

**State Performance Plan / Annual Performance Report:
Part B**

for
STATE FORMULA GRANT PROGRAMS
under the
Individuals with Disabilities Education Act

**For reporting on
FFY18**

South Dakota

PART B DUE February 3, 2020

**U.S. DEPARTMENT OF EDUCATION
WASHINGTON, DC 20202**

Introduction

Instructions

Provide sufficient detail to ensure that the Secretary and the public are informed of and understand the State's systems designed to drive improved results for students with disabilities and to ensure that the State Educational Agency (SEA) and Local Educational Agencies (LEAs) meet the requirements of IDEA Part B. This introduction must include descriptions of the State's General Supervision System, Technical Assistance System, Professional Development System, Stakeholder Involvement, and Reporting to the Public.

Intro - Indicator Data

Executive Summary

Number of Districts in your State/Territory during reporting year

149

General Supervision System

The systems that are in place to ensure that IDEA Part B requirements are met, e.g., monitoring, dispute resolution, etc.

South Dakota has a variety of ways to ensure that IDEA Part B requirements are met.

South Dakota's general supervision encompasses a review of local education agency (LEA) special education programs on a five-year cycle. The review incorporates an analysis of compliance through State Performance Plan (SPP) indicators, state assessment accommodation verification, dispute resolution follow-up, and fiscal reviews.

South Dakota's review cycle distributes LEAs and educational agencies over a five-year period. Each LEA review includes a review of LEA child count data in comparison to state level reporting, Indicator 13 data collection, one-on-one teacher file reviews, verification of certification and highly qualified status of special education staff, and a representative file review across disability categories and age levels. If relevant to the LEA, a review may also include a review of private school eligibility and service plans, program purchases, extraordinary cost fund program file reviews, and other relevant areas.

LEAs may receive an on-site or off-site focused review. Focused reviews are generally related to corrective action received from a complaint or due process submission, disproportionality, and extraordinary cost funding. Monitoring team leaders review specific areas related to the issue in the complaint or due process hearing to verify continued correction. If the LEA's performance on SPP compliance indicator(s) did not meet the target, then a focused review will occur to determine whether or not a systemic issue is present.

If non-compliance has been identified, a finding in the form of a corrective action plan (CAP) is issued by Special Education Programs (SEP). The CAP includes the specific non-compliance issue, citation of the statute or regulation, and/or data supporting the conclusion. The LEA will correct all areas of non-compliance as soon as possible, but no later than one year from the written notification. The LEA will demonstrate correction by submitting supporting documentation for the correction of each individual case identified (Prong 1) as well as documentation of correction of the regulatory requirements (Prong 2) as required by the OSEP 09-02 Memorandum. Part of the corrective action may include targeted technical assistance overseen by SEP. Correction and compliance in conformance with the OSEP 09-02 Memorandum is verified by SEP.

Fiscal monitoring includes the review and approval of the application LEAs submit to the Department of Education (DOE) to apply for IDEA 611 and 619 funds. SEP reviews each application to ensure it meets program requirements using a multi-faceted approach. Once approved by the SEP program representative and assistant director, the Grants Management Office reviews the application to ensure the budget and program costs are aligned and allowable. Grants Management also verifies that the LEA has met Maintenance of Effort (MOE) requirements. Grants Management conducts a final review before sign-off from the Grants Management and SEP Director.

When the DOE conducts a fiscal review of the IDEA 611 and 619 funds, the LEA submits their accounting records. Grants Management compares accounting records with reimbursement requests and the grant application for the IDEA Part B 611, IDEA Part B 619, coordinated early intervening services (CEIS), and private schools proportionate share. The following are reviewed:

1. The DOE ensures, if the LEA utilized voluntary CEIS funds up to 15%, that funds are provided to non-identified students (not on an IEP) through fiscal review and special education monitoring review. The LEA separately tracks and accounts for IDEA funds used for CEIS in the accounting software.
2. MOE is reviewed and a determination is made as to whether the LEA is in compliance or if MOE needs to be addressed.
3. If the LEA has a private school, the DOE verifies the public LEA expended the required proportionate share indicated on the federal IDEA budget. If the LEA purchased equipment, the DOE verifies appropriateness of the expenditure and that the LEA maintained control over all IDEA funds, property, equipment, and supplies at the private school. Also, the DOE determines whether or not the LEA used private school personnel to provide equitable services, services were performed outside of the regular duty hours and under the supervision of the public agency.
4. DOE determines how the LEA identifies the private school expenses in their financial software.

The DOE does a fiscal cross-cutting to ensure the LEA is supplementing and not supplanting federal funds. DOE will check whether or not the LEA generated any program income and compares time and effort documentation against the general ledger. If the LEA purchased equipment with federal funds, the DOE requests the property records to ensure that the equipment is reasonable and necessary to implement the IEP. During onsite monitoring, SEP confirms the item(s) purchased have been appropriately labeled and inventoried according to program requirements. The DOE identifies whether or not adequate controls are in place to ensure safeguarding and maintaining equipment (including a physical inventory reconciled at least every other year). The DOE verifies procurement is in place, and if necessary, collects documentation supporting vendor selection. If there are third party contractors, the DOE checks to see whether or not they are approved and monitored by the LEA.

Technical Assistance System

The mechanisms that the State has in place to ensure the timely delivery of high quality, evidenced based technical assistance and support to LEAs.

SEP provides technical assistance to LEAs utilizing different methods to reach as many constituents as possible in the manner that best meets their needs.

Technical Assistance documents are developed to help clarify policies and procedures to ensure LEAs are able to implement the IDEA and state requirements. The documents are posted on the SEP webpage, shared with constituents at conferences and webinars, and notices of availability are sent on the special education listserv. Monthly Special Education Director Webinars are provided, recorded, and posted for later reference. Webinar topics include upcoming data collections, TA on needed areas identified through monitoring or complaints, and updates on policies. SEP keeps open lines of communication with LEAs through topical listservs and through assigned region representatives. This ensures all constituents are able to access prompt, high quality technical support.

In order to provide topical and in-depth assistance, SEP utilizes contracted specialists. This includes (but is not limited to):

1. Education Specialists. These individuals are contracted through educational cooperatives to conduct on-site monitoring reviews. They also conduct regional trainings around Individual Education Plans and High School Transition for teachers, present at teacher preparation programs, and conduct trainings related to corrective action plans. Education Specialists are involved in the Results-Driven Accountability pilot project that began in 2017-2018 school year.
2. Transition Services Liaison Project (TSLP). This program is a collaborative partnership between the DOE and Department of Human Services (Division of Rehabilitation Services). TSLP staff are regionally located and focus on supporting high school transitions. They make one-on-one connections with high school special education teachers and personnel. They provide technical assistance in writing compliant Individual Education Plans (IEP), locate resources for evidence-based practices, and link adult agencies with LEA personnel, students and families.
3. Multi-Tiered System of Supports (MTSS) Coordinators. These individuals work directly with LEAs to implement a continuous-improvement framework in which data-based problem-solving and decision-making are practiced across all levels of the educational system for supporting students. The coordinators are trained in Response to Intervention (RtI) and Positive Behavioral Interventions and Supports (PBIS) processes.
4. Educational Cooperatives and the Center for Disabilities. These organizations provide specialized training and technical assistance in areas of regional and statewide need as identified through monitoring and LEA input.
5. The Navigator Program. This program is contracted through South Dakota Parent Connection. Each Navigator Program provider serves as an objective and neutral party while assisting parents and school personnel. Navigators also assist in locating and utilizing information, improving communication, building (or re-building) partnerships, and making progress towards mutual agreements.

Professional Development System

The mechanisms the State has in place to ensure that service providers have the skills to effectively provide services that improve results for students with disabilities.

Professional development is provided in a variety of ways due to South Dakota's large area and rural nature. South Dakota has 77,121 square miles and of the 149 LEAs, 30 have enrollment 200 or less, 77 LEAs have enrollment between 201 and 600, and 42 LEAs have enrollment of over 600. State, regional, and webinar training allows LEA staff to access appropriate professional development. Contractors are hired to provide direct technical assistance in the LEA. SEP professional development revolves around data collection, IEP process, behavior, response to intervention, instructional coaching, and other pertinent areas. Professional development areas are identified through monitoring, LEA input, and input from the stakeholder groups (including the South Dakota Advisory Panel for Children with Disabilities and South Dakota Parent Connection).

IEP process workshops are held every fall across South Dakota. This year SEP offered seven sets of IEP workshops with the option to attend 1 or more sessions. The day one option targeted new special education staff and covered the IEP process from referral, evaluation, eligibility to IEP development. Day two covered focused topics related to issues that the SEP identified as areas of concern statewide based on accountability review data. Day three focused on the high school transition and IEP processes. New this year an early childhood workshop was offered that covered Part C to Part B transition, preschool outcomes, and least restrictive environments.

SEP develops a monthly newsletter, distributes it through the listserv, and posts it to the web. The newsletter includes SEP highlights, federal updates, the agenda for monthly Special Education Director webinars, and features a general and special education program area. The newsletter includes professional development opportunities available for teachers and administrators. A Special Education Director Webinar is held every third Tuesday of the month and is recorded for viewing later at <https://doe.sd.gov/sped/directors.aspx>. The webinars inform special education directors and other interested parties about information and changes at the federal and state level, initiatives, data collection, and other DOE information.

In 2018, SEP 619 Programs developed an online Battelle Developmental Inventory II (BDI2) course for South Dakota evaluators to increase reliability and fidelity in the state for eligibility and progress monitoring purposes. The online course provides an overview of scoring, standardization, and fidelity surrounding administration of the BDI2.

