitate stakeholder engagement, develop tools for data analysis and stakeholder input, and design and implement the SSIP evaluation plan. This state SSIP core team is cognizant of and uses the federal SSIP phased timeframes as a guide for planning and scheduling SSIP activities.

See the following timeline for key activities:

Internal Timeline for Phase II

Activity	Deadline	Persons Responsible	Comments
----------	----------	---------------------	----------

FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

Stakeholder Meeting (Pilot LEA Directors)	July 15, 2015	State SSIP Core Team	Completed
Stakeholder Meeting (Larger Group)	Dec 3, 2015	State SSIP Core Team	Completed
Stakeholder Meeting (Pilot LEA Directors)	Jan 21, 2016	State SSIP Core Team	Address questions and strategize challenges; work on alignment
SEP Advisory Panel SSIP Review	March 21, 2016	SEP Advisory Panel Members and SEP Team	Conduct a detailed review of the SSIP Phase II draft
Stakeholder Conference Call Meeting (Pilot LEA Directors)	March 29, 2016	State SSIP Core Team Lead	Discuss progress of activities and provide TA for the evaluation plan tracking system
	TBD		
Stakeholder Meeting (Larger group)	May/June 2016	State SSIP Core Team	Discuss current data and consider benchmark and SIMR data points

Tools Development

District Initiative Inventory	June 1, 2015	State SSIP Core Team	Ready for July stakeholder meeting
Logic Model Questions	June 1, 2015	State SSIP Core Team	Ready for July stakeholder meeting
Other Data Collection Tools	July 1, 2015	State SSIP Core Team	Discuss and list draft data collection tools; have ready for July stakeholder meeting for finalization
Tools Finalization	Dec 3, 2015	State SSIP Core Team	Ready for December stakeholder meeting
Evaluation Plan Draft	Dec 3, 2015	State SSIP Core Team	Ready for December stakeholder meeting
Logic Model	Dec 1, 2015	Evaluator Consult	
Data Collection tools	Dec 1, 2015	State SSIP Core Team Lead and Consult	

South Dakota has historically valued its relationship with, and the involvement of, various stakeholders at all levels of the educational system surrounding students with disabilities. The state SSIP core team built upon this value in its strategic approach to developing the SSIP, starting with Phase I. As demonstrated in the "Theory of Action," two of the four broad standards of action include **"Parent Involvement"** and **"Collaboration."** From a broad perspective, these two standards guide the larger work of ensuring stakeholders charged with supporting students with disabilities understand the emphasis on Results-Driven Accountability (RDA), the SSIP, and, more specifically, the SIMR.

One of the leverage points in the South Dakota SSIP is the intersection between Part C and Part B SSIP efforts; both programs have aligned efforts in support of literacy outcomes. The state is integrating Part C data with the Part B data system in order to develop a longitudinal data system that will help paint a picture of a student with a disability from Birth to age 21. Part C and B SSIP teams have collaborated and shared information as part of the SSIP development process.

As described earlier, the state SSIP core planning team continued to ensure stakeholder involvement during the early development of Phase II of the SSIP early on. There was no disruption or "break" as the state transitioned into the second phase of development; the conversation continued early in Phase II with regular conference calls and onsite stakeholder workgroup planning meetings with pilot LEAs, parent representatives, other state and federal project representatives, and local school implementers. The SEP director worked closely with the Division Director for Educational Services and Supports in order to ensure awareness across state offices. The SEP invited the state Division Director of Learning and Instruction to the NCSI Cross-State Collaborative, focusing on language and literacy, to participate as a member of the state SSIP core team. This allowed for rich and productive discussion between multiple state offices, which are helping to identify areas of infrastructure that need strengthening and leveraging. As a result, the conversations on how the SEA can collaborate to better support literacy efforts have been expanded; efforts do not have as much of a "parallel" structure to them as in the past. Subsequent SEA planning meetings have been held across state offices, which have resulted in more efficient application of the initiatives and resources that will ultimately have bearing on the SIMR.

The SEP will ensure that the Division Director for Educational Services and Supports, the Division Director of Learning and Instruction, and other SEA leadership continue to be involved and informed of SSIP efforts. One way the SEP will continue to involve SEA staff is by presenting and seeking input at bi-weekly Statewide System of Recognition, Accountability, and Support (SSRAS) meetings. Equal efforts will be made to ensure the participation of LEA leadership across general and special education programs.

FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR) Support for EIS programs and providers implementation of Evidence-Based Practices

- (a) Specify how the State will support EIS providers in implementing the evidence-based practices that will result in changes in Lead Agency, EIS program, and EIS provider practices to achieve the SiMR(s) for infants and toddlers with disabilities and their families.
- (b) Identify steps and specific activities needed to implement the coherent improvement strategies, including communication strategies and stakeholder involvement; how identified barriers will be addressed; who will be in charge of implementing; how the activities will be implemented with fidelity; the resources that will be used to implement them; and timelines for completion.
- (c) Specify how the State will involve multiple offices within the Lead Agency (and other State agencies such as the SEA) to support EIS providers in scaling up and sustaining the implementation of the evidence-based practices once they have been implemented with fidelity.

The state of South Dakota will support LEAs in implementing the EBPs that will result in changes in LEA, school, and provider practices in order to achieve the SiMR for children with disabilities through grant funding and professional development. In Phase II, six pilot districts received training through a research-based reading program recognized by the National Reading Panel that included coaching and data analysis training. This program was selected based on statewide use of the program as well as the effective results the state has seen using this program.

The SEP has held several meetings during the Phase I and Phase II development with the six pilot LEAs, allowing the pilot LEAs to share their concerns and needs moving into Phase II. On July 15, 2015, the six pilot LEAs met to share activities and initiatives each pilot LEA had in place for the four standards of action (Data Analysis, Instructional Practices & Strategies, Collaboration, and Family & Community Involvement) outlined in South Dakota's "Theory of Action." The SEP found commonalities among all six pilot LEAs and shared ideas for planning the implementation of activities in Phase II next steps.

The state SSIP core team focused on the infrastructure needs of each of the six pilot LEAs. Working across departments, the SEP arranged to have professional development trainings in order to improve the literacy structure. Together, the SEP and the Division of Learning and Instruction held four separate trainings for district representatives. Trainings included a research-based reading program training recognized by the National Reading Panel, a coaching training, a data analysis training, and two school-based assessment trainings. Both offices focusing on improving literacy structures allowed for readiness and built capacity for implementation within LEAs, schools, and personnel/provider practices. The six pilot LEAs submitted beginning achievement data on students with specific learning disabilities in the fall, reported their progress on activities in the winter and spring, and will submit ending achievement data on students with specific learning disabilities—along with progress on activities—at the beginning of the summer to the state SSIP core team.

Each pilot LEA sent a staff member representing the district to attend a coaching training and a train-the-trainer training. Data Workbook and benchmark assessment tool trainings were also optional trainings offered to each of the six pilot LEAs. Trained LEA representatives have begun implementing the trainings in each district to elementary general education teachers, special education teachers, paraprofessionals, and support staff. For the 2015-2016 school year, trainings will include data analysis and instructional practices and strategies. Special education directors in each pilot LEA will communicate with building principals to implement the trainings in their district. General and special education teachers will implement the practices in their classrooms.

The SEP communicates with the six pilot LEAs through small and large stakeholder meetings, emails, and conference calls. The smaller stakeholder meetings include the six pilot LEAs. The larger stakeholder meetings include a wide range of participants.