SEP partners with The Center for Technical Assistance for Excellence in Special Education (TAESE) to offer webinar trainings on specialized topics and the recordings are placed on the web. Topics include challenges in evaluating, classifying and programming for English learners, individual health plans, prior written notice, transportation, surrogate parents, Who is the Parent?, accommodations, legal updates, general educators role in special education, and discipline. A new special education director webinar series is conducted each year targeting five areas of general supervision including the state performance plan, budget and fiscal, dispute resolution, accountability, and child count. All webinar recordings are posted at <https://doe.sd.gov/sped/webinars.aspx>.

Face to face trainings occur regionally around the state. Trainings span a variety of topics, including (but not limited to) discipline, early childhood, writing effective behavior plans, writing standards based IEPs, facilitation of IEP meetings, transition training, parental engagement and connecting with youth, and instructional strategies.

SEP sponsors speakers at conferences of partnering organizations focused on meeting the needs of students with disabilities. These include the Youth Leadership Forum, the Early Childhood conference, and SD Speech and Language Pathologist Association conference. SEP hosts two major conferences each year. One targets special education professionals, and the other targets all educators with a focus on making learning accessible for all students.

Entities such as the Center for Disabilities and the Augmentative and Alternative Communication Workgroup provide frequent and timely feedback and technical assistance through Skype, Facetime, and other avenues.

By utilizing a diverse range of technical assistance delivery methods and platforms, SEP ensures access to timely and high-quality professional

development for all stakeholders statewide.

Stakeholder Involvement

The mechanism for soliciting broad stakeholder input on targets in the SPP, including revisions to targets.

SEP values broad stakeholder representation. Stakeholder groups include representation from various departments, special education administrators, superintendents and building principals, teachers (including general and special educators), South Dakota Parent Connection staff, professors, parents, educational cooperative staff, advisory panel members, and contractors. To ensure a representative sample that reflects diversity across South Dakota, SEP includes stakeholders from varying geographic areas and LEA enrollment sizes.

SEP staff collaborates across departments throughout the DOE. All nine staff are integrated and assist other offices in the implementation of regulations and strategies to improve results. DOE participates in cross-department stakeholder meetings, DOE strategic planning sessions, and other projects.

Once a stakeholder group has made recommendations, proposed decisions are shared during South Dakota Advisory Panel for Children with Disabilities meetings and Special Education Director Webinars for additional input. The Special Education Director Webinars have approximately 60 live participants and many listen to the recording located on the SEP website.

Stakeholder groups met related to the FFY 2018 SPP/APR and SSIP on February 9, April 27, September 18, and October 2, 2018. Input was sought from the South Dakota Advisory Panel for Children with Disabilities at the January 23, 2020 meeting.

Apply stakeholder involvement from introduction to all Part B results indicators (y/n)

NO

Reporting to the Public

How and where the State reported to the public on the FFY17 performance of each LEA located in the State on the targets in the SPP/APR as soon as practicable, but no later than 120 days following the State's submission of its FFY 2017 APR, as required by 34 CFR §300.602(b)(1)(i)(A); and a description of where, on its Web site, a complete copy of the State's SPP, including any revision if the State has revised the SPP that it submitted with its FFY 2017 APR in 2019, is available.

Following the submission of the SPP and APR to the U.S. Department of Education, SEP disseminated the FFY 2017 SPP and APR, and LEA information in the following ways:

1. Posted the final version and SPP, APR, LEA information and 618 tables on the agency website at <http://doe.sd.gov/sped/SPP.aspx>.
2. Published Public Notices in the five (5) major South Dakota newspapers to notify the public of the website <http://doe.sd.gov/sped/SPP.aspx> where the SPP and APR can be accessed. Hard copies of the reports were made available upon request.

The SEA disseminated the information by:

1. Alerting constituency groups via existing listservs, email and workshops.
2. SEP program staff presents current SPP/APR information to the Special Education Advisory Panel for Children with Disabilities in January and to LEA administrators/special education directors in February.
3. South Dakota Parent Connection shares via newsletter and weekly updates with parents how to access the publication of the FFY 2017 SPP and APR on the SEP website.
4. Providing electronic copies to all South Dakota Advisory Panel for Children with Disabilities members.
5. Providing access to alternative formats of this document (e.g., Braille, large print, hard copy, or digital) on request. Alternative forms can be requested at:

South Dakota Department of Education Attn: Special Education Programs
800 Governor's Drive
Pierre, SD 57501-2294

SEP publicly reports at the LEA level on the required indicators as soon as practical, but no later than 120 days following the State's submission of its APR each year. Public reporting information on the State 618 data tables are available for those federal data tables that have been released. Access to this information can be found on the SEP website at the following link: <https://doe.sd.gov/sped/SPP.aspx>.

Intro - Prior FFY Required Actions

In the FFY 2018 SPP/APR, the State must report FFY 2018 data for the State-identified Measurable Result (SiMR). Additionally, the State must, consistent with its evaluation plan described in Phase II, assess and report on its progress in implementing the SSIP. Specifically, the State must provide: (1) a narrative or graphic representation of the principal activities implemented in Phase III, Year 4; (2) measures and outcomes that were implemented and achieved since the State's last SSIP submission (i.e., April 1, 2019); (3) a summary of the SSIP's coherent improvement strategies, including infrastructure improvement strategies and evidence-based practices that were implemented and progress toward short- and long-term outcomes that are intended to impact the SiMR; and (4) any supporting data that demonstrates that implementation of these activities are impacting the State's capacity to improve its SiMR data.

Response to actions required in FFY 2017 SPP/APR

Intro - OSEP Response

Intro - Required Actions

Indicator 1: Graduation

Instructions and Measurement

Monitoring Priority: FAPE in the LRE

Results indicator: Percent of youth with Individualized Education Programs (IEPs) graduating from high school with a regular high school diploma. (20 U.S.C. 1416 (a)(3)(A))

Data Source

Same data as used for reporting to the Department of Education (Department) under Title I of the Elementary and Secondary Education Act (ESEA).

Measurement

States may report data for children with disabilities using either the four-year adjusted cohort graduation rate required under the ESEA or an extended-year adjusted cohort graduation rate under the ESEA, if the State has established one.

Instructions

Sampling is not allowed.

Describe the results of the State's examination of the data for the year before the reporting year (e.g., for the FFY 2018 SPP/APR, use data from 2017-2018), and compare the results to the target. Provide the actual numbers used in the calculation.

Provide a narrative that describes the conditions youth must meet in order to graduate with a regular high school diploma and, if different, the conditions that youth with IEPs must meet in order to graduate with a regular high school diploma. If there is a difference, explain.

Targets should be the same as the annual graduation rate targets for children with disabilities under Title I of the ESEA.

States must continue to report the four-year adjusted cohort graduation rate for all students and disaggregated by student subgroups including the children with disabilities subgroup, as required under section 1111(h)(1)(C)(iii)(II) of the ESEA, on State report cards under Title I of the ESEA even if they only report an extended-year adjusted cohort graduation rate for the purpose of SPP/APR reporting.

1 - Prior FFY Required Actions

None

Response to actions required in FFY 2017 SPP/APR

1 - OSEP Response

1 - Required Actions

Indicator 2: Drop Out

Instructions and Measurement

Monitoring Priority: FAPE in the LRE

Results indicator: Percent of youth with IEPs dropping out of high school. (20 U.S.C. 1416 (a)(3)(A))

Data Source

OPTION 1:

Same data as used for reporting to the Department under section 618 of the Individuals with Disabilities Education Act (IDEA), using the definitions in ED Facts file specification C009.

OPTION 2:

Use same data source and measurement that the State used to report in its FFY 2010 SPP/APR that was submitted on February 1, 2012.

Measurement

OPTION 1:

States must report a percentage using the number of youth with IEPs (ages 14-21) who exited special education due to dropping out in the numerator and the number of all youth with IEPs who left high school (ages 14-21) in the denominator.

OPTION 2:

Use same data source and measurement that the State used to report in its FFY 2010 SPP/APR that was submitted on February 1, 2012.

Instructions

Sampling is not allowed.

OPTION 1:

Use 618 exiting data for the year before the reporting year (e.g., for the FFY 2018 SPP/APR, use data from 2017-2018). Include in the denominator the following exiting categories: (a) graduated with a regular high school diploma; (b) received a certificate; (c) reached maximum age; (d) dropped out; or (e) died.

Do not include in the denominator the number of youths with IEPs who exited special education due to: (a) transferring to regular education; or (b) who moved, but are known to be continuing in an educational program.

OPTION 2:

Use the annual event school dropout rate for students leaving a school in a single year determined in accordance with the National Center for Education Statistic's Common Core of Data.

If the State has made or proposes to make changes to the data source or measurement under Option 2, when compared to the information reported in its FFY 2010 SPP/APR submitted on February 1, 2012, the State should include a justification as to why such changes are warranted.

Options 1 and 2:

Data for this indicator are "lag" data. Describe the results of the State's examination of the data for the year before the reporting year (e.g., for the FFY 2018 SPP/APR, use data from 2017-2018), and compare the results to the target.

Provide a narrative that describes what counts as dropping out for all youth and, if different, what counts as dropping out for youth with IEPs. If there is a difference, explain.

2 - Indicator Data

Has your State made or proposes to make changes to the data source under Option 2, when compared to the information reported in its FFY 2010 SPP/APR submitted on February 1, 2012? (yes/no)

NO

If yes, provide justification for the changes below.

Use a different calculation methodology (yes/no)

YES

Change numerator description in data table (yes/no)

NO

Change denominator description in data table (yes/no)

YES

If use a different calculation methodology is yes, provide an explanation of the different calculation methodology

South Dakota calculates dropout percentage based on the number of students age 14-21 with IEPs who dropped out, divided by the number of students with disabilities on child count age 14-21. The calculation represents the percentage of students with IEPs who dropped out on a yearly basis.

FFY 2018 SPP/APR Data

Number of youth with IEPs who exited special education due to dropping out	Total number of High School Students with IEPs by Cohort	FFY 2017 Data	FFY 2018 Target	FFY 2018 Data	Status	Slippage
156	5,187	3.30%	2.40%	3.01%	Did Not Meet Target	No Slippage

Provide reasons for slippage, if applicable

XXX

Provide a narrative that describes what counts as dropping out for all youth

A dropout is defined as a student that:

- 1) Was enrolled in school at some time during the school year;
- 2) Was not enrolled on the last day of school;
- 3) Has not graduated from high school or completed a state approved program;
- 4) Does not meet any of the following exclusionary conditions:

Transfer to another accredited education program, Temporary absence due to suspension or illness, Excused from public school attendance (SDCL 13-27-3), Death

5) A student who has moved and is not known to continue in another district.

Is there a difference in what counts as dropping out for youth with IEPs? (yes/no)

NO

If yes, explain the difference in what counts as dropping out for youth with IEPs below.

Provide additional information about this indicator (optional)

2 - Prior FFY Required Actions

None

Response to actions required in FFY 2017 SPP/APR

Indicator 3B: Participation for Students with IEPs

Instructions and Measurement

Monitoring Priority: FAPE in the LRE

Results indicator: Participation and performance of children with IEPs on statewide assessments:

- A. Indicator 3A – Reserved
- B. Participation rate for children with IEPs
- C. Proficiency rate for children with IEPs against grade level and alternate academic achievement standards.

(20 U.S.C. 1416 (a)(3)(A))

Data Source

3B. Same data as used for reporting to the Department under Title I of the ESEA, using ED Facts file specifications FS185 and 188.

Measurement

B. Participation rate percent = [(# of children with IEPs participating in an assessment) divided by the (total # of children with IEPs enrolled during the testing window)]. Calculate separately for reading and math. The participation rate is based on all children with IEPs, including both children with IEPs enrolled for a full academic year and those not enrolled for a full academic year.

Instructions

Describe the results of the calculations and compare the results to the targets. Provide the actual numbers used in the calculation.

Include information regarding where to find public reports of assessment participation and performance results, as required by 34 CFR §300.160(f), i.e., a link to the Web site where these data are reported.

Indicator 3B: Provide separate reading/language arts and mathematics participation rates, inclusive of all ESEA grades assessed (3-8 and high school), for children with IEPs. Account for ALL children with IEPs, in all grades assessed, including children not participating in assessments and those not enrolled for a full academic year. Only include children with disabilities who had an IEP at the time of testing.

3B - Indicator Data

Reporting Group Selection

Based on previously reported data, these are the grade groups defined for this indicator.

Regulatory Information

The SEA, (or, in the case of a district-wide assessment, LEA) must make available to the public, and report to the public with the same frequency and in the same detail as it reports on the assessment of nondisabled children: (1) the number of children with disabilities participating in: (a) regular assessments, and the number of those children who were provided accommodations in order to participate in those assessments; and (b) alternate assessments aligned with alternate achievement standards; and (2) the performance of children with disabilities on regular assessments and on alternate assessments, compared with the achievement of all children, including children with disabilities, on those assessments. [20 U.S.C. 1412 (a)(16)(D); 34 CFR §300.160(f)]

Public Reporting Information

Provide links to the page(s) where you provide public reports of assessment results.

Provide additional information about this indicator (optional)

3B - Prior FFY Required Actions

None

Response to actions required in FFY 2017 SPP/APR

3B - OSEP Response

3B - Required Actions

Indicator 3C: Proficiency for Students with IEPs

Instructions and Measurement

Monitoring Priority: FAPE in the LRE

Results indicator: Participation and performance of children with IEPs on statewide assessments:

- A. Indicator 3A – Reserved
- B. Participation rate for children with IEPs
- C. Proficiency rate for children with IEPs against grade level and alternate academic achievement standards.

(20 U.S.C. 1416 (a)(3)(A))

Data Source

3C. Same data as used for reporting to the Department under Title I of the ESEA, using EDFacts file specifications FS175 and 178.

Measurement

C. Proficiency rate percent = [(# of children with IEPs scoring at or above proficient against grade level and alternate academic achievement standards) divided by the (total # of children with IEPs who received a valid score and for whom a proficiency level was assigned)]. Calculate separately for reading and math. The proficiency rate includes both children with IEPs enrolled for a full academic year and those not enrolled for a full academic year.

Instructions

Describe the results of the calculations and compare the results to the targets. Provide the actual numbers used in the calculation.

Include information regarding where to find public reports of assessment participation and performance results, as required by 34 CFR §300.160(f), i.e., a link to the Web site where these data are reported.

Indicator 3C: Proficiency calculations in this SPP/APR must result in proficiency rates for reading/language arts and mathematics assessments (combining regular and alternate) for children with IEPs, in all grades assessed (3-8 and high school), including both children with IEPs enrolled for a full academic year and those not enrolled for a full academic year. Only include children with disabilities who had an IEP at the time of testing.

3C - Indicator Data

Reporting Group Selection

Based on previously reported data, these are the grade groups defined for this indicator.

3C - Prior FFY Required Actions

None

Response to actions required in FFY 2017 SPP/APR

3C - OSEP Response

3C - Required Actions

Indicator 4A: Suspension/Expulsion

Instructions and Measurement

Monitoring Priority: FAPE in the LRE

Results Indicator: Rates of suspension and expulsion:

- A. Percent of districts that have a significant discrepancy in the rate of suspensions and expulsions of greater than 10 days in a school year for children with IEPs

(20 U.S.C. 1416(a)(3)(A); 1412(a)(22))

Data Source

State discipline data, including State's analysis of State's Discipline data collected under IDEA Section 618, where applicable. Discrepancy can be computed by either comparing the rates of suspensions and expulsions for children with IEPs to rates for nondisabled children within the LEA or by comparing the rates of suspensions and expulsions for children with IEPs among LEAs within the State.

Measurement

Percent = [(# of districts that meet the State-established n size (if applicable) that have a significant discrepancy in the rates of suspensions and expulsions for greater than 10 days in a school year of children with IEPs) divided by the (# of districts in the State that meet the State-established n size (if applicable))] times 100.

Include State's definition of "significant discrepancy."

Instructions

If the State has established a minimum n size requirement, the State may only include, in both the numerator and the denominator, districts that met that State-established n size. If the State used a minimum n size requirement, report the number of districts excluded from the calculation as a result of this requirement.

Describe the results of the State's examination of the data for the year before the reporting year (e.g., for the FFY 2018 SPP/APR, use data from 2017-2018), including data disaggregated by race and ethnicity to determine if significant discrepancies are occurring in the rates of long-term suspensions and expulsions of children with IEPs, as required at 20 U.S.C. 1412(a)(22). The State's examination must include one of the following comparisons:

- The rates of suspensions and expulsions for children with IEPs among LEAs within the State; or
- The rates of suspensions and expulsions for children with IEPs to nondisabled children within the LEAs

In the description, specify which method the State used to determine possible discrepancies and explain what constitutes those discrepancies.

Indicator 4A: Provide the actual numbers used in the calculation (based upon districts that met the minimum n size requirement, if applicable). If significant discrepancies occurred, describe how the State educational agency reviewed and, if appropriate, revised (or required the affected local educational agency to revise) its policies, procedures, and practices relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards, to ensure that such policies, procedures, and practices comply with applicable requirements.

Provide detailed information about the timely correction of noncompliance as noted in OSEP's response for the previous SPP/APR. If discrepancies occurred and the district with discrepancies had policies, procedures or practices that contributed to the significant discrepancy and that do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards, describe how the State ensured that such policies, procedures, and practices were revised to comply with applicable requirements consistent with the Office of Special Education Programs (OSEP) Memorandum 09-02, dated October 17, 2008.

If the State did not ensure timely correction of the previous noncompliance, provide information on the extent to which noncompliance was subsequently corrected (more than one year after identification). In addition, provide information regarding the nature of any continuing noncompliance, improvement activities completed (e.g., review of policies and procedures, technical assistance, training, etc.) and any enforcement actions that were taken.

If the State reported less than 100% compliance for the previous reporting period (e.g., for the FFY 2018 SPP/APR, the data for 2017-2018), and the State did not identify any findings of noncompliance, provide an explanation of why the State did not identify any findings of noncompliance.

Target <=	33.33%	33.33%

Targets: Description of Stakeholder Input

XXX

FFY 2018 SPP/APR Data

Has the state established a minimum n-size requirement? (yes/no)

YES

If yes, the State may only include, in both the numerator and the denominator, districts that met the State-established n size. Report the number of districts excluded from the calculation as a result of the requirement.

147

Number of districts that have a significant discrepancy	NUMBER OF DISTRICTS THAT MET THE STATE'S MINIMUM N SIZE	FFY 2017 Data	FFY 2018 Target	FFY 2018 Data	Status	Slippage
0	3	0.00%	33.33%	0.00%	Met Target	No Slippage

Provide reasons for slippage, if applicable

XXX

Choose one of the following comparison methodologies to determine whether significant discrepancies are occurring (34 CFR §300.170(a))

Compare the rates of suspensions and expulsions of greater than 10 days in a school year for children with IEPs among LEAs in the State

State's definition of "significant discrepancy" and methodology

South Dakota's definition of significant discrepancy for Part A means more than 5% of the unduplicated students with disabilities at the LEA level with 10 or more students included in the numerator and the LEA child count included in the denominator. South Dakota chose this option for analyzing suspension data because the South Dakota Department of Education does not collect data on suspensions of students who are not on IEPs in a format that allows a comparison between the two groups.

IEP students suspended or expelled at the LEA >than 10 days in a school year ÷ Child Count at the LEA X 100 = %

Significant Discrepancy: If greater than 5% of the LEA child count population have been suspended for >10 days.