Stakeholder involvement includes:

- South Dakota State Board of Education
- South Dakota SEA staff across departments (e.g., Special Education, Title 1, Teaching, and Learning, Assessment, and Data)
- South Dakota Special Education Advisory Council
- LEA Special Education Directors
- Other LEA staff as invited by the Special Education Director (e.g., superintendent, directors, and Title 1 directors)
- South Dakota's Parent Connections
- United States Department of Education (USDOE), Office of Special Education Programs (OSEP)
- National Center for Systemic Improvement (NCSI) state contact
- Institutes of Higher Education (IHEs)
- Educators (general and special education teachers)
- Parents

The smaller stakeholder group held a meeting on July 15, 2015, to find common activities and initiatives among the six pilot LEAs.

On December 3, 2015, a larger stakeholder group meeting was held to share next steps and receive stakeholder input on the activities the pilot LEAs would be implementing in the future.

January 21, 2016: The smaller stakeholder group consisting of the six pilot LEAs held a meeting to finalize the evaluation plan. The six LEAs were given the opportunity to share ideas on tools for measuring fidelity of implementation for EBPs. Based on the shared ideas, the state SSIP core team presented short- and long-term activities on a matrix. The matrix also outlined the timeline for completion. The smaller stakeholder group was given time to review and share ideas for each activity. The smaller stakeholder group also shared ideas for the timeline for completion on each activity. A final decision for activities and a timeline was agreed upon among the smaller stakeholder group. The state SSIP core team will administer, collect, and analyze evaluation tools from each of the six pilot LEAs.

When looking at the infrastructure of the six pilot LEAs, there are many barriers in Phase I. These barriers include: local control, different professional development needs, individual district priorities, and remote and limited resources (e.g., travel, districts are spread among the state, etc.). The SEP has worked with the six pilot LEAs to differentiate professional development and allow for flexibility in order to impact South Dakota's SiMR for the SSIP.

Based on infrastructure barriers, in the 2015-2016 school year not all pilot LEAs were able to implement all four of the standards of action (Data Analysis, Instructional Practices & Strategies, Collaboration, Family & Community Involvement) as laid out in the "Theory of Action." Five of the six pilot LEAs were able to implement the "instructional practices & strategies"; the sixth district will implement it in the summer of 2016. Through their grant activities, all six pilot LEAs were able to begin implementation of "data analysis" in the 2015-2016 school year.

Moving forward into Phase III of the SSIP, the six pilot LEAs will begin implementation of common EBPs in the areas of "collaboration" and "family & community involvement" in the 2016-2017 school year. The SEP will be measuring implementation of the activities and initiatives with fidelity. Each of the six pilot LEAs have submitted data showing activities and student growth.

(see [SDSSIEvaluationPlan 2015-16.docx](#) showing the expected timeline for the 2015-2016 school year)

(see [SDSSIPLogicModel.pdf](#) exhibiting the short- and long-term goals for the SEP's SSIP)

FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

(see [sdtheoryofactiongraphic2.docx](#) for the SEP's SSIP)

The SEP has been speaking statewide on South Dakota's SSIP. The SEP holds monthly special education director calls, updating districts statewide on the SSIP progress. A representative from the SEP—the state SSIP core team lead—has made appearances at regional conferences, updating districts on the progress and future goal for South Dakota's SSIP. The state SSIP core team lead has presented South Dakota SSIP documents to the South Dakota Special Education Advisory Council. The SEP Advisory Panel was able to provide input concerning the implementation of activities of the six LEA pilot districts and the impact the activities will have on the state's SIMR.

The state SSIP core team has worked across departments to support the LEAs in scaling up the implementation of EBPs. The SEP has worked alongside the Division of Learning and Instruction, Title I, and Birth to 3 offices to improve literacy structures. The state SSIP core team has worked to build a cohesive team across departments. The SEP Part B and Part C have data systems that are aligned with each other. This allows for work to be completed in a joint effort.

Evaluation

- Specify how the evaluation is aligned to the theory of action and other components of the SSIP and the extent to which it includes short-term and long-term objectives to measure implementation of the SSIP and its impact on achieving measurable improvement in SIMR(s) for infants and toddlers with disabilities and their families.
- Specify how the evaluation includes stakeholders and how information from the evaluation will be disseminated to stakeholders.
- Specify the methods that the State will use to collect and analyze data to evaluate implementation and outcomes of the SSIP and the progress toward achieving intended improvements in the SIMR(s).
- Specify how the State will use the evaluation data to examine the effectiveness of the implementation; assess the State's progress toward achieving intended improvements; and to make modifications to the SSIP as necessary.

The state SSIP core team will oversee the evaluation. The state SSIP core team consists of internal SEP staff members and an external evaluator.

The state SSIP core team created a logic model that specifies the inputs, outputs, and outcomes ([see SDSSIPLogicModel.pdf](#)). The logic model provides details on how each of the four coherent improvement strategies will lead to various short-, medium-, and long-term outcomes.

The logic model specifies the global relationship with the "Theory of Action" and the evaluation questions. In addition, the state SSIP core team created a "Detailed Evaluation Plan" that shows each of the evaluation questions that will be measured for each coherent improvement strategy ([see SD SSIP Detailed Evaluation Questions 2015-16.docx](#)), as well as an "Evaluation Plan Overview" for the state SSIP core team and the pilot LEAs to use as a reference for when, where, and how evaluations are to be completed ([see SD SSIP Evaluation Plan 2015-16.docx](#)).

For each coherent improvement strategy, a standard set of evaluation questions will be answered. These questions are grouped into "Input," "Output," and "Outcomes" questions, as follows:

Input Questions

- Were the inputs used sufficiently?
- What amount of resources were used?

Output Questions

- Did each of the specified activities occur?
- Who participated in the specified activities?
- Did the targeted people participate in the activities?
- Were the activities delivered with fidelity?
- Were participants satisfied with the activities?

Outcome Questions

Short-Term

- Did the participants acquire new knowledge, skills, and attitudes?

Medium-Term

- Did the participants implement new skills?
- Did the participants implement new skills with fidelity?

Long-Term

- Did students increase their reading achievement?
- Are students with specific learning disabilities being placed in the regular environment at a greater rate than before?

A large stakeholder group was formed to provide input on the evaluation plan. Participants include parents, LEA leadership from the six pilot LEAs, IHE representatives, representatives from other state and federal programs at the SEA level, and teacher leader representatives.

The stakeholder group was given opportunities to provide input throughout the development of the evaluation plan. Their input was thoughtfully considered and incorporated into the final evaluation plan. Stakeholder involvement is outlined in greater detail in the infrastructure development section.

Frequent and transparent communication will be the norm. The evaluation process and results will be shared and discussed via four methods:

- The SEP will have in-person meetings with the six pilot LEAs three times a year.
- Email and phone will be used frequently to communicate with the six pilot LEAs in between meetings. An "open door" policy will be followed.
- At least annually, the SEP will provide updates on the SSIP evaluation and seek input from the South Dakota Advisory Panel.
- At least annually and during the monthly state director phone calls, LEA directors will be informed of the SSIP evaluation and given a chance to provide input.