Provide additional information about this indicator (optional)

Review of Policies, Procedures, and Practices (completed in FFY 2018 using FFY17- FFY18 data)

Provide a description of the review of policies, procedures, and practices relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards.

26 LEAs reported suspending one or more students for greater than ten days. Of these LEAs, three met the minimum N size of 10 students for removals and of those three, none had suspended over 5% of their special education students for greater than 10 days and therefore were not required to have a review of policies, procedures, and practices.

The State DID NOT identify noncompliance with Part B requirements as a result of the review required by 34 CFR §300.170(b)

The State must report on the correction of noncompliance in next year's SPP/APR consistent with requirements in the Measurement Table and OSEP Memorandum 09-02, dated October 17, 2008. Please explain why the State did not ensure that policies, procedures, and practices were revised to comply with applicable requirements.

XXX

Describe how the State ensured that such policies, procedures, and practices were revised to comply with applicable requirements consistent with OSEP Memorandum 09-02, dated October 17, 2008.

Indicator 4B: Suspension/Expulsion

Instructions and Measurement

Monitoring Priority: FAPE in the LRE

Results Indicator: Rates of suspension and expulsion:

- B. Percent of districts that have: (a) a significant discrepancy, by race or ethnicity, in the rate of suspensions and expulsions of greater than 10 days in a school year for children with IEPs; and (b) policies, procedures or practices that contribute to the significant discrepancy and do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards.

(20 U.S.C. 1416(a)(3)(A); 1412(a)(22))

Data Source

State discipline data, including State's analysis of State's Discipline data collected under IDEA Section 618, where applicable. Discrepancy can be computed by either comparing the rates of suspensions and expulsions for children with IEPs to rates for nondisabled children within the LEA or by comparing the rates of suspensions and expulsions for children with IEPs among LEAs within the State.

Measurement

Percent = [(# of districts that meet the State-established n size (if applicable) for one or more racial/ethnic groups that have: (a) a significant discrepancy, by race or ethnicity, in the rates of suspensions and expulsions of greater than 10 days in a school year of children with IEPs; and (b) policies, procedures or practices that contribute to the significant discrepancy and do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards) divided by the (# of districts in the State that meet the State-established n size (if applicable) for one or more racial/ethnic groups)] times 100.

Include State's definition of "significant discrepancy."

Instructions

If the State has established a minimum n size requirement, the State may only include, in both the numerator and the denominator, districts that met that State-established n size. If the State used a minimum n size requirement, report the number of districts excluded from the calculation as a result of this requirement.

Describe the results of the State's examination of the data for the year before the reporting year (e.g., for the FFY 2018 SPP/APR, use data from 2017-2018), including data disaggregated by race and ethnicity to determine if significant discrepancies are occurring in the rates of long-term suspensions and expulsions of children with IEPs, as required at 20 U.S.C. 1412(a)(22). The State's examination must include one of the following comparisons

- The rates of suspensions and expulsions for children with IEPs among LEAs within the State; or
- The rates of suspensions and expulsions for children with IEPs to nondisabled children within the LEAs

In the description, specify which method the State used to determine possible discrepancies and explain what constitutes those discrepancies.

Indicator 4B: Provide the following: (a) the number of districts that met the State-established n size (if applicable) for one or more racial/ethnic groups that have a significant discrepancy, by race or ethnicity, in the rates of suspensions and expulsions of greater than 10 days in a school year for children with IEPs; and (b) the number of those districts in which policies, procedures or practices contribute to the significant discrepancy and do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards.

Provide detailed information about the timely correction of noncompliance as noted in OSEP's response for the previous SPP/APR. If discrepancies occurred and the district with discrepancies had policies, procedures or practices that contributed to the significant discrepancy and that do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards, describe how the State ensured that such policies, procedures, and practices were revised to comply with applicable requirements consistent with the Office of Special Education Programs (OSEP) Memorandum 09-02, dated October 17, 2008.

If the State did not ensure timely correction of the previous noncompliance, provide information on the extent to which noncompliance was subsequently corrected (more than one year after identification). In addition, provide information regarding the nature of any continuing noncompliance, improvement activities completed (e.g., review of policies and procedures, technical assistance, training, etc.) and any enforcement actions that were taken.

If the State reported less than 100% compliance for the previous reporting period (e.g., for the FFY 2018 SPP/APR, the data for 2017-2018), and the State did not identify any findings of noncompliance, provide an explanation of why the State did not identify any findings of noncompliance.

Targets must be 0% for 4B.

Were all races and ethnicities included in the review?

YES

State's definition of "significant discrepancy" and methodology

South Dakota's definition of significant discrepancy for 4B means more than 5% of the unduplicated students with disabilities by race/ethnicity at the LEA level with 10 or more students included in the numerator and the LEA child count included in the denominator. South Dakota chose this option for analyzing suspension data because the South Dakota Department of Education does not collect data on suspensions of students who are not on IEPs in a format that allows a comparison between the two groups.

$$\text{IEP students per race and ethnic group suspended or expelled at the LEA} > \text{than 10 days in a school year} \div \text{Child Count at the LEA} \times 100 = \%$$

Significant Discrepancy: If greater than 5% of the LEA child count population by race have been suspended for >10 days.

Provide additional information about this indicator (optional)

Review of Policies, Procedures, and Practices (completed in FFY 2018 using 2017-2018 data)

Provide a description of the review of policies, procedures, and practices relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards.

26 LEAs reported suspending one or more students for greater than ten days. Of these LEAs, three met the minimum N size of 10 students for removals by race/ethnicity and of those three, none had suspended over 5% of their special education students for greater than 10 days and therefore were not required to have a review of policies, procedures, and practices.

The State DID NOT identify noncompliance with Part B requirements as a result of the review required by 34 CFR §300.170(b)

If YES, select one of the following:

The State must report on the correction of noncompliance in next year's SPP/APR consistent with requirements in the Measurement Table and OSEP Memorandum 09-02, dated October 17, 2008. Please explain why the State did not ensure that policies, procedures, and practices were revised to comply with applicable requirements.

XXX

Describe how the State ensured that such policies, procedures, and practices were revised to comply with applicable requirements consistent with OSEP Memorandum 09-02, dated October 17, 2008.

Indicator 5: Education Environments (children 6-21)

Instructions and Measurement

Monitoring Priority: FAPE in the LRE

Results indicator: Education environments (children 6-21): Percent of children with IEPs aged 6 through 21 served:

- A. Inside the regular class 80% or more of the day;
- B. Inside the regular class less than 40% of the day; and
- C. In separate schools, residential facilities, or homebound/hospital placements.

(20 U.S.C. 1416(a)(3)(A))

Data Source

Same data as used for reporting to the Department under section 618 of the IDEA, using the definitions in EDFacts file specification FS002.

Measurement

Percent = [(# of children with IEPs aged 6 through 21 served inside the regular class 80% or more of the day) divided by the (total # of students aged 6 through 21 with IEPs)] times 100.

Percent = [(# of children with IEPs aged 6 through 21 served inside the regular class less than 40% of the day) divided by the (total # of students aged 6 through 21 with IEPs)] times 100.

Percent = [(# of children with IEPs aged 6 through 21 served in separate schools, residential facilities, or homebound/hospital placements) divided by the (total # of students aged 6 through 21 with IEPs)] times 100.

Instructions

Sampling from the State's 618 data is not allowed.

Describe the results of the calculations and compare the results to the target.

If the data reported in this indicator are not the same as the State's data reported under section 618 of the IDEA, explain.

Indicator 7: Preschool Outcomes

Instructions and Measurement

Monitoring Priority: FAPE in the LRE

Results indicator: Percent of preschool children aged 3 through 5 with IEPs who demonstrate improved:

- A. Positive social-emotional skills (including social relationships);
- B. Acquisition and use of knowledge and skills (including early language/ communication and early literacy); and
- C. Use of appropriate behaviors to meet their needs.

(20 U.S.C. 1416 (a)(3)(A))

Data Source

State selected data source.

Measurement

Outcomes:

- A. Positive social-emotional skills (including social relationships);
- B. Acquisition and use of knowledge and skills (including early language/communication and early literacy); and
- C. Use of appropriate behaviors to meet their needs.

Progress categories for A, B and C:

- a. Percent of preschool children who did not improve functioning = [(# of preschool children who did not improve functioning) divided by (# of preschool children with IEPs assessed)] times 100.
- b. Percent of preschool children who improved functioning but not sufficient to move nearer to functioning comparable to same-aged peers = [(# of preschool children who improved functioning but not sufficient to move nearer to functioning comparable to same-aged peers) divided by (# of preschool children with IEPs assessed)] times 100.
- c. Percent of preschool children who improved functioning to a level nearer to same-aged peers but did not reach it = [(# of preschool children who improved functioning to a level nearer to same-aged peers but did not reach it) divided by (# of preschool children with IEPs assessed)] times 100.
- d. Percent of preschool children who improved functioning to reach a level comparable to same-aged peers = [(# of preschool children who improved functioning to reach a level comparable to same-aged peers) divided by (# of preschool children with IEPs assessed)] times 100.
- e. Percent of preschool children who maintained functioning at a level comparable to same-aged peers = [(# of preschool children who maintained functioning at a level comparable to same-aged peers) divided by (# of preschool children with IEPs assessed)] times 100.

Summary Statements for Each of the Three Outcomes:

Summary Statement 1: Of those preschool children who entered the preschool program below age expectations in each Outcome, the percent who substantially increased their rate of growth by the time they turned 6 years of age or exited the program.

Measurement for Summary Statement 1: Percent = [(# of preschool children reported in progress category (c) plus # of preschool children reported in category (d)) divided by ((# of preschool children reported in progress category (a) plus # of preschool children reported in progress category (b) plus # of preschool children reported in progress category (c) plus # of preschool children reported in progress category (d))] times 100.

Summary Statement 2: The percent of preschool children who were functioning within age expectations in each Outcome by the time they turned 6 years of age or exited the program.

Measurement for Summary Statement 2: Percent = [(# of preschool children reported in progress category (d) plus # of preschool children reported in progress category (e)) divided by ((the total # of preschool children reported in progress categories (a) + (b) + (c) + (d) + (e))] times 100.

Instructions

Sampling of **children for assessment** is allowed. When sampling is used, submit a description of the sampling methodology outlining how the design will yield valid and reliable estimates. (See [General Instructions](#) on page 2 for additional instructions on sampling.)

In the measurement include, in the numerator and denominator, only children who received special education and related services for at least six months during the age span of three through five years.

Describe the results of the calculations and compare the results to the targets. States will use the progress categories for each of the three Outcomes to calculate and report the two Summary Statements. States have provided targets for the two Summary Statements for the three Outcomes (six numbers for targets for each FFY).

Report progress data and calculate Summary Statements to compare against the six targets. Provide the actual numbers and percentages for the five reporting categories for each of the three outcomes.

In presenting results, provide the criteria for defining "comparable to same-aged peers." If a State is using the Early Childhood Outcomes Center (ECO) Child Outcomes Summary (COS), then the criteria for defining "comparable to same-aged peers" has been defined as a child who has been assigned a score of 6 or 7 on the COS.

In addition, list the instruments and procedures used to gather data for this indicator, including if the State is using the ECO COS.

7 - Indicator Data

Not Applicable

Select yes if this indicator is not applicable.

NO

C2	

Does the State include in the numerator and denominator only children who received special education and related services for at least six months during the age span of three through five years? (yes/no)

YES

Please explain why the State did not include in the numerator and denominator only children who received special education and related services for at least six months during the age span of three through five years.

	Yes / No
Was sampling used?	NO
If yes, has your previously-approved sampling plan changed?	
If the plan has changed, please provide sampling plan	

Describe the sampling methodology outlining how the design will yield valid and reliable estimates.

Did you use the Early Childhood Outcomes Center (ECO) Child Outcomes Summary Form (COS) process? (yes/no)

NO

If no, provide the criteria for defining "comparable to same-aged peers."

South Dakota defined "comparable to same-age peers" as any child who received a standard score of -1.27 or above the norm on the Battelle Developmental Inventory II (BDI-2) scoring chart. This corresponds to the 10th percentile rank on the BDI-2 for a given outcome area.

List the instruments and procedures used to gather data for this indicator.

The BDI-2 is used to gather data for this indicator. When a child exits the Part C program and transitions to Part B (619), the student is assessed in the areas of cognitive, physical, communication, social-emotional, and adaptive development using the BDI-2. The exit data for Part C becomes the baseline data for children who become eligible for Part B (619). Children who enter the Part B (619) system after age three, will be tested using the BDI-2 in the areas of the development listed previously to establish a baseline. Upon exiting the 619 program, a student is assessed in the same five areas of development using the BDI-2. The baseline entry scores will be compared to the exit scores in the five evaluated areas of development to determine progress in the three indicator outcome areas.

Provide additional information about this indicator (optional)

7 - Prior FFY Required Actions

None

Response to actions required in FFY 2017 SPP/APR

7 - OSEP Response

7 - Required Actions

Indicator 8: Parent involvement

Instructions and Measurement

Monitoring Priority: FAPE in the LRE

Results indicator: Percent of parents with a child receiving special education services who report that schools facilitated parent involvement as a means of improving services and results for children with disabilities.

(20 U.S.C. 1416(a)(3)(A))

Data Source

State selected data source.

Measurement

Percent = [(# of respondent parents who report schools facilitated parent involvement as a means of improving services and results for children with disabilities) divided by the (total # of respondent parents of children with disabilities)] times 100.

Instructions

Sampling of parents from whom response is requested is allowed. When sampling is used, submit a description of the sampling methodology outlining how the design will yield valid and reliable estimates. (See [General Instructions](#) on page 2 for additional instructions on sampling.)

Describe the results of the calculations and compare the results to the target.

Provide the actual numbers used in the calculation.

If the State is using a separate data collection methodology for preschool children, the State must provide separate baseline data, targets, and actual target data or discuss the procedures used to combine data from school age and preschool data collection methodologies in a manner that is valid and reliable.

While a survey is not required for this indicator, a State using a survey must submit a copy of any new or revised survey with its SPP/APR.

Report the number of parents to whom the surveys were distributed.

Include the State's analysis of the extent to which the demographics of the parents responding are representative of the demographics of children receiving special education services. States should consider categories such as race and ethnicity, age of the student, disability category, and geographic location in the State.

If the analysis shows that the demographics of the parents responding are not representative of the demographics of children receiving special education services in the State, describe the strategies that the State will use to ensure that in the future the response data are representative of those demographics. In identifying such strategies, the State should consider factors such as how the State distributed the survey to parents (e.g., by mail, by e-mail, on-line, by telephone, in-person through school personnel), and how responses were collected.

States are encouraged to work in collaboration with their OSEP-funded parent centers in collecting data.

XXX

Since the State did not report preschool children separately, discuss the procedures used to combine data from school age and preschool surveys in a manner that is valid and reliable.

Parents of all students with disabilities ages 3-21 are given many opportunities to complete the survey. As in previous years, in FFY 2018, the survey was distributed via mail and an online link. Parents could also complete the survey at the annual IEP meeting, parent-teacher conferences, and community dinners. This personalized distribution method ensured all parents received the survey; furthermore, school staff members personally encourage the parents to complete the survey.

Indicator 9: Disproportionate Representation

Instructions and Measurement

Monitoring Priority: Disproportionality

Compliance indicator: Percent of districts with disproportionate representation of racial and ethnic groups in special education and related services that is the result of inappropriate identification.

(20 U.S.C. 1416(a)(3)(C))

Data Source

State's analysis, based on State's Child Count data collected under IDEA section 618, to determine if the disproportionate representation of racial and ethnic groups in special education and related services was the result of inappropriate identification.

Measurement

Percent = [(# of districts, that meet the State-established n and/or cell size (if applicable) for one or more racial/ethnic groups, with disproportionate representation of racial and ethnic groups in special education and related services that is the result of inappropriate identification) divided by the (# of districts in the State that meet the State-established n and/or cell size (if applicable) for one or more racial/ethnic groups)] times 100.

Include State's definition of "disproportionate representation." Please specify in your definition: 1) the calculation method(s) being used (i.e., risk ratio, weighted risk ratio, e-formula, etc.); and 2) the threshold at which disproportionate representation is identified. Also include, as appropriate, 3) the number of years of data used in the calculation; and 4) any minimum cell and/or n-sizes (i.e., risk numerator and/or risk denominator).

Based on its review of the 618 data for FFY 2018, describe how the State made its annual determination as to whether the disproportionate representation it identified of racial and ethnic groups in special education and related services was the result of inappropriate identification as required by 34 CFR §§300.600(d)(3) and 300.602(a), e.g., using monitoring data; reviewing policies, practices and procedures, etc. In determining disproportionate representation, analyze data, for each district, for all racial and ethnic groups in the district, or all racial and ethnic groups in the district that meet a minimum n and/or cell size set by the State. Report on the percent of districts in which disproportionate representation of racial and ethnic groups in special education and related services is the result of inappropriate identification, even if the determination of inappropriate identification was made after the end of the FFY 2018 reporting period (i.e., after June 30, 2019).

Instructions

Provide racial/ethnic disproportionality data for all children aged 6 through 21 served under IDEA, aggregated across all disability categories.

States are not required to report on underrepresentation.

If the State has established a minimum n and/or cell size requirement, the State may only include, in both the numerator and the denominator, districts that met that State-established n and/or cell size. If the State used a minimum n and/or cell size requirement, report the number of districts totally excluded from the calculation as a result of this requirement because the district did not meet the minimum n and/or cell size for any racial/ethnic group.

Consider using multiple methods in calculating disproportionate representation of racial and ethnic groups to reduce the risk of overlooking potential problems. Describe the method(s) used to calculate disproportionate representation.

Provide the number of districts that met the State-established n and/or cell size (if applicable) for one or more racial/ethnic groups identified with disproportionate representation of racial and ethnic groups in special education and related services and the number of those districts identified with disproportionate representation that is the result of inappropriate identification.

Targets must be 0%.

Provide detailed information about the timely correction of noncompliance as noted in OSEP's response for the previous SPP/APR. If the State did not ensure timely correction of the previous noncompliance, provide information on the extent to which noncompliance was subsequently corrected (more than one year after identification). In addition, provide information regarding the nature of any continuing noncompliance, improvement activities completed (e.g., review of policies and procedures, technical assistance, training, etc.) and any enforcement actions that were taken. If the State reported less than 100% compliance for the previous reporting period (e.g., for the FFY 2018 SPP/APR, the data for FFY 2017), and the State did not identify any findings of noncompliance, provide an explanation of why the State did not identify any findings of noncompliance.

Provide reasons for slippage, if applicable

XXX

Were all races and ethnicities included in the review?

YES

Define "disproportionate representation." Please specify in your definition: 1) the calculation method(s) being used (i.e., risk ratio, weighted risk ratio, e-formula, etc.); and 2) the threshold at which disproportionate representation is identified. Also include, as appropriate, 3) the number of years of data used in the calculation; and 4) any minimum cell and/or n-sizes (i.e., risk numerator and/or risk denominator).

South Dakota collects data for Indicator 9 through the state December 1 child count and Fall Enrollment collected on the last Friday in September. A Weighted Risk Ratio based on the identification rate for each racial/ethnic group at each LEA is calculated; thus, all data for all racial/ethnic groups in the State are examined. A Weighted Risk Ratio is determined only if there are 20 or more students in the cell size of interest (based on child count data) and if there are also 20 or more students in the comparison group. South Dakota uses one year of data in the calculation.