The SEP has created an evaluation plan that specifies the evaluation measures that will be used for each coherent improvement strategy ([see SD SSIP Detailed Evaluation Questions 2015-16.docx](#) and [SD SSIP Evaluation Plan 2015-16.docx](#)). The general measures that go across all or most of the four

FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

standards of action are:

1. Activity tracking. A website (SDPD) has been developed that tracks each training conducted by the pilot LEAs.
2. End-of-Training Evaluations. The SDPD website has a training evaluation component. Training participants are given a unique URL for each training and complete the evaluation online. The system produces evaluation reports in real-time.
3. Participant Tracking. The SDPD website has a participant tracking component. This allows the SEP to know who participated in each training.
4. Forms that measure whether participants are implementing new skills (e.g., problem-solving checklists and tiered intervention tracking forms).
5. Perception Survey of Skills. These measure participants' perceptions of their skills.
6. 6-Month Follow-Up Surveys. These surveys measure whether participants are implementing learned skills back on the job six months after the training.
7. Fidelity of Implementation Tools. These tools are used by an external observer to measure implementation of new skills.

The coherent improvement strategies are being implemented in six pilot LEAs who represent the entire state. The two largest LEAs in the state are two of the six pilot LEAs. The K-12 enrollments of these six LEAs represent 33% of all enrolled K-12 students. In addition, these six LEAs represent 30% of all students with specific learning disabilities in the state.

To measure the impact of the coherent improvement strategies on student outcomes, the state SSIP core team will be using an interrupted time-series design with comparison group.

- Data on student outcomes (state test data as well as formative, school-based assessment) will be collected and analyzed at defined time periods before and after the intervention.
- Comparable LEAs in the state will be identified to serve as a comparison group for every year of the project.
- In addition, one of the largest pilot LEAs will implement the coherent improvement strategies to one group of schools in year 1, a second group in year 2, and a third group in year 3. This will allow those schools to be on the "waiting list" as a comparison group.

The data will be reviewed quarterly by the state SSIP core team. The data will be reviewed with the pilot LEAs at the end of each school year to determine what worked well and what needs to change.

The state SSIP core team will evaluate the initial effectiveness of the TA/PD through the SDPD website. Because training evaluations are collected immediately after a training, and because reports of results are created in real-time, satisfaction data can be analyzed right away. Pre/post-knowledge tests are collected at the beginning and the end of training, and this data is analyzed in a timely fashion. In addition, the "Observation Checklist for High Quality Professional Development" will be used to assess the training and ensure it includes the necessary components for it to be effective.

The state SSIP core team will be collecting and reviewing data on a regular basis. The state SSIP core team will meet monthly. Data on training activities are collected in real-time, and short-term data (e.g., progress monitoring data, implementation data, and perception data) will be collected throughout the process. Thus, the state SSIP core team will know very quickly if anything (activities, evaluations, communications, etc.) needs to be modified.

Note: The state SSIP core team will be modifying the SIMR targets. The South Dakota state test changed in 2014-2015, and the data from spring 2015 is being analyzed. The state will be establishing new Annual Measurable Objectives (AMOs). Once summary statistics on students with specific learning disabilities have been produced, a new baseline and targets will be established. Refer to the explanation in the Historical Data and Targets section for a greater explanation and more information regarding South Dakota's baseline and targets.

Technical Assistance and Support

Describe the support the State needs to develop and implement an effective SSIP. Areas to consider include: Infrastructure development; Support for EIS programs and providers implementation of EBP; Evaluation; and Stakeholder involvement in Phase II.

The State of South Dakota has faced several barriers such as staffing and funding. Throughout this process, South Dakota appreciates the technical assistance, support, and guidance provided by OSEP and its various technical assistance investments such as NCSI, IDC, etc. We specifically appreciate the qualitative reviews and feedback provided by OSEP and other technical assistance providers and will continue to access those opportunities as this process continues to develop. We will look forward to additional guidance tools developed by OSEP to help us continue the development and implementation of the SSIP.

Phase III submissions should include:

- Data-based justifications for any changes in implementation activities.
- Data to support that the State is on the right path, if no adjustments are being proposed.
- Descriptions of how stakeholders have been involved, including in decision-making.

A. Summary of Phase 3

1. Theory of action or logic model for the SSIP, including the SIMR.
2. The coherent improvement strategies or principle activities employed during the year, including infrastructure improvement strategies.
3. The specific evidence-based practices that have been implemented to date.
4. Brief overview of the year's evaluation activities, measures, and outcomes.
5. Highlights of changes to implementation and improvement strategies.

The SEP State-identified Measurable Result (SiMR) indicates that students with specific learning disabilities (SLD) will increase reading proficiency prior to fourth grade from 4.84% in spring 2015 to 36.56% by spring 2019 as measured by the statewide assessment. As discussed in Phase I and Phase II, SEP and its stakeholders developed a Theory of Action (see Appendix A) that describes four broad Standards of Action as follows:

- Data Analysis
- Instructional Practices and Strategies
- Collaboration
- Family and Community Involvement

FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

SEP and its stakeholders continued to develop and implement SSIP activities, including the evaluation plan, over the course of the year. The SSIP implementation group is composed of pilot districts. Staff members in each pilot district have received professional development through the Teaching Reading Sourcebook, recognized by the National Reading Panel. Additional professional development efforts are centered on coaching, data analysis training, and benchmark assessment tool trainings. SEP, stakeholder groups, and pilot districts validated these practices to be evidence-based; many were being implemented by one or more of the pilot districts, enabling the SSIP to leverage current initiatives and strategies.

Throughout 2017-2018, pilot districts implemented these evidence-based strategies and trained new staff members in order to help ensure full implementation. As part of the evaluation plan, the pilot districts provided feedback through the completion of training evaluations, pre- and post-training tests, Problem-Solving Checklist, perception surveys, Team Process Checklist, intervention tracking forms, student benchmark data, and student state test data. As in 2016-2017, a member of the SEP SSIP Core Team attended a training from each of the pilot districts to verify that trainings incorporated the essential elements of high quality training using the Observational Checklist for High Quality Professional Development.

The Theory of Action, as well as the Detailed Evaluation Questions document (see Appendix B) specifies the short-, medium-, and long-term outcomes of the SSIP. Expected outcomes include teacher acquisition of new knowledge, teachers learning and implementing new skills and strategies, staff engaging in problem-solving processes, general education and special education teachers collaborating, increased family engagement, increased percentages of students with disabilities receiving behavioral support, students being placed in tiered interventions, student achievement improvements, and an increase in the percent of students with disabilities being placed in the regular classroom with typical peers.

Throughout 2017-2018, SEP engaged stakeholder groups to review the implementation of the SSIP. Please refer to the Activities Timeline chart in Section B. for a description of the activity and date of each stakeholder meeting, updated to reflect 2017-2018. South Dakota has two main stakeholder groups, the large stakeholder group and the small stakeholder group, as well as the SEP SSIP Core Team. The large stakeholder group includes parents, teachers, parent support and advocacy groups, higher education institutions, school district administrators, and other state agencies. The small stakeholder group includes SEP staff and key staff representing the pilot districts. The SEP SSIP Core Team includes the SEP director, a SEP SSIP Core Team lead designated by the SEP director, and consultants. SEP has accessed the support of consultants in order to facilitate stakeholder engagement, develop tools for data analysis and stakeholder input, and design and implement the SSIP evaluation plan.

The large stakeholder group met in October 2017 to review initial results data from the time the pilot districts began implementing coherent improvement strategies. While initial indications suggested student performance was improving, the state test data from 2016-2017 showed no improvement in scores. The group engaged in discussions regarding improvements in teacher knowledge, skills, and fidelity of implementation.