Disproportionate representation is defined as a Weighted Risk Ratio of 3.00 and above (over-representation). Once a ratio is flagged for numerical disproportionate representation, the policies and procedures of that LEA are reviewed to determine if the disproportionate representation is due to inappropriate identification.

For Indicator 9, all of South Dakota's 149 LEAs are included in the analyses. Of these 149 LEAs, 32 met the minimum n requirements at least one time for a Final Risk Ratio to be calculated (for each LEA, in theory, seven risk ratios could be calculated—one for each racial/ethnic group). Please note that many LEAs in South Dakota have fewer than ten students with a disability of a particular race/ethnicity. Thus, very small numbers prevent the State from calculating reliable and meaningful risk ratios for every racial/ethnic group in every LEA.

Describe how the State made its annual determination as to whether the disproportionate representation it identified of racial and ethnic groups in special education and related services was the result of inappropriate identification.

When a district meets the methodology for disproportionate representation, Special Education Programs conducts an on-site review. The district will provide special education files across disability categories based on race/ethnicity. The on-site team reviews the LEA's identification policy and procedures. The team compares these to document practices for all students identified with a disability, students in specific categories, and students in identified race/ethnic categories.

If the district followed appropriate policy and procedures for disability categories and race/ethnicity groups, the district is identified as having appropriate identification procedures. If policy and procedures were not appropriately followed, then the district would receive a Corrective Action Plan (CAP).

Indicator 10: Disproportionate Representation in Specific Disability Categories

Instructions and Measurement

Monitoring Priority: Disproportionality

Compliance indicator: Percent of districts with disproportionate representation of racial and ethnic groups in specific disability categories that is the result of inappropriate identification.

(20 U.S.C. 1416(a)(3)(C))

Data Source

State's analysis, based on State's Child Count data collected under IDEA section 618, to determine if the disproportionate representation of racial and ethnic groups in specific disability categories was the result of inappropriate identification.

Measurement

Percent = [(# of districts, that meet the State-established n and/or cell size (if applicable) for one or more racial/ethnic groups, with disproportionate representation of racial and ethnic groups in specific disability categories that is the result of inappropriate identification) divided by the (# of districts in the State that meet the State-established n and/or cell size (if applicable) for one or more racial/ethnic groups)] times 100.

Include State's definition of "disproportionate representation." Please specify in your definition: 1) the calculation method(s) being used (i.e., risk ratio, weighted risk ratio, e-formula, etc.); and 2) the threshold at which disproportionate representation is identified. Also include, as appropriate, 3) the number of years of data used in the calculation; and 4) any minimum cell and/or n-sizes (i.e., risk numerator and/or risk denominator).

Based on its review of the 618 data for FFY 2018, describe how the State made its annual determination as to whether the disproportionate representation it identified of racial and ethnic groups in specific disability categories was the result of inappropriate identification as required by 34 CFR §§300.600(d)(3) and 300.602(a), e.g., using monitoring data; reviewing policies, practices and procedures, etc. In determining disproportionate representation, analyze data, for each district, for all racial and ethnic groups in the district, or all racial and ethnic groups in the district that meet a minimum n and/or cell size set by the State. Report on the percent of districts in which disproportionate representation of racial and ethnic groups in special education and related services is the result of inappropriate identification, even if the determination of inappropriate identification was made after the end of the FFY 2018 reporting period (i.e., after June 30, 2019).

Instructions

Provide racial/ethnic disproportionality data for all children aged 6 through 21 served under IDEA, aggregated across all disability categories.

States are not required to report on underrepresentation.

If the State has established a minimum n and/or cell size requirement, the State may only include, in both the numerator and the denominator, districts that met that State-established n and/or cell size. If the State used a minimum n and/or cell size requirement, report the number of districts totally excluded from the calculation as a result of this requirement because the district did not meet the minimum n and/or cell size for any racial/ethnic group.

Consider using multiple methods in calculating disproportionate representation of racial and ethnic groups to reduce the risk of overlooking potential problems. Describe the method(s) used to calculate disproportionate representation.

Provide the number of districts that met the State-established n and/or cell size (if applicable) for one or more racial/ethnic groups identified with disproportionate representation of racial and ethnic groups in special education and related services and the number of those districts identified with disproportionate representation that is the result of inappropriate identification.

Targets must be 0%.

Provide detailed information about the timely correction of noncompliance as noted in OSEP's response for the previous SPP/APR. If the State did not ensure timely correction of the previous noncompliance, provide information on the extent to which noncompliance was subsequently corrected (more than one year after identification). In addition, provide information regarding the nature of any continuing noncompliance, improvement activities completed (e.g., review of policies and procedures, technical assistance, training, etc.) and any enforcement actions that were taken.

If the State reported less than 100% compliance for the previous reporting period (e.g., for the FFY 2018 SPP/APR, the data for FFY 2017), and the State did not identify any findings of noncompliance, provide an explanation of why the State did not identify any findings of noncompliance.

XXX

Were all races and ethnicities included in the review?

YES

Define "disproportionate representation." Please specify in your definition: 1) the calculation method(s) being used (i.e., risk ratio, weighted risk ratio, e-formula, etc.); and 2) the threshold at which disproportionate representation is identified. Also include, as appropriate, 3) the number of years of data used in the calculation; and 4) any minimum cell and/or n-sizes (i.e., risk numerator and/or risk denominator).

South Dakota collects data for Indicator 10 through the state December 1 child count and Fall Enrollment collected on the last Friday in September. A Weighted Risk Ratio based on the identification rate for each racial/ethnic group at each LEA is calculated; thus, all data for all racial/ethnic groups in the State are examined. A Weighted Risk Ratio is determined only if there are 20 or more students in the cell size of interest (based on child count data) and if there are also 20 or more students in the comparison group. South Dakota uses one year of data in the calculation.

Disproportionate representation is defined as a Weighted Risk Ratio of 3.00 and above (over-representation). Once a ratio is flagged for numerical disproportionate representation, the policies and procedures of that LEA are reviewed to determine if the disproportionate representation is due to inappropriate identification.

For Indicator 10, all of South Dakota's 149 LEAs are included in the analyses. Of these 149 LEAs, 14 met the minimum n requirements at least one time for a Final Risk Ratio to be calculated (for each LEA, in theory, 42 risk ratios could be calculated—one for each racial/ethnic group times the six primary disability categories). Please note that many LEAs in South Dakota have fewer than ten students with a disability of a particular race/ethnicity; when this is disaggregated further by type of primary disability, the numbers get extremely small. Thus, very small numbers prevent the State from calculating reliable and meaningful risk ratios for every racial/ethnic group in every LEA.

Describe how the State made its annual determination as to whether the disproportionate overrepresentation it identified of racial and ethnic groups in specific disability categories was the result of inappropriate identification.

When a district meets the methodology for disproportionate representation, Special Education Programs conducts an on-site review. The district will provide special education files across disability categories based on race/ethnicity. The on-site team reviews the LEA's identification policy and procedures. The team compares these to document practices for all students identified with a disability, students in specific categories, and students in identified race/ethnic categories.

If the district followed appropriate policy and procedures for disability categories and race/ethnicity groups, the district is identified as having appropriate identification procedures. If policy and procedures were not appropriately followed, then the district would receive a Corrective Action Plan (CAP).

Indicator 11: Child Find

Instructions and Measurement

Monitoring Priority: Effective General Supervision Part B / Child Find

Compliance indicator: Percent of children who were evaluated within 60 days of receiving parental consent for initial evaluation or, if the State establishes a timeframe within which the evaluation must be conducted, within that timeframe.

(20 U.S.C. 1416(a)(3)(B))

Data Source

Data to be taken from State monitoring or State data system and must be based on actual, not an average, number of days. Indicate if the State has established a timeline and, if so, what is the State's timeline for initial evaluations.

Measurement

- # of children for whom parental consent to evaluate was received.
- # of children whose evaluations were completed within 60 days (or State-established timeline).
Account for children included in (a), but not included in (b). Indicate the range of days beyond the timeline when the evaluation was completed and any reasons for the delays.

Percent = [(b) divided by (a)] times 100.

Instructions

If data are from State monitoring, describe the method used to select LEAs for monitoring. If data are from a State database, include data for the entire reporting year.

Describe the results of the calculations and compare the results to the target. Describe the method used to collect these data, and if data are from the State's monitoring, describe the procedures used to collect these data. Provide the actual numbers used in the calculation.

Note that under 34 CFR §300.301(d), the timeframe set for initial evaluation does not apply to a public agency if: (1) the parent of a child repeatedly fails or refuses to produce the child for the evaluation; or (2) a child enrolls in a school of another public agency after the timeframe for initial evaluations has begun, and prior to a determination by the child's previous public agency as to whether the child is a child with a disability. States should not report these exceptions in either the numerator (b) or denominator (a). If the State-established timeframe provides for exceptions through State regulation or policy, describe cases falling within those exceptions and include in b.

Targets must be 100%.

Provide detailed information about the timely correction of noncompliance as noted in OSEP's response for the previous SPP/APR. If the State did not ensure timely correction of the previous noncompliance, provide information on the extent to which noncompliance was subsequently corrected (more than one year after identification). In addition, provide information regarding the nature of any continuing noncompliance, improvement activities completed (e.g., review of policies and procedures, technical assistance, training, etc.) and any enforcement actions that were taken.

If the State reported less than 100% compliance for the previous reporting period (e.g., for the FFY 2018 SPP/APR, the data for FFY 2017), and the State did not identify any findings of noncompliance, provide an explanation of why the State did not identify any findings of noncompliance.

Provide reasons for slippage

XXX

Number of children included in (a) but not included in (b)

3

Account for children included in (a) but not included in (b). Indicate the range of days beyond the timeline when the evaluation was completed and any reasons for the delays.