In April 2017, DOE applied for and was awarded a State Personal Development Grant (SPDG). The goal of the SPDG is to develop a systematic, cohesive, collaborative, and sustainable evidence-based state literacy model that uses data and engages families. It can also be implemented with any district needing support for struggling readers, especially students with SLD. The work for the SPDG and SSIP is closely aligned and is outlined further in Section F.

B. Progress in Implementing the SSIP

1. Description of the State's SSIP implementation progress: (a) Description of extent to which the State has carried out its planned activities with fidelity—what has been accomplished, what milestones have been met, and whether the intended timeline has been followed and (b) Intended outputs that have been accomplished as a result of the implementation activities.
2. Stakeholder involvement in SSIP implementation: (a) How stakeholders have been informed of the ongoing implementation of the SSIP and (b) How stakeholders have had a voice and been involved in decision-making regarding the ongoing implementation of the SSIP.

The following is an Activities Timeline that SEP created to help guide and document key activities. The chart includes the activity, dates, responsible persons, and brief comments documenting key outcomes of the events.

Activities Timeline			
Activity	Date	Group	Purpose
FFY 2015 submission	April 3, 2017	SEP SSIP Core Team	Submitted
FFY 2016 planning meeting	April 27, 2017	SEP SSIP Core Team	Discuss continued implementation
Planning for Large Stakeholder Group Meeting	April 24, 25, 26, and 31, 2017	SEP SSIP Core Team	Drafting agenda, planning purpose and outcomes, and preparing materials
Large Stakeholder Group Meeting	June 1, 2017	Large Stakeholder Group	Conducted group collaboration activity; defined what collaboration is for SD SSIP; reviewed and firmed up the evaluation plan; reviewed and discussed possible activities for collaboration and family engagement
Meeting with evaluator and SEP SSIP Core Team Lead to discuss firming up Collaboration Survey and FFWT	June 26, 2017	SEP SSIP Core Team	Completed; also discussed upcoming data drill down

FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

NCSI Cross Collaborative and Language and Literacy Collaborative meeting	July 12 and 13, 2017	Facilitator and select SEP SSIP Core Team members	Collaborated with other states and worked through discussions with other states to help with the implementation process
Planning meeting to finalize the Family Friendly Walk Through (FFWT)	August 7, 2017	SEP SSIP Core Team and Title I	Completed
OSEP call	August 22, 2017	SEP SSIP Core Team	Write-up, implementation, and next steps
TA call with the small stakeholder group	August 29, 2017	SEP SSIP Core Team and Small Stakeholder group	Discussed the upcoming school year, upcoming stakeholder meeting, evaluation plan, and needed supports
NCSI Language and Literacy Collaborative webinar	September 6, 2017	Selected SEP SSIP Core Team members	Received up-to-date information and focused on virtual engagement
Induction Meeting between current and new SEP SSIP Core Team Leads	September 14, 2017	SEP SSIP Core Team Lead	Meeting to review SD SSIP and prepare new SEP SSIP Core Team Lead
Observed Teaching Reading Sourcebook training	September 26, 2017	SEP SSIP Core Team Lead	Used the Observational Checklist for HQ PD form to take data on implementation fidelity of PD
Planning Meeting	September 29, 2017	SEP SSIP Core Team	Review evaluation activities; prepare for upcoming Large Group Stakeholder meeting
Data Review Meeting	October 3, 2017	SEP SSIP Core Team	Reviewed data tools and data available to date on implementation of SSIP
Family Engagement Meeting	October 5, 2017	SEP SSIP Core Team Lead; Family Engagement Liaison	Reviewed the FFWT surveys and walkthrough process
Planning Meeting	October 16, 2017	SEP SSIP Core Team Lead; Pilot Districts	Discussed final preparations for Large Stakeholder Group Meeting; shared digital agenda and handouts with attendees
Stakeholder Meeting	October 24, 2017	Large Stakeholder Group	Reviewed most recent SSIP data; discussed updated evaluation plan, including new components (FFWT, Literacy Observation Checklist, and Collaboration Inventory)
Attended NCSI Language and Literacy Collaborative in Atlanta, GA	November 7 and 8, 2017	Selected SEP SSIP Core Team members	Received up-to-date information and guidance as well as TA on Phase III of SSIP
Pilot District Conference Call	December 7, 2017	SEP SSIP Core Team Lead and pilot districts	Reviewed timeline for Spring 2018 data components; discussed ideas for future trainings; reviewed literacy

FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

			resources; scheduled Literacy Observation Checklist visits
NCSI Language and Literacy Collaborative webinar	December 13, 2017	Selected SEP SSIP Core Team members	Received up-to-date information and resource review
Pilot District Data Review	January 18, 2018	SEP SSIP Core Team Lead and Pilot District Lead	Touch base with pilot districts to review data received and data still needed
Literacy Observation Checklist	January 23, 2018	SEP SSIP Core Team Lead	Observe in classrooms to complete Literacy Observation Checklists
Planning Meeting	January 24, 2018	SEP SSIP Core Team	Prepare for upcoming Large Group Stakeholder meeting
SSIP and SPDG Alignment Planning	February 5, 2018	SEP SSIP Core Team and SPDG Leadership Team	Work on evaluation alignment
Large Stakeholder Group Meeting	February 9, 2018	Stakeholder Group	Reviewed most recent data districts shared highlights and challenges; review family engagement resources; districts share needs and suggestions for upcoming year
FFWT	February 27, 2018	SEP SSIP Core Team Lead and Pilot District FFWT group	Observed FFWT process at pilot district
District Visit and Literacy Observation Checklist	February 28, 2018	SEP SSIP Core Team Lead and Pilot District Lead	Onsite visit with district lead; observe in classrooms to complete Literacy Observation Checklists
District Visit and Literacy Observation Checklist	March 1, 2018	SEP SSIP Core Team Lead and Pilot District Lead	Onsite visit with district lead; observe in classrooms to complete Literacy Observation Checklists
Observed Teaching Reading Sourcebook training	March 2, 2018	SEP SSIP Core Team Lead	Used the Observational Checklist for HQ PD form to take data on implementation fidelity of PD
SSIP Presentation	March 13 and 14, 2018	SEP SSIP Core Team Lead	Presented data review and findings during a session at the State Special Education Conference
District Visit and Literacy Observation Checklist	March 20, 2018	SEP SSIP Core Team Lead and Pilot District Lead	Onsite visit with district lead; observe in classrooms to complete Literacy Observation Checklists
FFY 2016 write-up planning meeting	March 22, 2018	SEP SSIP Core Team	Review documentation and write-up progress
District Visit and Literacy Observation Checklist	March 27, 2018	SEP SSIP Core Team Lead and Pilot District Lead	Onsite visit with district lead; observe in classrooms to complete Literacy Observation Checklists

FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

Additional discussion on progress of implementation: As discussed at the last two large stakeholder group meetings in October 2017 and February 2018, some interim student-level data demonstrate promising results as SSIP activities were implemented over the course of the past year. Examples of this data are discussed in Section E. Other examples of progress in the implementation of the SSIP activities include the implementation of professional development (PD) activities as planned in Phase II, such as the Train the Trainer Model PD on the Teaching Reading Sourcebook and on the South Dakota Data Workbook for Reading. The SEP SSIP Core Team Lead then went into the districts to directly observe the training from the Train the Trainer Model and assess the delivery of the training with an eye toward fidelity, using the Observational Checklist for High Quality Professional Development in both the 2016-2017 school year and the 2017-2018 school year.

While districts strive to reach maximum efficacy with training opportunities, finding the time during the school year to provide training and support without interrupting a teacher’s time with students has been a challenge. The SEP SSIP Core Team has partnered with several other statewide initiatives to address this need. The SPDG Leadership Team has set up summer training opportunities that would allow teachers in both the SSIP and SPDG programs to receive professional development in the areas of literacy and coaching without having to miss time in the classroom. To ensure high-quality PD is available to all teachers, particularly in rural and small districts, SEP has partnered with IHEs through the Collaboration for Effective Educator Development, Accountability and Reform (CEEDAR) grant to offer online modules focusing on Features of Effective Instruction. This online training can be completed during evenings, weekends, and during summer break to accommodate varying teachers’ schedules. The Division of Learning and Instruction has implemented a Statewide Mentoring Program, which includes special education teachers. The mentoring program supplies specific and targeted support to new teachers by providing access to a mentor. Four of the pilot schools have enrolled all first-year and second-year teachers in the Statewide Mentoring program, providing all new teachers in these pilot schools with a mentor.

During conference calls and on-site visits, pilot districts shared progress, concerns, and ideas for continued growth in the program and success for their students. During calls and visits in the 2017-2018 school year, districts zeroed in on family engagement as it relates to literacy. Planning, arrangement and completion for FFWT occurred. Districts identified the success of staff in supporting students in Tier 1 instruction as well as in their readiness to explore best practices for students in Tiers 2 and 3. Previously, teacher buy-in to implementing SSIP-related activities has been an area of challenge for districts. The SEP SSIP Core Team, including DOE leadership, has continued to work alongside pilot district Special Education Directors to streamline the implementation of instructional practices and evaluation activities. During on-site visits, teachers noted that these instructional practices are becoming part of their daily routines, and they are seeing increased engagement and improvements in student achievement on the Intervention Tracking forms.

SEP continued its collaborative approach to improving the state infrastructure by engaging the large and small stakeholder groups that were involved in Phase I and Phase II of the SSIP. While SEP engaged stakeholders at various levels throughout the year, the department intentionally brought stakeholder workgroups together on multiple occasions to conduct evaluation planning meetings and gather stakeholder input. Thirty-four stakeholders were part of the large stakeholder group and participated in various stages during 2017-2018. Cross-divisional meetings and data sharing continues to be vital in the analysis of data, infrastructure, future improvement strategies, and measurable results. The key roles included in all stakeholder groups are parents, teachers, parent-support and advocacy groups, higher education institutions, school district administrators, and other state agencies. Internal stakeholders across the DOE also provided input. As listed below, the stakeholders represent both special and general education perspectives in order to help provide a complete understanding of state infrastructure across all systems.

Stakeholder representation involvement includes:

- Parents
- South Dakota DOE staff across departments (e.g., Special Education, Title 1, Teaching, and Learning, Assessment, and Data)
- South Dakota Advisory Panel on Children with Disabilities
- LEA Special Education Directors
- Other LEA staff invited by the district Special Education Director (e.g., superintendent, directors, and Title 1 directors)
- South Dakota Parent Connection (PTI Center)
- National Center for Systemic Improvement (NCSI) state contact
- Institutes of Higher Education (IHEs)
- Educators (general and special education teachers)

Large Stakeholder Group Face-to-Face Meeting Dates			
Date	Time	Location	Purpose
June 1, 2017	10 am – 4 pm	Fort Pierre, SD	Conducted group collaboration activity; defined what collaboration is for the SSIP; reviewed and firmed up the evaluation plan; reviewed and discussed possible activities for collaboration and family engagement
October 24, 2017	10 am – 12 pm	Conference Call	Reviewed most recent SSIP data; discussed updated evaluation plan, including new components (FFWT, Literacy Observation Checklist, and Collaboration Inventory)
February 9, 2018	9 am – 3 pm	Virtual due to weather with onsite locations in Sioux Falls, SD and Pierre, SD	Reviewed most recent data; districts shared highlights and challenges; review family engagement resources; districts shared needs and suggestions for upcoming year

SSIP Small Stakeholder Conference Call and Face-To-Face Meeting Dates

FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

Date	Time	Purpose/Outcome
August 29, 2017	10 am –11 am	Discussed the upcoming school year, upcoming stakeholder meeting, evaluation plan, and needed supports; SSIP Team Lead gave districts follow-up information on the FFWT and the Collaboration Survey that began implementation in October 2017
December 7, 2017	10 am – 11 am	Reviewed timeline for Spring 2018 data components; discussed ideas for future trainings; reviewed literacy resources; scheduled Literacy Observation Checklist visits
January 18, 2018	Email correspondence	Individual conversation with each pilot district about data components and timeline
February 28, 2018	8:30 am – 3:30 pm	Onsite visit with pilot district lead
March 1, 2018	8:30 am – 12:30 pm	Onsite visit with pilot district lead
March 20, 2018	8:30 am – 12:30 pm	Onsite visit with pilot district lead
March 27, 2018	8:30 am – 3:15 pm	Onsite visit with pilot district lead

C. Data on Implementation and Outcomes

1. How the State monitored and measured outputs to assess the effectiveness of the implementation plan: (a) How evaluation measures align with the theory of action, (b) Data sources for each key measure, (c) Description of baseline data for key measures, (d) Data collection procedures and associated timelines, (e) [If applicable] Sampling procedures, (f) [If appropriate] Planned data comparisons, and (g) How data management and data analysis procedures allow for assessment of progress toward achieving intended improvements
2. How the State has demonstrated progress and made modifications to the SSIP as necessary: (a) How the State has reviewed key data that provide evidence regarding progress toward achieving intended improvements to infrastructure and the SiMR, (b) Evidence of change to baseline data for key measures, (c) How data support changes that have been made to implementation and improvement strategies, (d) How data are informing next steps in the SSIP implementation, and (e) How data support planned modifications to intended outcomes (including the SiMR)—rationale or justification for the changes or how data support that the SSIP is on the right path
3. Stakeholder involvement in the SSIP evaluation: (a) How stakeholders have been informed of the ongoing evaluation of the SSIP and (b) How stakeholders have had a voice and been involved in decision-making regarding the ongoing evaluation of the SSIP

The SD SSIP Logic Model (see *Appendix C*), developed by the SEP SSIP Core Team during Phase II, provides details on how each of the four coherent improvement strategies will lead to various short-, medium-, and long-term outcomes. The SD SSIP Detailed Evaluation Plan document (see *Appendix D*) and the SD SSIP Detailed Evaluation Questions 2017-18 document (see *Appendix B*) provide details on the data sources for the key measures used to assess the implementation and outcomes of each coherent improvement strategy.

The general measures that span all or most of the four standards of action are:

1. Activity tracking: A secure website (South Dakota Professional Development or SDPD) has been developed to track each training conducted by the pilot districts. The SEP SSIP Core Team and appropriate district staff are given log-in credentials to enter and view workshops and workshop evaluation reports.
2. End-of-Training Evaluations: The SDPD website has a training evaluation component. Training participants are given a unique URL for each training and complete the evaluation online. The system produces evaluation reports in real-time.
3. Participant Tracking: The SDPD website has a participant tracking component. This allows SEP to know who participated in each training.
4. Forms that measure whether participants are implementing new skills (e.g., Problem-Solving Checklists and Tiered Intervention Tracking Forms).
5. Perception Survey of Skills: These measure participants' perceptions of their skills that were addressed in the training.
6. Fidelity of Implementation Tools: These tools are used by an external observer to measure the implementation of new skills.