Although South Dakota did not meet 100% compliance, the state showed substantial compliance with 99.90% of children who were evaluated within the state's established 25 school day timeline. Three incidents of noncompliance do not indicate a statewide systematic issue. Substantial training efforts have been made to inform LEA's of the policies and procedures necessary to meet the evaluation timeline. Of the three incidents of noncompliance, two LEA's were found in compliance during FFY 2017.

Three of the 149 LEAs did not meet the 100% target due to staff calculation errors, scheduling issues and failure to obtain permission to extend timeline.

Range of days beyond the timeline:

- 1 student exceeded the timeline by 3 days
- 1 student exceeded the timeline by 4 days
- 1 student exceeded the timeline by 5 days

Indicate the evaluation timeline used:

The State established a timeline within which the evaluation must be conducted

What is the State's timeline for initial evaluations? If the State-established timeframe provides for exceptions through State regulation or policy, describe cases falling within those exceptions and include in (b).

South Dakota has defined the initial evaluation timeline as 25 school days from the date parental signed permission is received by the district in accordance with Administrative Rules of South Dakota 24:05:25:03 - Preplacement evaluation.

What is the source of the data provided for this indicator?

State database that includes data for the entire reporting year

Describe the method used to collect these data, and if data are from the State's monitoring, describe the procedures used to collect these data.

SEP created an electronic system that all LEA's are required to utilize to track and annually report initial evaluations conducted in the LEA. LEA's may utilize a state-developed spreadsheet located at <https://doe.sd.gov/sped/SPP.aspx> to track students throughout the school year. All LEA's enter student data directly into the secured electronic system.

The data collected includes student ID, date permission received, date of last evaluation, the number of school days from permission received to evaluation completed, date eligibility is determined, and, if needed, the reason the timeline was not met. LEA's submit data and sign-off by August 1 of each fiscal year. SEP reviews the responses for accuracy.

Provide additional information about this indicator (optional)

Correction of Findings of Noncompliance Identified in FFY 2017

Findings of Noncompliance Identified	Findings of Noncompliance Verified as Corrected Within One Year	Findings of Noncompliance Subsequently Corrected	Findings Not Yet Verified as Corrected
3	2	0	1

FFY 2017 Findings of Noncompliance Verified as Corrected

Describe how the State verified that the source of noncompliance is correctly implementing the regulatory requirements

South Dakota has verified that each child specific incidence of non-compliance was corrected (prong 1) and each of the late evaluations was completed properly. In addition to verifying the child specific non-compliance, SEP reviewed subsequent data and verified that two of the three LEAs properly implemented the specific regulatory requirements (prong 2) as required in the OSEP 09-02 memo.

Describe how the State verified that each individual case of noncompliance was corrected

In FFY 2017, three LEAs did not achieve 100% compliance for completing initial evaluations in the state designated 25 school day timeline. Each LEA had one student for which the timeline was not met which resulted in findings of non-compliance per LEA. SEP verified that each child specific incidence, of non-compliance, was corrected (prong 1) by verifying the completion of all evaluations. Additionally, the state reviewed the following year's initial evaluation data for each LEA held out of compliance. SEP verified that two of the three LEAs were correctly implementing the specific regulatory requirements based upon a review of updated data (prong 2) for FFY 2017 as required in the OSEP 09-02 memo.

FFY 2017 Findings of Noncompliance Not Yet Verified as Corrected

Actions taken if noncompliance not corrected

One LEA did not achieve 100% compliance on initial evaluation timelines in order to meet requirements in FFY 2018. The LEA was required to submit a 2018-19 report with 100% of initial evaluations completed within the 25 day timeline, however the LEA did not meet the requirement. The LEA has been placed on a new corrective action plan that includes training, quarterly data submission, desk audit for all student files not meeting compliance, and must achieve 100% compliance for 2019-2020 to assure the LEA is in compliance with prong 2 for FFY 2019 as required by OSEP 09-02 memo.

Indicator 12: Early Childhood Transition

Instructions and Measurement

Monitoring Priority: Effective General Supervision Part B / Effective Transition

Compliance indicator: Percent of children referred by Part C prior to age 3, who are found eligible for Part B, and who have an IEP developed and implemented by their third birthdays.

(20 U.S.C. 1416(a)(3)(B))

Data Source

Data to be taken from State monitoring or State data system.

Measurement

- # of children who have been served in Part C and referred to Part B for Part B eligibility determination.
- # of those referred determined to be NOT eligible and whose eligibility was determined prior to their third birthdays.
- # of those found eligible who have an IEP developed and implemented by their third birthdays.
- # of children for whom parent refusal to provide consent caused delays in evaluation or initial services or to whom exceptions under 34 CFR §300.301(d) applied.
- # of children determined to be eligible for early intervention services under Part C less than 90 days before their third birthdays.
- # of children whose parents chose to continue early intervention services beyond the child's third birthday through a State's policy under 34 CFR §303.211 or a similar State option.

Account for children included in (a), but not included in b, c, d, e, or f. Indicate the range of days beyond the third birthday when eligibility was determined and the IEP developed, and the reasons for the delays.

Percent = [(c) divided by (a - b - d - e - f)] times 100.

Instructions

If data are from State monitoring, describe the method used to select LEAs for monitoring. If data are from a State database, include data for the entire reporting year.

Describe the results of the calculations and compare the results to the target. Describe the method used to collect these data, and if data are from the State's monitoring, describe the procedures used to collect these data. Provide the actual numbers used in the calculation.

Category f is to be used only by States that have an approved policy for providing parents the option of continuing early intervention services beyond the child's third birthday under 34 CFR §303.211 or a similar State option.

Targets must be 100%.

Provide detailed information about the timely correction of noncompliance as noted in OSEP's response for the previous SPP/APR. If the State did not ensure timely correction of the previous noncompliance, provide information on the extent to which noncompliance was subsequently corrected (more than one year after identification). In addition, provide information regarding the nature of any continuing noncompliance, improvement activities completed (e.g., review of policies and procedures, technical assistance, training, etc.) and any enforcement actions that were taken.

If the State reported less than 100% compliance for the previous reporting period (e.g., for the FFY 2018 SPP/APR, the data for FFY 2017), and the State did not identify any findings of noncompliance, provide an explanation of why the State did not identify any findings of noncompliance.

15

Account for children included in (a), but not included in b, c, d, e, or f. Indicate the range of days beyond the third birthday when eligibility was determined and the IEP developed, and the reasons for the delays.

Attach PDF table (optional)

What is the source of the data provided for this indicator?

State database that includes data for the entire reporting year

Describe the method used to collect these data, and if data are from the State's monitoring, describe the procedures used to collect these data.

Part C Service Coordinators submit Part C exit data to the State Part C office. All exit code data are entered into the Part C data system by the Part C Data Manager. LEA's are required to submit transition data into the secured website by September 1st of each year. The Part B 619 Coordinator then analyzes the data submitted, verifies all students are accounted for per Part C records, addresses any data quality issues, verifies noncompliance issues, and provides districts with technical assistance on correct procedures. LEAs that do not meet the required timeline are contacted and justification is required for students not having an IEP in place by their third birthday to verify non-compliance.

In addition, SEP verifies the data collected from Part C during onsite accountability monitoring visits. The team reviews early childhood files and monitors all students referred from Part C to Part B that were determined eligible and had an IEP in place by their 3rd birthday.

Provide additional information about this indicator (optional)

Indicator 13: Secondary Transition

Instructions and Measurement

Monitoring Priority: Effective General Supervision Part B / Effective Transition

Compliance indicator: Secondary transition: Percent of youth with IEPs aged 16 and above with an IEP that includes appropriate measurable postsecondary goals that are annually updated and based upon an age appropriate transition assessment, transition services, including courses of study, that will reasonably enable the student to meet those postsecondary goals, and annual IEP goals related to the student's transition services needs. There also must be evidence that the student was invited to the IEP Team meeting where transition services are to be discussed and evidence that, if appropriate, a representative of any participating agency was invited to the IEP Team meeting with the prior consent of the parent or student who has reached the age of majority.

(20 U.S.C. 1416(a)(3)(B))

Data Source

Data to be taken from State monitoring or State data system.

Measurement

Percent = [(# of youth with IEPs aged 16 and above with an IEP that includes appropriate measurable postsecondary goals that are annually updated and based upon an age appropriate transition assessment, transition services, including courses of study, that will reasonably enable the student to meet those postsecondary goals, and annual IEP goals related to the student's transition services needs. There also must be evidence that the student was invited to the IEP Team meeting where transition services are to be discussed and evidence that, if appropriate, a representative of any participating agency was invited to the IEP Team meeting with the prior consent of the parent or student who has reached the age of majority) divided by the (# of youth with an IEP age 16 and above)] times 100.

If a State's policies and procedures provide that public agencies must meet these requirements at an age younger than 16, the State may, but is not required to, choose to include youth beginning at that younger age in its data for this indicator. If a State chooses to do this, it must state this clearly in its SPP/APR and ensure that its baseline data are based on youth beginning at that younger age.

Instructions

If data are from State monitoring, describe the method used to select LEAs for monitoring. If data are from a State database, include data for the entire reporting year.

Describe the results of the calculations and compare the results to the target. Describe the method used to collect these data and if data are from the State's monitoring, describe the procedures used to collect these data. Provide the actual numbers used in the calculation.

Targets must be 100%.

Provide detailed information about the timely correction of noncompliance as noted in OSEP's response for the previous SPP/APR. If the State did not ensure timely correction of the previous noncompliance, provide information on the extent to which noncompliance was subsequently corrected (more than one year after identification). In addition, provide information regarding the nature of any continuing noncompliance, improvement activities completed (e.g., review of policies and procedures, technical assistance, training, etc.) and any enforcement actions that were taken.

If the State reported less than 100% compliance for the previous reporting period (e.g., for the FFY 2018 SPP/APR, the data for FFY 2017), and the State did not identify any findings of noncompliance, provide an explanation of why the State did not identify any findings of noncompliance.

107	128	93.71%	100%	83.59%	Did Not Meet Target	Slippage

Provide reasons for slippage, if applicable

Less schools were monitored this year and of those monitored most were small districts with less transition age students. There was also an issue with getting consent to invite outside agencies. Corrective actions plans were written and technical assistance provided as to the correct procedure for inviting outside agencies.

What is the source of the data provided for this indicator?

State monitoring

Describe the method used to collect these data, and if data are from the State's monitoring, describe the procedures used to collect these data.

Indicator 13 data is collected during on-site monitoring reviews. Reviewers utilize the Indicator 13 checklist (which includes eight areas of compliance) to review files for each case manager and disability category in the LEA. To be found compliant, LEAs must demonstrate appropriate procedures in at least one file from each represented disability categories and in two files from each case manager.

	Yes / No
Do the State's policies and procedures provide that public agencies must meet these requirements at an age younger than 16?	NO
If yes, did the State choose to include youth at an age younger than 16 in its data for this indicator and ensure that its baseline data are based on youth beginning at that younger age?	
If yes, at what age are youth included in the data for this indicator	

If no, please explain

Indicator 14: Post-School Outcomes

Instructions and Measurement

Monitoring Priority: Effective General Supervision Part B / Effective Transition

Results indicator: Post-school outcomes: Percent of youth who are no longer in secondary school, had IEPs in effect at the time they left school, and were:

Enrolled in higher education within one year of leaving high school.

Enrolled in higher education or competitively employed within one year of leaving high school.

Enrolled in higher education or in some other postsecondary education or training program; or competitively employed or in some other employment within one year of leaving high school.

(20 U.S.C. 1416(a)(3)(B))

Data Source

State selected data source.

Measurement

- A. Percent enrolled in higher education = [(# of youth who are no longer in secondary school, had IEPs in effect at the time they left school and were enrolled in higher education within one year of leaving high school) divided by the (# of respondent youth who are no longer in secondary school and had IEPs in effect at the time they left school)] times 100.
- B. Percent enrolled in higher education or competitively employed within one year of leaving high school = [(# of youth who are no longer in secondary school, had IEPs in effect at the time they left school and were enrolled in higher education or competitively employed within one year of leaving high school) divided by the (# of respondent youth who are no longer in secondary school and had IEPs in effect at the time they left school)] times 100.
- C. Percent enrolled in higher education, or in some other postsecondary education or training program; or competitively employed or in some other employment = [(# of youth who are no longer in secondary school, had IEPs in effect at the time they left school and were enrolled in higher education, or in some other postsecondary education or training program; or competitively employed or in some other employment) divided by the (# of respondent youth who are no longer in secondary school and had IEPs in effect at the time they left school)] times 100.

Instructions

Sampling of youth who had IEPs and are no longer in secondary school is allowed. When sampling is used, submit a description of the sampling methodology outlining how the design will yield valid and reliable estimates of the target population. (See [General Instructions](#) on page 2 for additional instructions on sampling.)

Collect data by September 2019 on students who left school during 2017-2018, timing the data collection so that at least one year has passed since the students left school. Include students who dropped out during 2017-2018 or who were expected to return but did not return for the current school year. This includes all youth who had an IEP in effect at the time they left school, including those who graduated with a regular diploma or some other credential, dropped out, or aged out.

I. Definitions

Enrolled in higher education as used in measures A, B, and C means youth have been enrolled on a full- or part-time basis in a community college (two-year program) or college/university (four or more year program) for at least one complete term, at any time in the year since leaving high school.

Competitive employment as used in measures B and C: States have two options to report data under “competitive employment” in the FFY 2018 SPP/APR, due February 2020:

Option 1: Use the same definition as used to report in the FFY 2015 SPP/APR, i.e., competitive employment means that youth have worked for pay at or above the minimum wage in a setting with others who are nondisabled for a period of 20 hours a week for at least 90 days at any time in the year since leaving high school. This includes military employment.

Option 2: States report in alignment with the term “competitive integrated employment” and its definition, in section 7(5) of the Rehabilitation Act, as amended by Workforce Innovation and Opportunity Act (WIOA), and 34 CFR §361.5(c)(9). For the purpose of defining the rate of compensation for students working on a “part-time basis” under this category, OSEP maintains the standard of 20 hours a week for at least 90 days at any time in the year since leaving high school. This definition applies to military employment.

Enrolled in other postsecondary education or training as used in measure C, means youth have been enrolled on a full- or part-time basis for at least 1 complete term at any time in the year since leaving high school in an education or training program (e.g., Job Corps, adult education, workforce development program, vocational technical school which is less than a two-year program).

Some other employment as used in measure C means youth have worked for pay or been self-employed for a period of at least 90 days at any time in the year since leaving high school. This includes working in a family business (e.g., farm, store, fishing, ranching, catering services, etc.).

II. Data Reporting

Provide the actual numbers for each of the following mutually exclusive categories. The actual number of “leavers” who are:

1. Enrolled in higher education within one year of leaving high school;
2. Competitively employed within one year of leaving high school (but not enrolled in higher education);
3. Enrolled in some other postsecondary education or training program within one year of leaving high school (but not enrolled in higher education or competitively employed);
4. In some other employment within one year of leaving high school (but not enrolled in higher education, some other postsecondary education or training program, or competitively employed).

“Leavers” should only be counted in one of the above categories, and the categories are organized hierarchically. So, for example, “leavers” who are enrolled in full- or part-time higher education within one year of leaving high school should only be reported in category 1, even if they also happen to be employed. Likewise, “leavers” who are not enrolled in either part- or full-time higher education, but who are competitively employed, should only be reported under category 2, even if they happen to be enrolled in some other postsecondary education or training program.

III. Reporting on the Measures/Indicators

Targets must be established for measures A, B, and C.

Measure A: For purposes of reporting on the measures/indicators, please note that any youth enrolled in an institution of higher education (that meets any definition of this term in the Higher Education Act (HEA)) within one year of leaving high school must be reported under measure A. This could include youth who also happen to be competitively employed, or in some other training program; however, the key outcome we are interested in here is enrollment in higher education.

Measure B: All youth reported under measure A should also be reported under measure B, in addition to all youth that obtain competitive employment within one year of leaving high school.

Measure C: All youth reported under measures A and B should also be reported under measure C, in addition to youth that are enrolled in some other postsecondary education or training program, or in some other employment.

Include the State's analysis of the extent to which the response data are representative of the demographics of youth who are no longer in secondary school and had IEPs in effect at the time they left school. States should consider categories such as race and ethnicity, disability category, and geographic location in the State.

If the analysis shows that the response data are not representative of the demographics of youth who are no longer in secondary school and had IEPs in effect at the time they left school, describe the strategies that the State will use to ensure that in the future the response data are representative of those demographics. In identifying such strategies, the State should consider factors such as how the State collected the data.

	Yes / No
Are the response data representative of the demographics of youth who are no longer in school and had IEPs in effect at the time they left school?	NO

If no, describe the strategies that the State will use to ensure that in the future the response data are representative of those demographics.

Provide additional information about this indicator (optional)

14 - Prior FFY Required Actions

In the FFY 2018 SPP/APR, the State must report whether the FFY 2018 data are representative of the demographics of youth who are no longer in secondary school and had IEPs in effect at the time they left school, and, if not, the actions the State is taking to address this issue. The State must also include its analysis of the extent to which the response data are representative of the demographics of youth who are no longer in secondary school and had IEPs in effect at the time they left school.

Response to actions required in FFY 2017 SPP/APR

14 - OSEP Response

14 - Required Actions

Indicator 15: Resolution Sessions

Instructions and Measurement

Monitoring Priority: Effective General Supervision Part B / General Supervision

Results Indicator: Percent of hearing requests that went to resolution sessions that were resolved through resolution session settlement agreements. (20 U.S.C. 1416(a)(3)(B))

Data Source

Data collected under section 618 of the IDEA (IDEA Part B Dispute Resolution Survey in the ED Facts Metadata and Process System (EMAPS)).

Measurement

Percent = (3.1(a) divided by 3.1) times 100.

Instructions

Sampling is not allowed.

Describe the results of the calculations and compare the results to the target.

States are not required to establish baseline or targets if the number of resolution sessions is less than 10. In a reporting period when the number of resolution sessions reaches 10 or greater, develop baseline, targets and improvement activities, and report on them in the corresponding SPP/APR.

States may express their targets in a range (e.g., 75-85%).

If the data reported in this indicator are not the same as the State's data under IDEA section 618, explain.

States are not required to report data at the LEA level.

15 - Indicator Data

Select yes to use target ranges

Indicator 16: Mediation

Instructions and Measurement

Monitoring Priority: Effective General Supervision Part B / General Supervision

Results indicator: Percent of mediations held that resulted in mediation agreements.

(20 U.S.C. 1416(a)(3(B)))

Data Source

Data collected under section 618 of the IDEA (IDEA Part B Dispute Resolution Survey in the ED Facts Metadata and Process System (EMAPS)).

Measurement

Percent = (2.1(a)(i) + 2.1(b)(i)) divided by 2.1 times 100.

Instructions

Sampling is not allowed.

Describe the results of the calculations and compare the results to the target.

States are not required to establish baseline or targets if the number of resolution sessions is less than 10. In a reporting period when the number of resolution sessions reaches 10 or greater, develop baseline, targets and improvement activities, and report on them in the corresponding SPP/APR.

States may express their targets in a range (e.g., 75-85%).

If the data reported in this indicator are not the same as the State's data under IDEA section 618, explain.

States are not required to report data at the LEA level.