These measures allow the SEP SSIP Core Team to assess progress towards achieving the intended improvements. The SDPD site allows for the tracking of the trainings and the training evaluations in real-time. The tracking of tiered interventions in November, February, and May also checks on the implementation of instructional practices throughout the year.

The coherent improvement strategies are being implemented in pilot districts. The pilot districts are representative of the entire state. These districts represent the western, eastern, and central parts of the state. The two largest districts in the state are two of the pilot districts. The K-12 enrollment of the pilot districts represents 29% of all enrolled K-12 students, and the pilot districts represent 25% of all students with SLD in the state.

To measure the impact of the coherent improvement strategies on student outcomes, the SEP SSIP Core Team will use an interrupted time-series design with a comparison group. The SEP will do this analysis after the spring 2018 state test data are received.

- Data on student outcomes (state test data and formative school-based assessment) will be collected and analyzed at defined time periods before and after the intervention.
- Comparable LEAs in the state will be identified to serve as a comparison group for all years of the project.

FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

- In addition, one of the largest pilot LEAs is implementing the coherent improvement strategies to one group of schools in year 1, a second group in year 2, and a third group in year 3. This will allow the SEP SSIP Core Team to use the schools with phased in implementation as a comparison group.

The state has regularly reviewed evaluation data as it has become available. Data on outputs, short-term outcomes, and medium-term outcomes are regularly reviewed. The SD SSIP Detailed Evaluation Questions 2017-18 document (see *Appendix B*) shows baseline and current data (where available) on each key measure. The SD Data Dashboard Report from 2016-17 (see *Appendix E*) and (preliminary) 2017-18 (see *Appendix F*) details a summary of the evaluation measures collected over the past two years. Note that in the SSIP report submitted in April 2017, the data reported was based on data from 2016-17 as of March 2017. The 2016-17 data have been updated to include data from the entire school year; thus, it will not necessarily match what was reported previously. Some highlights from the data include:

- For both the data analysis and instructional strategies trainings, in 2016-17 and 2017-18, over 85% of participants indicated that their knowledge and skills increased and that they would change something on their job as a result of the training.
- 98% of participants attending the instructional strategies trainings in 2016-17 improved their post-test score on the knowledge test. 95% of participants attending the instructional strategies trainings in 2017-18 improved their post-test score on the knowledge test.
- In 2017-18, 95% of staff at the pilot districts indicated that they are skilled in various data analysis strategies and 95% indicated that they are skilled in various instructional strategies.
- In 2017-18, 95% of participants indicated that the team processes were being implemented with fidelity.
- In November 2017, 58% of SLD students at the pilot districts received an intervention; 21% received a Tier 2 intervention with achieved success; 54% received a Tier 3 intervention with achieved success. The low success rates are due to the November time period. In May 2017, after a full-year of tiered interventions, teachers reported that 68% received a Tier 2 intervention with achieved success and 71% received a Tier 3 intervention with achieved success.

The pilot districts are encouraged to review their data from the evaluation measures and make changes in the ways in which they are implementing their strategies. Twice a year, during stakeholder meetings, state level dashboards are presented and districts are encouraged to ask questions in order to utilize the reports at the district level. Detailed reports on each measure were sent quarterly to each district and a data dashboard report was generated for each of the pilot districts.

Districts are attentively examining the evaluation data they receive. For example, after seeing the summarized results of the November Intervention Tracking Form, some school staff members realized that the students with SLD, who were receiving Tier 3 interventions could in fact be receiving Tier 2 interventions as well. These teachers have since made adjustments to increase the exposure of students with SLD to not only intensive interventions in the special education setting, but also strategic interventions with nondisabled peers in the general education setting, allowing more time for skill acquisition.

Based on the detailed reports given to districts, another change or adjustment at the district level was an increase in professional development being provided to educators during Phase III. These two examples of adjustments to the SSIP implementation were based in response to data from the SSIP evaluation activities.

One data-based change that was made during FFY 2016 were the SiMR targets. Partially due to leadership turnover and concerns with current capacity for implementation, one of the pilot districts dropped out of the project in 2016-17. Thus, baseline data was modified so it consisted of the remaining pilot districts' data. In addition, the targets for the SiMR were changed because there are two years of data based on Smarter Balanced (the new state reading test). South Dakota administered the Smarter Balanced assessment in spring 2015 and then again in spring 2016. Based on the new baseline data, challenging targets were set for the SiMR, starting with the 2016-17 school year.

Other data (i.e., reading benchmark data) besides the state reading test data was utilized to examine short-term and medium-term outcomes. Benchmark data from the pilot districts show that the percentage of students with SLD scoring at benchmark increased from the fall to spring in 2015-16 for students in grades 2 and 3, but decreased from the fall to spring in 2016-17. The SEP will be looking at movement on scale scores to determine if students are making progress even if they are not meeting the proficiency level.

As specified in Section B., several in-person stakeholder meetings were held. At these meetings, detailed evaluation information was provided to the stakeholders. Stakeholders provided feedback on the evaluation measures and results. The SEP SSIP Core Team Lead held regular conference calls with key staff from the pilot districts to review updates on implementation of the plan and provide TA on the evaluation plan collection and reporting. In addition, the pilot districts regularly receive reports on their completed evaluations so they can make necessary adjustments to the implementation of their plan.

D. Data Quality Issues: Data limitations that affected reports of progress in implementing the SSIP and achieving the SIMR

1. Concern or limitations related to the quality or quantity of the data used to report progress or results
2. Implications for assessing progress or results
3. Plans for improving data quality

In general, the data collected has been of high quality, and the SEP SSIP Core Team has had very few concerns. The most important data for evaluating progress is the state test data and benchmark data. This data is of high quality and is being collected on all students with SLD.

For the two action strands of Data Analysis and Instructional Practices and Strategies, the output, outcome, and fidelity data are being collected and are of high quality for the third year of implementation (2017-18). During the first year (2015-16), one area of concern surrounding the Instructional Practices and Strategies action strand was the collection of intervention tracking data. Staff members in pilot districts were asked to indicate which students with SLD were receiving a Tier 2 or Tier 3 intervention and to provide information on the success of this intervention. Initially, staff members objected due to the detailed intervention tracking form they were asked to complete. As such, the data from 2015-16 was limited. Based on stakeholder feedback, the intervention tracking form was revised to be more user friendly. Also, the SEP SSIP Core Team discussed with the pilot districts the value of the data. The pilot districts then moved forward with the intervention tracking form. In fact, in November 2016, pilot districts provided intervention information on 340 students with SLD, which represents 50% of students with SLD at the targeted schools in the pilot districts. In November 2017, 54 teachers from 38 schools provided tiered intervention data on 418 students with SLD, which represented 58% of SLD students in those pilot schools.

Prior to the 2017-18 school year, no data were being collected on the Collaboration action strand and the Family and Community Involvement action strand. For these two strands, the districts were given the flexibility to identify current research-based practices and strategies or select research-based practices and strategies that would meet the unique needs of the districts. The state provides oversight and monetary support for these activities but allows districts the discretion to select activities targeted to the unique needs of schools. The benefit to this approach is that districts can select and implement those activities that will have the most success given the district's culture, talents, and resources. The disadvantage of this approach is identifying a standard evaluation measure that will work with all of the pilot districts and provide meaningful and useful information.

FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

To address the Collaboration action strand, the SEP created a survey that asks, for each of grade levels K-3, the extent to which general education teachers and special education teachers attend grade-level and problem-solving meetings together, have scheduled collaboration times, and engage in various activities (e.g., plan together on instructional strategies). This survey also asks about the number of classrooms that use some type of formal co-teaching practice or a collaboration practice.

Analysis of the district collaboration activities reveals that over 50% of special education and general education teachers are participating in collaboration activities. Collaboration practices included special education and general education teachers planning together on instructional strategies, developing materials or activities together for particular classes, and planning together for needs of students with SLD in general education classrooms. Specifically, as of March 15, 2018, 61% of special education teachers attended grade level and problem-solving meetings together with general education teachers. Similarly, 52% of general education and special education teachers had a scheduled collaboration time. This shared collaboration time has had a positive impact on teachers with 63% of participants implementing various collaboration practices as a result of this shared time.

To address the Family Involvement action strand, in 2016-2017, the SEP SSIP Core Team identified and considered three standardized family engagement measures and presented them to the large stakeholder group. After this initial discussion, the members of the SEP SSIP Core Team met with a representative from the SD Title I office to work on a family engagement survey. A family version and a staff version of the family engagement survey was finalized in August 2017. All SSIP pilot schools completed these two surveys in 2017-2018. In addition, qualitative data on family engagement is collected via the FFWT Tool. This tool provides information on the school's environment, the quality of school communications to families, and the learning connection between the school and families.

Initial results from the Family Engagement Survey reveal that 83% of educators report that families are engaged in the school, compared to 87% of family members who report that they are engaged. Also, 87% of educators report that families are involved in literacy activities with their children, compared to 86% of family members. These results are positive and show that both overall engagement and literacy engagement levels are above 80%. In addition to the Family Engagement surveys, the SEP also examined the results on the Indicator 8 Parent Involvement Survey for parents of students with SLD in grades K-5 at the pilot schools. This analysis shows that in 2016-17, 83% of these parents reported that the school facilitated their involvement. (83% of non-pilot school parents of students with SLD in grades K-5 also reported that the school facilitated their involvement.)

E. Progress Toward Achieving Intended Improvements

1. Infrastructure changes that support SSIP initiatives, including how system changes support achievement of the SiMR, sustainability, and scale-up
2. Evidence that SSIP's evidence-based practices are being carried out with fidelity and having the desired effects
3. Outcomes regarding progress toward short-term and long-term objectives that are necessary steps toward achieving the SiMR
4. Measurable improvements in the SiMR in relation to targets

Several evaluation measures address the issue of fidelity of implementation. For the Data Analysis action strand, the SEP SSIP Core Team collected data on several components surrounding the data analysis process that schools are to engage in after the data analysis training. These include the Team Process Checklist, the Problem-Solving Checklist for Core/Universal Screening, and the Problem-Solving Checklist for Individual Students. These data show:

- 95% of participants completing the Team Process Checklist indicate that the team is engaging in effective team practices.
- 64% of participants completing the Problem-Solving Checklist for Core/Universal Screening indicate that this Tier 1 review is being implemented with fidelity.

For the Instructional Practices and Strategies action strand, the Intervention Tracking form and the Literacy Observational Checklist address the fidelity of implementation question. Data from 2016-2017 show that students with SLD were getting Tier 2 and Tier 3 interventions and that these interventions were successful. In May 2017, after a full-year of tiered interventions, teachers reported that 68% of students receiving a Tier 2 intervention and 71% of SLD students receiving a Tier 3 intervention made progress as a result of the intervention. Current year intervention tracking data show that in November 2017, 58% of SLD students at the pilot districts received an intervention; of those receiving a Tier 2 intervention, 21% have made progress; of those receiving a Tier 3 intervention, 54% have made progress. The low success rates are due to the November time period. This intervention data will be collected again in May 2018.

The analysis of the November Intervention Tracking data suggests that teachers are implementing the strategies they were taught. However, more direct fidelity of implementation data was collected in February and March 2018 with the Literacy Observation Checklist. This checklist measures the extent to which teachers who have been trained on the Core Reading program are implementing what they were taught. This checklist was completed for a sample of teachers from each of the pilot districts by a trained expert observer. This analysis indicates that 73% of observed teachers were implementing the instructional strategies with fidelity.

Below are two data charts: Display 1 and Display 2. Display 1 shows the progress on the SiMR. From spring 2015 to spring 2016, the percentage of students with SLD scoring proficient on the 3rd grade state reading test increased by almost 2.5 percentage points. While the spring 2016 target was not met, the proficiency rate did increase. However, in spring 2017, the percent scoring proficient decreased by about .5 percentage points. Once again, the target was not met.

Given the decline in the percent of students meeting the SiMR, the SEP examined the scale scores of students to determine if students are making progress within a given performance level, even if they are not increasing their performance enough to make it to the proficiency performance level. This analysis shows that the percentage of grade 3 students with SLD in the Basic performance level scoring at the median or higher score within this performance level has increased from spring 2015 to spring 2017. In spring 2015, 42% of these students scored at or above this level; in spring 2016, 44% did; in spring 2017, 50% did. If the SEP conducts this same analysis using the 75th percentile score within this level as the "cut-score," the SEP found a similar pattern. In spring 2015, 23% of these students scored at or above the 75th percentile score; in spring 2016, 19% did; in spring 2017 35% did. Unfortunately, when the SEP conducted this same analysis for grade 3 students with SLD scoring at the Below Basic performance level, the SEP found a smaller percentage of these students scoring at the high end of this performance level.

Display 2 shows the percentage of students with SLD meeting benchmark in the fall of 2016 and in the spring of 2017. This data shows that the percentage of grade 1 students meeting benchmark increased from fall to spring, but the percentage of students in grades K, 2, and 3 meeting benchmark decreased from fall to spring. The SEP SSIP Core Team will continue to evaluate this data for all grades to determine if changes in improvement strategies need to take place for students in grades K-3. One suggestion is that while the percent meeting benchmark did not increase from fall to spring, the percent showing growth did increase. The SEP SSIP Core Team will be analyzing this for 2017-18.

Pilot Districts

Display 2: Percentage of Students with a Specific Learning Disability Meeting the Benchmark in Fall and Spring 2016-17

F. Plans for Next Year

1. Additional activities to be implemented next year, with timeline
2. Planned evaluation activities including data collection, measures, and expected outcomes
3. Anticipated barriers and steps to address those barriers
4. The State describes any needs for additional support and/or technical assistance

Thinking ahead to the 2018-2019 school year, SEP will work with pilot districts on continued implementation, phasing out SEA direct support and having districts assume the responsibility for implementation within the district. The SEA will continue to offer state-level training for pilot districts. New districts will be incorporated as a result of the award of the SPDG. The goal of the SPDG is to develop a systematic, cohesive, collaborative, and sustainable evidence-based state literacy model that uses data and engages families and can be implemented with any district needing support for struggling readers, especially students with SLD. The grant will support the SEP and the Division of Learning and Instruction to develop and align professional learning and development (PLD) system that provides special education and general educators with the knowledge and skills necessary to provide access and instruction to students with SLD such that their proficiency in literacy increases. There are three overarching goals of the SPDG which closely align and incorporate the work of the SSIP. They include:

1. Developing a system that:
 1. Supports struggling readers (Specific Learning Disabilities) K-5
 2. Utilizes data-driven decision making
 3. Implements an evidence-based literacy model
 4. Embeds coaching to ensure fidelity of implementation models
 5. Provides a cohesive and collaborative system
 6. Engages families
 7. Develops a sustainability plan after five year grant completion
2. Bringing Initiatives Together:
 1. DOE Aspirational Goal - Students enter 4th grade proficient in reading
 1. State Systemic Improvement Plan (SSIP) Goal - Students with SLD will increase reading proficiency prior to 4th grade
 2. Multi-tiered Systems of Support (MTSS) Goal - Create structures necessary for system-wide change to improve instructional decision making and practices
 3. State Plan to Support Struggling Readers including Students with Dyslexia - Use the Rtl process to identify students with SLD
 4. State Personnel Development Grant (SPDG) newly awarded in 2017
3. Creating a Structure for Sustainability with Multi-tiered System of Supports Framework:
 1. Provide leadership to all staff
 2. Use the problem solving method to make decisions
 3. Use assessment data regularly to monitor student progress
 4. Implement evidence-based literacy strategies
 5. Engage families in the learning process for students

SEP has identified six SPDG implementation districts. One district is currently an SSIP pilot district that was only implementing with Special Education teachers, but by participating in the SPDG, they will implement school-wide.

SPDG Timeline of Implementation Training	
Date	Purpose
April 2018	SPDG kickoff meeting
May 29,30, and 31, 2018	Coaching Training (open to SSIP districts to attend)
June 4, 2018	District Leadership Training (open to SSIP districts to attend)
June 13 and 14, 2018	CORE Training (open to SSIP districts to attend)
August 2018	Data Analysis Training (open to SSIP districts to attend)

The SPDG State Leadership Team has nearly identical membership as the SEP SSIP Core Team with a few expanded members. For the initial implementation of the SPDG, the State Leadership Team will operate separate from the SEP SSIP Core Team and will meet monthly. A plan will be developed to phasing out the SEP SSIP Core Team with the mission to be completed by the SPDG State Leadership Team. The SPDG project also has an advisory panel that, for the initial implementation of the SPDG, will operate separate from the Large Stakeholder Group. A plan will be developed to have members with the same role serve on both groups with the goal of phasing out the Large Stakeholder Group and the activities of the group being completed by the SPDG Advisory Panel. The SEP SSIP Core Team and pilot districts will continue to meet on a regular basis to assess implementation efforts. The SEP SSIP Core Team Lead will schedule on-site visits with each of the pilot districts to determine implementation information (including fidelity), assess any technical assistance or professional development needs, and provide direct support to key district personnel.

FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

Large Stakeholder Group/SPDG Advisory Panel Face-to-Face Meeting Activities		
Date	Location	Purpose
June 2018	Conference call	Infrastructure Planning and Implementation Review and Implementation of Theory of Action Merging SPDG districts into SSIP
October 2018	Fort Pierre, SD	SSIP Data Analysis Discussion and Infrastructure Changes Implementation Discussion
February 2019	Fort Pierre, SD	Discussion on APR submission for Indicator 17 Review of data and progress towards targets Planning for continued implementation

SSIP Small Stakeholder Group Conference Calls	
Date	Purpose
May 2018	TA and Support
August 2018	TA and Support
November 2018	TA and Support
March 2019	TA and Support

The Detailed Evaluation Questions document (see *Appendix B*) will continue on schedule. The SPDG includes identical or similar evaluation components and plans will be developed to enable the reporting of data for both projects, eventually merging the data collection.

A major evaluation focus this next year will be conducting further data analysis of the students that are performing at the Below Basic level to determine a root cause for the minimal progress they have shown within the performance band. Considerations that will be investigated further include the least restrictive environment of the students to see if their environment is impacting their access to literacy instruction. The assumption would be that the more access a student has to the general curriculum and core reading instruction in conjunction with tiered and specialized instruction, the greater the likelihood that the student would progress compared to students that were removed for longer durations from the general curriculum. The DOE as a whole is examining the drop in reading scores more closely as it affected the total student population.

Another avenue to explore would be to follow the same students as they progress beyond the beginning of fourth grade to see if they maintain or gain performance. Finally, as districts have made improvements to core instructional practices, there may be a need to shift focus to providing additional supports for Tier 2 and 3 instructional strategies. This will be explored by the stakeholder groups in the fall of 2018.

There are several anticipated barriers the SEP SSIP Core Team and stakeholders will consider as the state continues its efforts to fully implement and evaluate the SSIP activities as well as merging the existing SSIP implementation with the SPDG. Some barriers include district commitment to SSIP efforts as direct support is reduced and determining cause for minimal progress of students who are scoring at the Below Basic level. The other barrier will be coordinating the SSIP and SPDG to an integrated system.

Regarding fully implementing and evaluation of the SSIP, there has been some concern from pilot districts that as the state phases out direct support and as districts are to continue implementation, there will not be enough resources to continue professional development and evaluation at the level it is currently being implemented. To address this, the state will offer ongoing professional development opportunities. For districts that will be implementing the SPDG, a coaching component was added to improve the fidelity of implementation and district ownership for long-term implementation by growing their own staff internally instead of being provided outside support. An additional concern is that some pilot districts noted that the selection and adoption of new literacy curriculum that aligns with research-based best practices and meets the needs of their students can be a barrier. The SEP SSIP Core Team will support districts by working with national technical assistance centers, other states, and within the state to identify or develop and share checklists and resources that will serve as a resource to align curriculum and instructional practices. Each district has a CORE Teaching Reading Sourcebook trainer who can assist with the process. The trainer can assist district teams in identifying best practices and gaps in the curriculum samples. When a district has adopted their new literacy curriculum, the district's Core Teaching Reading Sourcebook trainer can lead teachers in identify key skills and practices and leverage their previous training to maximize the new materials.

As stated in the SPDG implementation plan, the project is designed to use the strategies of data-driven decision-making, evidence-based literacy practices, and family involvement and engagement to develop a systematic, cohesive, collaborative, and sustainable structure for professional learning, all of which align well to the Four Standards of Action illustrated in the SSIP Theory of Action. To ensure the implementation of the SPDG coordinates with the components of the SSIP, the SPDG and SSIP implementation will run parallel during the end of the 2017 and 2018-2019 school year as certain components of the SPDG are rolled out. The SEP SSIP Core Team will collaborate closely with the SPDG Leadership Team to ensure the alignment of efforts.

Finally as discussed in Section E., the SEP SSIP Core Team will examine and present to stakeholders for analysis and planning the theory that students with SLD in the lower elementary are being remediated to the degree that they no longer qualify for special education services and therefore are not captured in the target population when measuring performance on the statewide assessment.

SEP will continue to take steps to leverage existing efforts across districts and DOE divisions to achieve higher outcomes for all students. SEP will continue to work with the pilot districts to maximize time and effectiveness of trainings and through the collection of interim short-term data in order to make adjustments to infrastructure needs. SEP expects data to demonstrate that when teachers acquire evidenced-based reading instructional skills and implement with fidelity

FFY 2016 Part B State Performance Plan (SPP)/Annual Performance Report (APR)
that student performance will increase.

Additional supports needed to continue effective implementation include federal technical assistance in the form of sharing out what other states are doing to mitigate common barriers to implementation, providing clear guidance on expectations regarding implementation of SSIP activities with fidelity, and helping build knowledge and capacity for literacy strategies and implementation. SEP actively participates in the activities and utilizes the tools available through the national technical assistance centers including NSCI, IDC, CIFR, CIID, SIG, and NCIL.
